Regional Problems And Policies In Japan:

Regional Problems and Policies in Japan Organisation for Economic Co-operation and Development. Working Party on Regional Development Policies, 1996 The Politics of Regional Policy in Japan Richard J. Samuels, 2014-07-14 This is the first major study of politics and public administration in Japan to balance the prevailing view of the regional policy process from above with a view from below Developing a comparative framework for understanding the place of localities in policy making he demonstrates that relations among localities in Japan are much more important than previously supposed Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Dynamics Of Regional Innovation, The: Policy Challenges In Europe And Japan* Yveline Lecler, Tetsuo Yoshimoto, Takahiro Fujimoto, 2011-12-20 All over the world open innovation is emerging and requires much more interactions between different actors with different organizational cultures large firms and SMEs i e industry universities and research institutions i e academia as well as national and regional authorities for building the legal or incentive framework of innovation i e government Certainly flows of knowledge between these three spheres which are also known as the triple helix have always existed but what appears to be new in an open innovation environment is the overlapping of their missions In many areas such multi actor interactions with overlapping roles did not emerge spontaneously as was the case with the United States Based on robust cases studied by researchers and practical experiences of personnel involved in innovation at public or private institutions this book successively discusses the policy framework in Europe and Japan the new role for universities due to intellectual property reform or technology transfer promotion the new challenges for firms in terms of licensing patents corporate venturing including entrepreneurship incubation venture capital or cross industry knowledge sharing All issues addressed in this book are clearly those toward regional innovation policies and practices that are open in nature It contains descriptions and analysis of the various approaches taken by industrial governmental and academic players in various regions of Japan Tohoku Tokyo and Europe France Belgium The mix of theoretical and empirical material collected in this book was first presented at an international symposium in Tokyo The dynamics of regional innovation is an on going issue and we are still standing at the threshold of this field of research It is exactly why such a book is needed now Domestic Tourism in Asia Shalini Singh, 2009-06-30 Many countries have a rich tradition of domestic travel and holidaying which not only predates but exceeds mass international travel This is particularly the case in Asia where recent economic prosperity and trends in globalization have not merely spurred but continue to shape traditions in domestic tourism This book is the first to address specifically the

continuities and changes in domestic tourism in Asia It explores the ethos of domestic travel and holiday making in order to understand the distinctive common strands that underlie conventional and contemporary tourism practices against the local and global backdrop A considerable range of countries is covered in the case studies including those with patrimonial histories namely China and India the economically developed nation state of Japan and the microstates of Taiwan Singapore Macao and Hong Kong besides the coastal countries of Malaysia Philippines Laos and Vietnam as well as the land locked countries of Kyrgyzstan and Mongolia The book presents some of the many interfaces of Asian cultural and natural heritages with tourism while giving due considerations to today s political and economic realities
