Arctic Ecosystems in a Changing Climate

F. Stuart Chapin III, Robert L. Jefferies, James F. Reynolds, Gaius R. Shaver, Josef Svoboda, Ellen W. Chu, 2012-12-02 The arctic region is predicted to experience the earliest and most pronounced global warming response to human induced climatic change This book synthesizes information on the physiological ecology of arctic plants discusses how physiological processes influence ecosystem processes and explores how climate warming will affect arctic plants plant communities and ecosystem processes Reviews the physiological ecology of arctic plants Explores biotic controls over community and ecosystems processes Provides physiological bases for predicting how the Arctic will respond to global climate change

Animals' Influence on the Landscape and Ecological Importance Friedrich-Karl Holtmeier, 2014-10-22 In its first English language edition this book introduces the many faceted interactions of animal populations with their habitats From soil fauna ants and termites to small and large herbivores burrowing mammals and birds the author presents a comprehensive analysis of animals and ecosystems that is as broad and varied as all nature Chapter 2 addresses the functional role of animals in landscape ecosystems emphasizing fluxes of energy and matter within and between ecosystems and the effects of animals on qualitative and structural habitat change Discussion includes chapters on the role of animal population density and the impacts of native herbivores on vegetation and habitats from the tropics to the polar regions Cyclic mass outbreaks of species such as the larch bud moth in Switzerland the mountain pine beetle and the African red billed weaver bird are described and analyzed Other chapters discuss Zoochory the dispersal of seeds by ants mammals and birds and the influence of burrowing animals on soil development and geomorphology Consideration extends to the impact of feral domestic animals Chapter 5 focuses on problems resulting from introduction of alien animals and from re introduction of animal species to their original habitats discusses the effects on ecosystems of burrowing digging and trampling by animals The author also addresses keystone species such as kangaroo rats termites and beavers Chapter 6 addresses the role of animals in landscape management and nature conservation with chapters on the impact of newcomer species such as animals introduced into Australia New Zealand and Europe and the consequences of reintroduction of species to original habitat It also discusses the carrying capacity of natural habitat public attitudes toward conservation and more The final section ponders the effects of climate on interactions

between animals and their habitats *Wildlife Production Systems* Robert J. Hudson, K. R. Drew, L. M. Baskin, 1989-06 This book first published in 1989 examines the controversial position of commercial utilisation in relation to wildlife conservation Production of large mammals has earned respectability as an agricultural strategy and its evaluation has been listed as a priority requirement in the World Conservation Strategy However many authorities question whether wildlife production is a viable economic and environmental strategy and suggest that it runs counter to its claimed purpose This book evaluates this controversy by chronicling the changing role of wildlife and by reflecting on the implications of these trends The book should be of interest to people both applauding and deploring the use of wildlife in this economic role *Decolonial Sweden* Michael McEachrane, Louis Faye, 2024-12-16 Decolonial Sweden exposes the social and political relevance of European colonialism to Sweden and its place in the world It is a book that points to why and how Sweden is to be included in global decolonial struggles Sweden is often displayed as an ethnoracially homogenous country without any colonial history an open and tolerant human rights champion anti racist anti colonial and in solidarity with the Global South For over twenty years authors Michael McEachrane and Louis Faye have been challenging this account pointing to Sweden's involvement in colonial histories and legacies its racialized nationhood and embedded colonial structures This important new book reflects a decolonial turn in research emphasizing that coloniality is far from over and that challenging global injustices remains an unfinished and open ended process Chapters in the book consider the resistance of the Sami people to Swedish colonialism whether Sweden owes the Caribbean reparations for its colonization of Saint Barthélemy and involvement in the transatlantic trade Sweden's involvement in a colonial global economy and how white European identification is embedded in Swedish politics nation building and society Engaging and insightful Decolonial Sweden invites readers to reconsider Swedish attitudes toward race colonialism and international relations This book is an essential read for Post and Decolonial scholars and students of Critical Race Studies Critical Indigenous Studies Africana Studies International Relations Global Development and Political Science as well as for anyone interested in Sweden's place in the world **Nordic Perspectives on the Responsible Development of the Arctic: Pathways to Action** Douglas C. Nord, 2020-10-30 This book investigates the multifaceted nature of change in today's Nordic Arctic and the necessary research and policy development required to address the challenges and opportunities currently faced by this region It focuses its attention on the recent efforts of the Nordic community to create specialized Centers of Excellence in Arctic Research in order to facilitate this process of scientific inquiry and policy articulation The volume seeks to describe both the steps that lead to this decision and the manner in which this undertaking has evolved The work highlights the research efforts of the four Centers and their investigations of a variety of issues including those related to ecosystem and wildlife management the revitalization resource dependent communities the emergence of new climate born diseases and the development of adequate modeling techniques to assist northern communities in their efforts at adaptation and resilience building Major discoveries and insights arising

