The Christian Belief in God in Relation to Religion and Philosophy Alfred Ernest Garvie, 1933

Popular Religion and Liberation Michael R. Candelaria, 1990-07-10 Liberation theologians either argue for the liberating character of popular religion or they vilify it as

alienating and otherworldly This book takes a comprehensive and in depth look at the issues questions and problems that emerge from the debate among liberation theologians in Latin America The heart of the book consists of a comparative analysis of two prominent theologians Juan Carlos Scannone from Argentina and Juan Luis Segundo from Uruguay who take opposite positions Scannone sees popular religion as essentially liberating because it is from the people Segundo disparages popular religion as a mass phenomenon incapable of revolutionary change and looks forward to its demise Candelaria synthesizes these contrary positions into a new paradigm for examining the question of popular religion and liberation On the basis of this synthesis he formulates a principle for articulating the relationship between popular religion and liberation and with special reference to the situation of Hispanics in the United States Politics of Religion in Western Europe François Foret,Xabier Itçaina,2013-06-17 Religion is becoming increasingly important to the study of political science and to re examine key concepts such as democracy securitization foreign policy analysis and international relations The secularization of Europe is often understood according to the concept of multiple modernities the idea that there may be several roads to modernity which do not all mean the eradication of religion This framework provides support for the view that different traditions societies and groups can come to terms with the components of modernity capitalism democracy human rights science and reason while keeping in touch with their religious background faith and practice Contributors examine the interaction between EU integration processes and Western European countries such as Belgium France Luxembourg Austria Scandinavia Italy and the UK and shine fresh light on the economic and cultural contexts brought about by relationships between politics and religion including immigrant religions and new religious movements This volume combines theoretical perspectives from political sociology and international relations to consider the role of religion as a source of power identity and ethics in institutions and societies Politics of Religion in Western Europe will be of interest to scholars of politics religion the European Union and political sociology **Religion and Dialogue in the City** Julia Ipgrave,Thorsten Knauth,Anna Körs,Dörthe Vieregge,Marie von der Lippe,2018 Urban spaces throughout Europe are increasingly characterised by a mixture of different religions and worldviews Being home to a wide range of religious and non religious groups and individuals does not mean that cities are automatically also spaces of interreligious and interfaith encounters Whether a city is a venue for interreligious encounter and dialogue or merely a place where various religions and worldviews exist side by side is a central question for the continuing social cohesion of modern societies This volume presents selected findings of the international research project Religion and Dialogue in Modern Societies ReDi which investigated dialogical practice in the five metropolitan cities Oslo Stockholm London Hamburg and Duisburg It offers a range of case studies addressing two fields of activity dialogue and interreligious encounters in the urban space and dialogue in education **Routledge Handbook of Religion and Politics , Religion and Democratizations** Jeffrey Haynes,2013-09-13 This book examines key debates on religion and democratization from three main perspectives Religious traditions have core elements which are more or less

conducive to democratization and democracy Religious traditions may be multi vocal but at any moment there may be dominant voices more or less receptive to and encouraging of democratization Religious actors rarely if ever determine democratization outcomes However they may in various ways and with a range of outcomes be of significance for democratization The contributions are divided into two sections 1 Religion democratization and democracy and 2 Secularization democratization and democracy Overall they examine the three assertions in the bullet points above The book's starting point is that in general around the world religions have left their assigned place in the private sphere This means they have in many cases become recognisably politically active in various ways and with assorted outcomes This re emergence from political marginality dates back until at least the 1980s At that time the US sociologist Jose Casanova noted that what was new and became news was the widespread and simultaneous refusal of religions to be restricted to the private sphere This involved a remodelling and re assumption of public roles by religion which theories of secularisation had long condemned to social and political marginalisation This book was published as a special issue of Democratization
