Contesting Spain? The Dynamics of Nationalist Movements in Catalonia and the Basque Country Richard Gillespie,Caroline Gray,2015-06-26 Contesting Spain The Dynamics of Nationalist Movements in Catalonia and the Basque Country offers an exploration of the dynamics behind contemporary shifts in the orientation of nationalist parties and movements with reference to Catalonia and the Basque country in Spain The chapters were originally papers presented at a workshop held at the Barcelona Centre for International Affairs CIDOB in September 2014 as part of a research project on The Dynamics of Nationalist Evolution in Contemporary Spain whose purpose was to gain a better understanding of why regionally based nationalist movements have experienced shifting relationships with the Spanish state over time in some periods appearing content with accommodation between central and regional government and at other times pushing to go beyond autonomist demands to seek sovereignty or even attain full independence The volume is one of the first to focus

comparatively on the rise of pro sovereignty politics in mainstream nationalist parties whose evolution has also featured more traditional impulses towards territorial accommodation within the wider state Using the exceptionally rich laboratory provided by Spain the book explores the dynamics behind shifts in the orientation of nationalist parties and movements once they have established themselves as electorally successful at regional level Dimensions to the analysis include the interaction of nationalist parties with central government pressures from their support bases competition between parties within the home region and international influences This title is innovative in bringing together experts with a range of disciplinary approaches primarily political scientists but also historians and scholars located at the cusp between social sciences and humanities

Routledge Handbook of Regionalism & Federalism John Loughlin, John Kincaid, Wilfried Swenden, 2013-07-18 Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive

The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions. Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance. The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism: the EU, NAFTA and the African Union. Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars, this work will be an essential reference source for all students and scholars of international politics, comparative politics and international relations.

Party Families in Western Europe

Peter Egge Langsæther, 2023-07-21. This comprehensive and comparative book makes clear what party families are and in doing so helps categorise and make sense of parties in different countries. It describes the ideology of the families in Western Europe as well as classifying political parties accordingly. Furthermore, the book examines who the party families' supporters are in terms of their social background and political values. What role do class, education and religion play in the 21st century? Finally, the book provides a discussion of the degree to which the concept of party families is still meaningful in the 21st century and how it needs to be studied comparatively and comprehensively. Is party family still valid as a conceptual device to classify and compare parties across countries in Western Europe? This text will be of key interest to scholars, students and practitioners working in the field of political behaviour, political parties and party politics, policy studies and more broadly comparative and European politics.

Political Strategy and Ideological Adaptation in Regionalist Parties in Western Europe

Emanuele Massetti, 2010. The aim of the thesis is to contribute to the growing comparative literature on regionalist parties in Western Europe, focusing on strategy and ideology. The research questions correspond to the three ideological dimensions: domains which are taken into consideration: centre, periphery, left, right and European integration, as well as to the links amongst such dimensions: domains. Why are some regionalist parties more moderate (i.e. autonomists) while others are more radical (i.e. secessionists)? Why do some regionalist parties position themselves to the left while others position themselves to the right? Why are some regionalist parties pro-integration while others are against? Are there relationships between regionalist parties' positions across the diverse ideological dimensions? The analytical framework brings together sociological theories of political alignments with theories of party competition and theories of party change. The empirical section is made up of a comparison of four case studies: LN, PC, SVP and SNP, which are analysed in depth, plus a final chapter that includes the most important regionalist parties in Western Europe. Data are gathered through interviews with prominent party members, party documents, primarily manifestos, election studies and secondary sources. In brief, in the conclusions, it is argued that regions that have been independent states in the past and regions with concentrated ethno-linguistic minorities tend to produce more radical parties on the centre-periphery dimension. Competition between regionalist parties acting in the same region also increases radicalism. Working-class regions tend to produce leftist regionalist parties while bourgeois

regions tend to produce rightist regionalist parties positioning on European integration depends mainly on the compatibility of the selfgovernment project with the process of European integration and on parties satisfaction with the policy output of the state vis a vis that of the EU only weak relationships can be discerned between centre periphery and left right positioning and between centre periphery and European integration A stronger relationship is apparent between left right and European integration positioning *New Challenges for Stateless Nationalist and Regionalist Parties* Eve Hepburn,2013-10-18
