difficult even if you've tried all manner of things with little or no success. In fact, it is easier than you think. Clinical studies have shown that hypnosis has up to 95% effectiveness in facilitating weight loss even for people with health problems like diabetes. Findings of review research published on WebMD show that meditation does help with dealing with the root causes of weight gain: stress, binge eating, emotional eating, overeating, portion control, and much more. This is to show that incorporating hypnosis, meditation, and affirmations could result in rapid, sustainable weight loss without trying too hard. I know you are wondering: How exactly does meditation, hypnosis, affirmations, and other practices help with weight loss? What do they have to do with motivation and self-esteem? How do you make the most use of these techniques to bring about the much-needed result? Where do you even start? If you have these and other related questions, this book is for you, so keep reading as it covers the ins and outs of hypnosis, guided meditation, and affirmations in bringing about weight loss. More precisely, you will learn: How your mind works and how it affects your body's well-being, especially your weight. What exactly hypnosis is and how it benefits you. How hypnosis trains your mind for a positive output. How your thought patterns affect your weight. What self-hypnosis is and how it differs from stage hypnosis. The connection between hypnosis and weight loss. How to get started with hypnosis for weight loss. The power of guided meditation and affirmations in enhancing weight loss. And much more. Take a moment and imagine entering a phase of your life where you don't have to struggle to lose weight and maintain your ideal weight. Imagine not having to stress over how you will control portions, not binge eating, not eating more when you are stressed or happy, not using food as a coping mechanism, and much more. How would it feel knowing that you will not overindulge, no matter how tasty food is, and knowing that you have full control over your eating habits? It seems idyllic, right?
