Regional Trends 31 1996 Regional Trends 1996:

The UK Regional-National Economic Problem Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

Regional Identity and Behavior Max Sugar,2012-12-06 The author proposes that the four earliest British North American colonies in the United States promoted the development of distinct regional identities and that this cultural legacy affected identity development as well as behavioral patterns differently in each region He compares data from the North American colonies to the situation in England and discovers that the findings in the latter s eight standard regions are very similar to those in the United States

Housing Need and the Need for Housing Richard Fordham,Stephen Finlay,Justin Gardener,Angus Macmillan,Cecilia Muldoon,Geoff Taylor,Gary Welch,2019-05-23 First published in 1998 this book addresses a central issue in housing that of need and how to meet it Need refers either to individual household circumstances or to the aggregate requirement for new social and market housing The book develops a new policy mechanism to address the present fragmented policy situation The mechanism now used to allocate finance and new social housing numbers is complex and ineffective in terms of meeting needs The book s proposals are rooted in clear definitions of the key terms especially that of housing need which suffers from lack of any clear definition The analysis is developed using a large database of survey information covering England and Wales The proposed policy mechanism should be of great interest at a time when radical change to local government are being considered The proposed mechanism would greatly increase value for money of public time and expenditure on planning for social housing
