Regionalization Labor Market Interdepe:

Regionalization and Labour Market Interdependence in East and Southeast Asia Duncan Campbell, Asma Lateef, Aurelio Parisotto, Anil Verma, 2016-01-06 How can we account for the dynamic growth of East and Southeast Asian countries Much of the debate has turned on the question of the state versus the market as exclusive and often competing explanations of the successful performance of individual countries This book explores the distinctively interdependent nature of the East and Southeast Asian experience As firms create a regional organization of production the growing interdependence of national labour markets is one major outcome

Globalisation, Regionalism and Economic Interdependence Filippo di Mauro, Stéphane Dees, Warwick J. McKibbin, 2008 An assessment of the extent to which increased global and regional integration has changed the functioning of the world economy With contributions from both academics and professionals it analyses the implications for global trade relocation of production structural changes and the international transmission of shocks

Asian Migrations Beatriz P. Lorente, 2005 The migration of people within and beyond Asia no longer takes the form of permanent ruptures uprooting and resettlement Today such movement is more likely to be transient and complex ridden with disruptions and detours and based on translocal interconnections between places and multiple chains of movement Written from various disciplinary perspectives this collection of essays explores the migration experiences of a wide spectrum of people from professional and managerial elites to contract workers and refugees In addressing the nature of these Asian migrations the authors demonstrate how mobility in today s world has transformed notions of citizenship and identity and of displacement and home

The Operation of Internal Labor Markets Lawrence T. Pinfield, 2013-11-22 Employment systems consist of complex arrays of formal and informal rules that structure the relationships between employees and employers There are many different types of employment systems Some are specified in considerable detail in collectively bargained quasilegal employment contracts while others are left to discretion This book describes the latter type of employment system one in which there is an active market for knowl edge and skills This is the salaried employment system of ForestCo a large multiplant manufacturing company in the forest products industry Here supervisors and managers actively adjust the jobs and persons under their authority to meet the market social and institutional forces that influence the activities and performance of their departments The study of employment systems is a relatively recent phenomenon and few prior studies or theories were found to guide this investigation Neither the scope nor the components of employment system studies are yet established The field is confused and contested Nevertheless there is related literature which can be used to focus attention on different features of employment systems One emerging body of work that holds the most promise for the study of employment systems is internal labor market ILM theory

Globalization of Labour Markets Olga Memedovic, A.

Kuyvenhoven, Willem T.M. Molle, 2013-03-11 To the classical driving forces of migration such as poverty oppression and war yet another is being added globalization With the increasing economic interdependence between countries migration has become one of the important links Many less developed countries LDCs accept migration of their workers to developed countries DCs because it reduces the pressure on unemployment and remittances increase the capital inflow to the country On the other hand some of the DCs see migration as a threat to their employment and system of social security Participants of the Second Annual Workshop of the Network EU LDC Trade and Capital Relations gave a broad view of the problem which both DCs and LDCs are facing in connection with the globalization of labour markets This volume consists of 10 chapters by scholars from the European Union EU and LDCs Each paper is discussed in terms of its policy relevance by a policy maker as well as by an academic specializing in the field In the opening chapter we aim to do justice to the discussion during the Workshop in Rotterdam in May 1995 at which preliminary versions of all chapters were presented Edited versions of the interventions by the policy makers and experts are included as far as possible after the chapters The opinions expressed in this volume are those of the authors and not necessarily those of their organizations **International Labour Review**, 1998 **Regionalism, Multilateralism, and the Politics of Global Trade** Donald Barry, Ronald C. Keith, 1999 The essays in this volume reflect the current debate about whether the new regionalism and interregional politics of the last decade support or undermine the global trading system Political scientists and international relations scholars from North America examine the changing relationship between regionalism and multilateralism and discuss the implications for national policy in the globalized economy The essays are arranged into four categories covering regionalism globalism and the state the dynamics of regional integration interregional relations and the policy implications particularly for Canada Annotation copyrighted by Book News Inc Portland OR *Testing Global Interdependence* Natalia E. Dinello, Ernest Aryeetey, 2007-01-01 While many countries may embrace globalization at the conceptual level the specifics of implementation vary greatly from country to country This book includes diverse narratives which suggest how to limit globalization's negative aspects and ensure constructive engagement in the global community *Comparative Regionalism* Fred H. Lawson, 2017-03-02 Regionalism has regained momentum in the post Cold War era New economic groupings continue to spring up across the globe while older regional organizations have strengthened their institutional bases and broadened their scope Explaining the reinvigoration of regionalism requires comparative analyses that not only highlight the commonalities that characterize various regional experiments but also account for the differential outcomes and divergent trajectories such projects exhibit This collection of seminal articles on regionalism advances theoretical concepts that can stimulate useful comparisons along with scholarly surveys of important instances of regionalism in the contemporary world Besides classic studies of the European Union the volume includes authoritative overviews and case studies of regionalist projects in East Asia Sub Saharan Africa Latin America the Middle East and Central Eurasia An introductory essay situates these articles in

the context of the five decade long research program on regional integration theory

