Orthodox Christianity, New Age Spirituality and Vernacular Religion Eugenia Roussou, 2021-04-08 This anthropological work thoroughly illustrates the novel synthesis of Christian religion and New Age spirituality in Greece. It challenges the single faith approach that traditionally ties southern European countries to Christianity and focuses on how processes of globalization influence and transform vernacular religiosity. Based on long term anthropological fieldwork in Greece this book demonstrates how the popular belief in the evil eye produces a creative affinity between religion and spirituality in everyday practice. The author analyses a variety of significant research themes including lived and vernacular religion, alternative spirituality and healing, ritual performance and religious material culture. The book offers an innovative social scientific interpretation of contemporary religiosity while engaging with a multiplicity of theoretical, analytic and empirical directions. It contributes to current key debates in social sciences with regard to globalization and secularization, religious pluralism, contemporary spirituality and the New Age movement, gender, power and the body, health, illness and alternative therapeutic systems, senses, perception and the supernatural, the spiritual marketplace, creativity and the individualization of religion in a multicultural world.

Contemporary Western Ethnography and the Definition of Religion Martin D. Stringer, 2011-06-09

[The Archaeology of Religion](#) Sharon R. Steadman, 2023-12-06 The new and updated edition of *The Archaeology of Religion* explores how archaeology interprets past religions offering insights into how archaeologists seek out the religious ritual and symbolic meaning behind what they discover in their research. The book includes case studies from around the world from the study of Upper Palaeolithic and hunter gatherer religions to religious structures and practices in complex societies of the Americas, Mesopotamia, Egypt, India and China. Steadman also includes chapters on the origins and development of key contemporary religions: Judaism, Christianity, Islam among others to provide an historical and comparative context. Three main themes are threaded throughout the book. These main themes involve the intersection between cultural and religious structures, religion reflects culture including the importance of environment in shaping a culture's religion, the role religion can sometimes play as a method of social control and the role religion can sometimes play as a key component in revitalizing a culture. Updated with new discoveries and theories and with two new chapters: Hunter Gatherer Religions and Cultures in East Asia and with

new sections on Neolithic Western Asia the book remains an ideal introduction for courses that include a significant component on past cultures and their religions