from these and other efforts are detailed and possible policy implications considered The book also focuses attention on the challenges of creating and supporting multidisciplinary teams of researchers to investigate such concerns and the methods and means for facilitating their collaboration and the integration of their findings to form new and useful perspectives on the nature of change in the contemporary Arctic It also provides helpful consideration and examples of how local and indigenous communities can be engaged in the co production of knowledge regarding the region The volume discusses how such research findings can be best communicated and shared between scientists policymakers and northern residents It considers the challenges of building common concern not just among different research disciplines but also between bureaucracies and the public Only when this bridge building effort is undertaken can true pathways to action be established Cultivating Arctic Landscapes David George Anderson, David G. Anderson, Mark Nuttall, 2004 In the last two decades there has been an increased awareness of the traditions and issues that link aboriginal people across the circumpolar North One of the key aspects of the lives of circumpolar peoples be they in Scandinavia Alaska Russia or Canada is their relationship to the wild animals that support them Although divided for most of the 20th Century by various national trading blocks and the Cold War aboriginal people in each region share common stories about the various capitalist and socialist states that claimed control over their lands and animals Now aboriginal peoples throughout the region are reclaiming their rights This volume is the first to give a well rounded portrait of wildlife management aboriginal rights and politics in the circumpolar north The book reveals unexpected continuities between socialist and capitalist ecological styles as well as addressing the problems facing a new era of cultural exchanges between aboriginal peoples in each region **Equity and the Environment** Robert C. Wilkinson, William R. Freudenburg, 2007-12-12 Soon after the first Earth Day in 1970 the academic world saw a virtual explosion of new interdisciplinary environmental programs many of which took explicit note for the first time of the fact that environmental problems are inherently social problems as well Even in the new programs however issues of equity and the environment were usually relegated to isolated classes on environmental ethics Today they still are **Values and Resource Analysis** National Petroleum Reserve in Alaska Task Force (U.S.), 1978 *Wildlife Review*, 1970 Wildlife Abstracts U.S. Fish and Wildlife Service, 1954 **Issues and Concepts in Historical Ecology** Carole L. Crumley, Tommy Lennartsson, Anna Westin, 2018 This book presents a practical holistic research framework to help us both understand our past and build an appealing human future *Reindeer Husbandry and Global Environmental Change* Tim Horstkotte, Øystein Holand, Jouko Kumpula, Jon Moen, 2022-04-20 This volume offers a holistic understanding of the environmental and societal challenges that affect reindeer husbandry in Fennoscandia today Reindeer husbandry is a livelihood with a long traditional heritage and cultural importance Like many other pastoral societies reindeer herders are confronted with significant challenges Covering Norway Sweden and Finland three countries with many differences and similarities this volume examines how reindeer husbandry is affected by and responds to global environmental change and

resource extraction in boreal and arctic social ecological systems Beginning with an historical overview of reindeer husbandry the volume analyses the realities of the present from different perspectives and disciplines Genetics behavioural ecology of reindeer other forms of land use pastoralists norms and knowledge bio economy and governance structures all set the stage for the complex internal and externally imposed dynamics within reindeer husbandry In depth analyses are devoted to particularly urgent challenges such as land use conflicts climate change and predation identified as having a high potential to shape the future pathways of the pastoral identity and productivity These futures with their risks and opportunities are explored in the final section offering a synthesis of the comparative approach between the three countries that runs as a recurring theme through the book With its richness and depth this volume contributes significantly to the understanding of the substantial impacts on pastoralist communities in northernmost Europe today while highlighting viable pathways to maintaining reindeer husbandry for the future This book will be of great interest to students and scholars of both the natural and social sciences who work on natural resource management global environmental change pastoralism ecology social ecological systems rangeland management and Indigenous studies The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

CONTESTED ARCTIC (p), 1997 **Indigenous Peoples' Cultural Heritage** Alexandra Xanthaki, Sanna Valkonen, Leena Heinämäki, Piia Kristiina Nuorgam, 2017-10-17 Indigenous rights to heritage have only recently become the subject of academic scholarship This collection aims to fill that gap by offering the fruits of a unique conference on this topic organised by the University of Lapland with the help of the Office of the High Commissioner for Human Rights The conference made clear that important information on Indigenous cultural heritage has remained unexplored or has not been adequately linked with specific actors such as WIPO or specific issues such as free prior and informed consent Indigenous leaders explained the impact that disrespect of their cultural heritage has had on their identity well being and development Experts in social sciences explained the intricacies of indigenous cultural heritage Human rights scholars talked about the inability of current international law to fully address the injustices towards indigenous communities Representatives of International organisations discussed new positive developments This wealth of experiences materials ideas and knowledge is contained in this important volume **Values and Resources Analysis** National Petroleum Reserve in Alaska Task Force (U.S.), 1978 **Plant Ecology, Herbivory, and Human Impact in Nordic Mountain Birch Forests** Frans E. Wielgolaski, 2006-01-12 This work analyzes vegetation and soils and investigates the influence of climate change insect pests grazing pressure by sheep and reindeer construction of roads and other consequences of increasing tourism in the Nordic mountain birch forests **Resilience Through Knowledge Co-Production** Marie Roué, Douglas Nakashima, Igor Krupnik, 2022-06-30 Collaborative exploration of global environmental crises focusing on the co production of knowledge from scientific indigenous sources
