Regional Integrations In The New World Economic Environment:

Regional Integrations in the New World Economic Environment András Inotai, 1986 The Economics of Regional Integration Sándor Gyula Nagy, 2025-03-12 This book develops a new methodological framework for measuring the efficiency of regional integration and the integration profile of member states. It includes rich case studies which offer a comparative analysis of ten integrations spanning four continents: The Americas, the European Union, Africa, and Asia. The Economics of Regional Integration shows the importance of regional economic integration in the world economy based partially on descriptive analyses, the authors' new methodological framework, and a new composite index integration profile. It implements and quantifies relevant theories, e.g., integration maturity, competitiveness, economic development, convergence, to one framework and a composite indicator. This helps to arrive at a more precise measurement of these integrations, resulting in useful feedback for decision makers and leading to policy recommendations for each organisation to improve efficiency or to include new members. The text presents a comparative perspective of regional integration based on case studies by applying the same theoretical framework and a comprehensive methodology for assessing the economic readiness of membership-seeking countries while also considering regional differences. It investigates the impact of regional integration on income inequality and poverty reduction by examining how common development economic policies and social programs implemented by regional organizations affect the distribution of income and wealth among member states. The comprehensive investigation of regional integration covering economic, social, and institutional factors makes the book highly relevant for advanced students, researchers, and scholars. Additionally, its potential policy context application makes it useful for policymakers and practitioners participating in regional integration programs.

At the Crossroads of Development Behar, Cuzán, 2021-11-01 The 10 articles assembled in this volume examine old problems and new opportunities in development that are associated with trade, communication, population distribution, and migration, culture, and institutions. They explore possibilities for and obstacles to technological and institutional transfers between developed and developing societies at a time when capitalism and democracy appear triumphant. Points of convergence, parallel processes, and equivalences in social problems and potential solutions across levels of development are noted. They point out that the hierarchy of the world economic system and indigenous cultures militate against the homogenization of the globe along Western lines.

Asia-Pacific in the New World Order Christopher Brook, Anthony McGrew, 2013-11-05 Asia Pacific in the New World Order critically explores the notion that a distinctive regional power bloc is developing, linking countries bordering the Pacific with East Asia at its core. Historical narratives alongside geopolitical and geoeconomic perspectives are deployed to examine the shifting pattern of power relations and security structures across the region set within a wider

world context Key issues addressed include what are the primary security problems of the region and how are they being resolved does the dynamic growth of the region and particularly the rise of China pose a challenge to existing structures of world order The text has a strong interdisciplinary flavour drawing on analytical approaches from the international relations political economy and political geography literature Authors have been drawn from the Asia Pacific region and the UK and all are established scholars in their specialist fields **The Arab Maghreb Union** Mr.Mohamad Ali Finaish,Eric
