Regional Disparities:

Regional Disparities in Small Countries Daniel Felsenstein, Boris A. Portnov, 2005-12-28 1 2 Daniel Felsenstein and Boris A. Portnov 1 Department of Geography Hebrew University of Jerusalem Israel 2 Department of Natural Resources and Environmental Management University of Haifa Israel During the Candiot War of 1645 1669 the Ottoman Sultan Ibrahim I ordered his chief admiral to attack Malta Fearing imminent defeat by the superior Venetian forces stationed on the island the admiral decided to trick the sultan out of the idea As the story goes he placed a candle on his naval map allowing the wax to drip on the tiny island until it was completely covered Then he exclaimed in false surprise Malta Yok There is no Malta and convinced the sultan to sail his fleet to the Island of Crete instead Although Malta is not featured in this volume most of the countries it covers are of wax drip size Intuitively it may be expected that everything in small countries is diminutive distances population economies and even regional inequalities Thus at a symposium on The Challenge of Development convened in Israel in 1957 to mark the inauguration of a new building for the Department of Economics at the Hebrew University of Jerusalem the eminent US economist Simon Kuznets stated that developed small states seem to have succeeded in spreading the fruits of economic growth more widely among their populations than the larger states at comparable levels of income per capita

Regional Disparities, Growth, and Inclusiveness Mr. Holger Floerkemeier, Mr. Nikola Spatafora, Anthony Venables, 2021-02-12 We discuss regional disparities in economic performance and living standards We first set out some key facts and provide a conceptual framework to help analyze whether such disparities are efficient or instead reflect market and or policy failures We examine whether policy attempts to reduce regional disparities necessarily involve a trade off between equity and efficiency We then investigate whether policymakers should focus on boosting the economic performance of lagging regions or conversely accept the presence of regional disparities and instead assist households in lagging regions through transfer payments investments in education health and other basic services and by facilitating out migration

The Political Economy of Discontinuous Development Milica Z. Bookman, 1991-11-30 Outbursts of regional conflict within national boundaries have characterized recent years Sub national states including parts of the Soviet Union India Canada and Yugoslavia dissatisfied with their central governments seek forms of independence to pursue autonomous development paths These region state conflicts have occurred in nations at all levels of development Canada and Indonesia France and Papua New Guinea under diverse economic systems the USSR and Canada Yugoslavia and Spain and across political systems federations such as India and unitary states such as Italy Bookman s study develops methods whereby both state and region can evaluate the region s potential to sustain economic growth autonomously filling the gap in current perceptions of inter regional relations Bookman introduces the concept of discontinuous development to facilitate the analysis of sub national regions that have varying levels of development The volume s emphasis on high income regions within both agricultural and industrial nations and on the economic basis of conflict makes it a unique contribution that

assesses the viability of regions as autonomous entities The major part of the volume studies empirical evidence from India and Yugoslavia especially timely in light of present ethnic and religious conflicts in both countries The volume is divided into three sections Foundations Discontinuous Development and Inter regional Conflict and Empirical Evidence from India and Yugoslavia The first section presents a theoretical framework for issues internal to regions as well as regions relative to the nation It also outlines four ways of studying inter regional conflict which are explored in the empirical chapters Part 2 analyzes eight high income regions characterized by discontinuous development and relates their experiences to the four hypotheses presented earlier The last section contains empirical chapters testing the model in the context of India and Yugoslavia The final chapter contains a full discussion of the hypotheses pertaining to secession and offers some suggestions concerning the possibilities of secession as the outcome of inter regional conflict The explosive consequences of recent trends make it imperative that scholars in development economics political economy political science and macroeconomics as well as policy makers comprehend the inter regional economic and political relationships behind these conflicts

Regional Disparities in the Enlarged European Union Valentina Meliciani, 2015-10-14 The last twenty years have seen an increase in European integration and the emergence of the technological revolution Although tighter integration coupled with technological innovation should facilitate cross regional convergence some European regions have managed to jump ahead while others have been left behind This book examines the regional characteristics that favour growth and analyses the relevance of innovation socio economic and structural factors in shaping regional economic disparities In this book particular attention is devoted to the EU enlargement towards the East to its consequences on Europe's traditional North South divide and to the increasing regional disparities in new member states after the transition It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members particularly after the 2008 financial crisis It also shows that for newcomers regional disparities are essentially linked to socio economic factors as capital regions approach Western standards while others mainly old industrial regions and peripheral ones lag behind This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe

Regional Inequality in China Shenggen Fan, Ravi Kanbur, Xiaobo Zhang, 2009-04 As regional inequality looms large in the policy debate in China this volume brings together a selection of papers from authors whose work has had real impact on policy so that researchers and policy makers can have access to them in one place

have equally benefited from China's remarkable development over the last three decades is subjected to criticism in this book as Hong Yu systematically analyses the issue of regional inequality during the post 1978 period using the case of Guangdong. Guangdong is one of the key industrial centres and economic powerhouses in China and as a pioneer province instigating economic reform as China opened up to the world it offers an ideal focus upon which to question and enrich the Western theories of economic geography and regional disparity. Based on field research, analysis of geographic characteristics and regression models, this book illustrates how Guangdong's impressive development record has been marred by its rising regional disparity, investigates the main causes of this disparity and draws conclusions regarding the lessons China can learn from it. *Economic Development and Inequality in China* will be of interest to students and scholars of Chinese economics, Chinese regional studies, economic geography and China Studies. Hong Yu is a Visiting Research Fellow at the National University of Singapore. His research interests lie in the field of regional economy. He is the author of a chapter on China's two delta regions in the book *China and The Global Economic Crisis*. **The Wealth & Poverty of Regions** Mario

Polèse, 2010-01-15 As the world becomes more interconnected through travel and electronic communication, many believe that physical places will become less important. But as Mario Polèse argues in *The Wealth and Poverty of Regions*, geography will matter more than ever before in a world where distance is allegedly dead. This provocative book surveys the globe from London and Cape Town to New York and Beijing, contending that regions rise or fall due to their location, not only within nations but also on the world map. Polèse reveals how concentrations of industries and populations in specific locales often result in minor advantages that accumulate over time, resulting in reduced prices, improved transportation networks, increased diversity, and not least of all, the excitement and vitality that attracts ambitious people. *The Wealth and Poverty of Regions* maps out how a heady mix of size, infrastructure, proximity and cost will determine which urban centers become the thriving metropolises of the future and which become the deserted cities of the past. Engagingly written, the book provides insight to the past, present and future of regions. **Understanding China's Urbanization** Li Zhang, Richard

LeGates, Min Zhao, 2016-03-25 China's urbanization is one of the great earth-changing phenomena of recent times. The way in which China continues to urbanize will have a critical impact on the world economy, global climate change, international relations and a host of other critical issues. Understanding and responding to China's urbanization is of paramount importance to everyone. This book represents a unique exploration of the demographic, spatial, economic and social aspects of China's urban transformation. Based on years of fieldwork and data analysis from different types of cities and towns in every region of China, the authors present a detailed description of how China has urbanized since 1978 and an original theory about the way in which top-down and bottom-up policies have impacted urbanization. They describe China's ongoing urbanization process as a double transformation: from a planned economy to a more market-oriented one, and from a concern with the quantity to the quality of urbanization. In doing so, the authors provide the most comprehensive and up-to-

date book on Chinese urbanization to date This scholarly study will appeal to academics and practitioners including professors and postgraduate students of urban studies planning geography Asian studies and other social science disciplines and professional fields concerned with cities and urban development Professionals involved in international development particularly in China and elsewhere in Asia will be particularly interested in the book **The Geography of Serbia** Emilija Manić,Vladimir Nikitović,Predrag Djurović,2021-11-24 This is a comprehensive regional geography synthesis of the most important physical and human spatial processes that shaped Serbia and led to many interesting regional issues not only to Serbia but to the Balkans and Europe The book provides an overall view on the Serbian physical environment its population and economy It also highlights important regional issues such as regional disparities and depopulation sustainable development and ecological issues and rural economy in the context of rural area development which have been shaped by different political and historical processes This highly illustrated book provides interesting and informative insights into Serbia and its context within the Balkans and Europe It appeals to scientists and students as well as travelers and general readers interested in this region Population And Migration Trends In Eastern Europe Huey L Kostanick,2019-06-04 Eastern Europe is undergoing broad changes in demographic structure that have widened the ranges of population growth between countries and have created new problems of worker movement This book the result of a conference on demography and urbanization in Eastern Europe contains both broad theoretical and conceptual essays and specific analyses
