Relativism In The Arts:

Relativism in the Arts Betty Jean Craige, 1983-01-01 Relativism in the Arts Betty Jean Craige, 2010-12-01 In a world where the acceptance of relativism has caused erosion in the tradition of Cartesian dualism representationalism in the arts has come under serious questioning The contributors to this book seek new standards for defining and evaluating works of art Relativism in the Arts brings together thinkers in the fields of music art criticism literary criticism philosophy and the history of consciousness to confront the problems of relativist aesthetics Their essays range from theoretical discussions of the definition of art in our times to close examinations of particular artworks or art forms The introduction by Betty Jean Craige presents reasons for the cultural self reflectivity that gives rise to the peculiarities of modern art **Explanation and Value in the Arts** Salim Kemal, Ivan Gaskell, 1993-04-15 An interdisciplinary study of explanation and the construction of value regarding works of literature and painting **The Oxford Handbook of Ethics and Art** James Harold, 2023 Art has not always had the same salience in philosophical discussions of ethics that many other elements of our lives have There are well defined areas of applied ethics corresponding to nature business health care war punishment animals and more but there is no recognized research program in applied ethics of the arts or art ethics Art often seems to belong to its own sphere of value separate from morality The first questions we ask about art are usually not about its moral rightness or virtue but about its beauty or originality However it is impossible to do any serious thinking about the arts without engaging in ethical questions The Routledge Companion to Research in the Arts Michael Biggs, Henrik Karlsson, 2010-10-04 The Routledge Companion to Research in the Arts is a major collection of new writings on research in the creative and performing arts by leading authorities from around the world It provides theoretical and practical approaches to identifying structuring and resolving some of the key issues in the debate about the nature of research in the arts which have surfaced during the establishment of this subject over the last decade Contributions are located in the contemporary intellectual environment of research in the arts and more widely in the universities in the strategic and political environment of national research funding and in the international environment of trans national cooperation and communication The book is divided into three principal sections Foundations Voices and Contexts each with an introduction from the editors highlighting the main issues agreements and debates in each section The Routledge Companion to Research in the Arts addresses a wide variety of concepts and issues including the diversity of views on what constitutes arts based research and scholarship what it should be and its potential contribution the trans national communication difficulties arising from terminological and ontological differences in arts based research traditional and non traditional concepts of knowledge their relationship to professional practice and their outcomes and audiences a consideration of the role of written spoken and artefact based languages in the formation and communication of understandings This comprehensive collection makes an original and significant contribution to the field of arts based research by setting down a framework for addressing these and other topical issues It

will be essential reading for research managers and policy makers in research councils and universities as well as individual researchers research supervisors and doctoral candidates

Evangelicals and the Arts in Fiction John Weaver, 2013-04-19 This book is an exploration of how the relationship of evangelicals to the arts has been portrayed in fiction for the last century The author argues that evangelicals are consistently seen as enemies of the arts by non evangelical writers The artist typically represented by a literal artist occasionally by a scientist or reluctant messiah typically has to fight for liberation from such cliched character types as the failed evangelical artist the rube or the hypocritical pastor Rather than resist the cliché of anti art evangelicalism the book contends that evangelicals should embrace it this stereotype is only hurtful so long as one assumes that the arts represent a positive force in human society This work built off the scholarship of John Carey does not make that assumption Surveying the current pro artistic views of most evangelicals the author advances the argument that evangelicals need to return to their anti art roots By doing so they would align themselves with the most radical artistic elements of modernism rather than with the classicists that the movement currently seems to prefer and provide space for themselves to critique how secular artistic stereotypes of evangelicals have economically and artistically marginalized the evangelicals community

Comparativism in Art History Jas Elsner, 2017-07-05 Featuring some of the major voices in the world of art history this volume explores the methodological aspects of comparison in the historiography of the discipline The chapters assess the strengths and weaknesses of comparative practice in the history of art and consider the larger issue of the place of comparative in how art history may develop in the future The contributors represent a comprehensive range of period and geographic command

from antiquity to modernity from China and Islam to Europe from various forms of art history to archaeology anthropology and material culture studies Art history is less a single discipline than a series of divergent scholarly fields in very different historical geographic and cultural contexts but all with a visual emphasis on the close examination of objects These fields focus on different often incompatible temporal and cultural contexts yet nonetheless they regard themselves as one coherent discipline namely the history of art There are substantive problems in how the sub fields within the broad brush generalization called art history can speak coherently to each other These are more urgent since the shift from an art history centered on the western tradition to one that is consciously global