The Oxford Handbook of Comparative Regionalism Tanja A. Labor Markets and Social Security John T. Addison, Paul J.J. Welfens, 2013-03-09 John T Addison and Paul J J Welfens Because inflation seems moribund in OECD countries stubborn unemployment became the top policy priority of the 1990s

Unemployment has increased in many countries reaching critical levels for unskilled and young workers in most continental EU countries Europe's employment performance has continued to lag that in North America The U S in particular achieved a remarkable combination of low inflation and full employment in the late 1990s at a time when the EU suffered from record unemployment rates even if inflation was remarkably low Since the 1980s the consensus view among economists is that structural unemployment plays a much more important role than cyclical unemployment in Europe but that labour costs wage costs plus nonwage costs are also part of Europe's labour market problem Most EU countries rely on a pay as you go public pension system Contribution rates gradually increased in the 1980s and 1990s when the share of young workers in overall employment was declining and life expectancy increasing Rising nonwage costs from the pension system are but one important feature of labour markets in Europe Given the remarkable dynamics of labour markets new entry into the labour force labour turnover and changes in employment characteristics one has to also search for other factors behind sustained unemployment High unemployment is critical for EU countries where one can point to relatively few positive developments after 1975 The U K

North American Regionalism and Global Spread I. Hussain, R. Dominguez, 2015-02-19 Was the 1993 North American Free Trade Agreement NAFTA designed as a definitive trade agreement or as a stepping stone This book reviews NAFTA's performances on trade investment intellectual property rights dispute settlement as well as environmental and labor side agreements within a theoretical construct

Foreign Policy and Interdependence in Gaullist France Edward Morse, 2015-03-08 French foreign policy in the 1960s seemed unique because it was dominated by the anachronistic ideals of Charles de Gaulle Edward L Morse argues that in fact the foreign policies of all highly modernized states are so similar that they can be described and explained by a general theory of interdependence He uses France as a case study of his theory and shows that what makes French foreign policy in this period so fascinating is the way in which the behavior of the President brought into sharp focus the problems interdependence poses for nation states The book is divided into two parts The first develops the theory of the conduct of foreign policy in any highly modernized society The second part tests the theory by examining such characteristics of French foreign policy as the erosion of the distinction between foreign and domestic affairs the constraints put on foreign policy by the growth of international economic interdependence which has also affected the autonomy of decision making in a purely national context the increased importance of foreign economic policy the questioning of governmental priorities in foreign affairs and the emergence of crisis management and manipulation as part of the routine procedures of foreign policy operations Edward L Morse's work is valuable both for the theory it offers and because it gives a balanced view of foreign policy in an important period in recent French history Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of

the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Regionalism and Rivalry Jeffrey A. Frankel, Miles Kahler, 2007-12-01 As Japan's newfound economic power leads to increased political power there is concern that Japan may be turning East Asia into a regional economic bloc to rival the U S and Europe In *Regionalism and Rivalry* leading economists and political scientists address this concern by looking at three central questions Is Japan forming a trading bloc in Pacific Asia Does Japan use foreign direct investment in Southeast Asia to achieve national goals Does Japan possess the leadership qualities necessary for a nation assuming greater political responsibility in international affairs The authors contend that although intraregional trade in East Asia is growing rapidly a trade bloc is not necessarily forming They show that the trade increase can be explained entirely by factors independent of discriminatory trading arrangements such as the rapid growth of East Asian economies Other chapters look in detail at cases of Japanese direct investment in Southeast Asia and find little evidence of attempts by Japan to use the power of its multinational corporations for political purposes A third group of papers attempt to gauge Japan's leadership characteristics They focus on Japan's technology ideology its contributions to international public goods international monetary cooperation and economic liberalization in East Asia

Beyond Borders: The New Regionalism in Latin America Inter-American Development Bank, 2002-10-10 Although regional integration initiatives have a long history in the world economy these efforts have expanded significantly since the 1990s In Latin America and the Caribbean a wave of regional integration initiatives has included free trade areas customs unions and steps towards common markets The emergence of this new regionalism of trade in which global and regional forces complement one another has been driven by such factors as the opening up of economies and structural reforms This year's edition of *Economic and Social Progress in Latin America* explores the dimensions of integration macroeconomic coordination and the effects of regional integration on productivity market access foreign direct investment infrastructure and income inequality Topics include subregional integration schemes the multilateral trade agenda launched in Doha initiatives such as the Free Trade Area of the Americas and interregional agreements with the European Union
