Relational Epistemologies:

Philosophical Foundations of Mixed Methods Research Yafeng Shan, 2023-12-01 Philosophical Foundations of Mixed Methods Research provides a comprehensive examination of the philosophical foundations of mixed methods research. It offers new defences of the seven main approaches to mixed methods: the pragmatist approach, the transformative approach, the indigenous approach, the dialectical approach, the dialectical pluralist approach, the performative approach, and the realist approach, written by leading mixed methods researchers. Each approach is accompanied by critical reflections from a philosopher's point of view. The book shows the value of the use of mixed methods from a philosophical point of view and offers a systematic and critical examination of these positions and approaches from a philosophical point of view. The volume also offers a platform to promote a dialogue between mixed methods researchers and philosophers of science and provides foundations for further research and teaching of this hotly debated topic. This volume is ideal for researchers and advanced students and anyone who is interested in research methods and the social sciences more generally.

Decentering Epistemologies and Challenging Privilege Sophie Bourgault, Maggie FitzGerald, Fiona Robinson, 2024 Care ethics first emerged as an attempt to decenter ethics. Feminist scholars like Carol Gilligan argued that women's moral experiences were not reflected in the dominant masculinist approaches to ethics, which were centered on a rational, disembodied, atomistic moral subject. Care ethics challenged this model by positing ethics as relational, contextualized, embodied, and realized through practices rather than principles. Over the past decades, many care ethics scholars have sought to further this project by considering care politically and epistemologically in relation to various intersecting hierarchies of power and knowledge. This book advances this project by discussing the ways care ethics contributes to the decentering of dominant epistemologies and to the challenging of privilege, and by considering how to decenter care ethics itself via an encounter with non-Western philosophical traditions and alternative epistemologies. Written by scholars from different countries, disciplines, and intellectual traditions, the volume offers original care ethics contributions on epistemic injustice, privileged irresponsibility, ecofeminism, settler colonialism, social movements such as BLM, and various racialized and gendered inequities tied to care work.

Theory and Practice of Dialogical Community Development Peter Westoby, Gerard Dowling, 2013-07-18 This book proposes that community development has been increasingly influenced and co-opted by a modernist soulless rational philosophy reducing it to a shallow technique for solving community problems In contrast this dialogical approach re-maps the ground of community development practice within a frame of ideas such as dialogue hospitality and depth For the first time community development practitioners are provided with an accessible understanding of dialogue and its relevance to their practice exploring the contributions of internationally significant thinkers such as P Freire M Buber D Bohm and H G Gadamer J Derrida G Esteva and R Sennett What makes the book distinctive is that first it identifies a dialogical tradition of community development and considers how such a tradition shapes practice within contemporary contexts and concerns economic social political cultural and ecological Second the book contrasts such an approach with technical and instrumental approaches to development that fail to take complex systems seriously Third the approach links theory to practice through a combination of storytelling and theory reflection ensuring that readers are drawn into a practice theory that they feel increasingly confident has been tried and tested in the world over the past 25 years