The Value of Art and the Value of Love. Moral Relativism, Nietzschean Perspectivism and Questions of Authenticity Sabine Mercer, 2018-03-21 Research Paper postgraduate from the year 2006 in the subject Didactics for the subject English Literature Works grade 1 5 James Cook University course Honours language English abstract Set in the art world of the early nineteen eighties the elements Theft and Love abound in a turbulent adventure of pretence and deceit deftly written in a genre mix of crime story romance fictional K nstlerroman and fictional memoir with traces of biographical data from the author This essay examines Peter Carey s novel Theft A Love Story from the aspect of a particular depiction of Truth and Lies in a Postmodern Sense which I intend as a pun on Nietzsche s essay On Truth and Lies in a Nonmoral Sense Moreover I seek to apply Nietzsche s epistemic thesis of perspectivism according to which any act of understanding depends on the dispositions and biases built into the perspective out of which it was made Perspectivism is a useful theory that can be applied to examine the motivation of many characters in Theft The novel is preoccupied with dishonest dealings in which the concept of theft pervades throughout and even intrudes into the world of private relationships it shows morals being no longer conditioned by any commonly held universal truths such as good or bad right or wrong Instead all moral categorical imperatives have lost their absolute meaning and are shown to have been subsumed under various relative points of view a subjective preference of each individual features that seem to have become characteristic of postmodern society The main characters in the novel exhibit a moral relativism that goes against the Kantian maxim that each person should be treated as an end never as a mere means to our ends Moral relativism and the perspective of a wounded ego of a divorcee might even show to be the author s emotional dilemma with which he faces his own ethical problem in the book there frequently emerge difficulties for readers not only in deciding which characters are actually fictional but also how many autobiographical references can be detected if the reader assumes that the protagonist with his bitterness for his ex wife might be set up as an alter ego figure

Undoing the Visual Arts Since 1960 Adrian Lewis, 2025-10-06 This timely study critically assesses each of the various presuppositions that led to how we got to where we are today Contemporary art has replaced the notion of artistic medium with a semiotic model of communication treating art as text open in its reading The dumping of the notion of artistic medium cancels aesthetic depth and undermines even relative expressive determinacy Marcel Duchamp privileged the play of mind over the simply visual Minimalism and Pop Art set their faces against the place of personalised life experience and expressive formation in art making Andy Warhol's work threw up the so called institutional theory of art whatever the artworld calls art is art Art's academisation brought in entirely inappropriate models of knowledge creation and then art became issue based Art was curatorially patronised to fit a woke ideological agenda The incredible accord between institutional power artworld theorising the media and the art economy made contemporary art immune from criticism the undoing of visual art was complete

[Social Theories of Art](#) Ian Heywood, 1997 This book offers a critical examination of influential social theories of art that points to the poverty of much contemporary art theory including that of the New Art History and its deconstructionist critics and the important but underacknowledged ethical implications of theorizing Heywood writes clearly and illuminatingly about the problematic relationship between the seminar and the studio theory and practice his findings will be of interest and relevance to students of sociology art history fine art philosophy and cultural studies

A History of Art History Christopher S. Wood, 2021-03-02 In this authoritative book the first of its kind in English Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history Synthesizing and assessing a vast array of writings episodes and personalities this original and accessible account of the development of art historical thinking will appeal to readers both inside and outside the discipline The book shows that the pioneering chroniclers of the Italian Renaissance Lorenzo Ghiberti and Giorgio Vasari measured every epoch against fixed standards of quality Only in the Romantic era did art historians discover the virtues of medieval art anticipating the relativism of the later nineteenth century when art history learned to admire the art of all societies and to value every work as an index of its times The major art historians of the modern era however Jacob Burckhardt Aby Warburg Heinrich Wölfflin Erwin Panofsky Meyer Schapiro and Ernst Gombrich

struggled to adapt their work to the rupture of artistic modernism leading to the current predicaments of the discipline
Combining erudition with clarity this book makes a landmark contribution to the understanding of art history from book
