Earth and Faith Libby Bassett, John T. Brinkman, Kusumita Priscilla Pedersen, 2000 *Faiths in Green* Lukas Szrot, 2021-05-03 Faiths in Green addresses the complex and fraught relationship between religious identity and environmental concern in the United States particularly how that relationship has changed over time Examining the effects of religious upbringing belonging and disaffiliation on environmental concern across multiple religious groups over several decades the author shows where when how and why religious groups and their memberships have responded constructively to environmental change over time The author also visits the effects of gender social class race and politics on both religion and environmental concern in the U S

Faiths in Green offers an in depth and accessible guide to understanding the at times incongruous relationship between religious beliefs and motivations as well as ways to follow cultural shifts that both drive and are driven by religious persons and institutions In examining how religious and cultural factors are linked to environmental concern over time Faiths in Green demonstrates the importance of morality and worldviews in confronting global hazards of unprecedented scale

Religion and Environmentalism Lora Stone,2020-07-01 A foundational resource for readers investigating religiously motivated environmentalism this book provides both a global overview of the subject and a detailed discussion of key figures concepts organizations events and documents Beginning in the late 1960s a growing number of activists scholars and scientists asserted that traditional religions had been major contributors to the environmental crisis In response theologians religious organizations and religiously motivated activists became increasingly involved in environmental issues At the same time emerging nature based belief systems emphasized values and lifestyles based in environmentalism More recently religiously motivated environmentalism has become a powerful force in shaping environmental policy and human action globally and has joined with secular environmentalism to address related issues This book explores the background and current state of religious environmentalism The book begins with an overview essay examining the history and context of religious environmentalism and its significance today A chronology then profiles the most important events related to religious environmentalism A section of more than 50 alphabetically arranged reference entries follows with each entry providing objective information about people places events movements works and other topics The entries include cross references and suggestions for further reading and the book closes with a selected annotated bibliography of major works

Encyclopedia of Religion and Nature Bron Taylor,Jeffrey Kaplan,2005-01-01 No Marketing Blurb *The Spirit of Sustainability* Willis Jenkins,Whitney Bauman,2009-11-01 The Spirit of Sustainability helps readers navigate the moral worlds and ethical concepts and social and religious practices related to sustainability In collaboration with the Forum on Religion and Ecology an established network of leading scholars it explores a wide range of topics and perspectives from the promise and problems of approaching sustainability through global and indigenous religions to major theories in philosophy and environmental ethics and professional practices and social movements This volume presents the various goals of sustainability ecological integrity economic health human dignity fairness to the future and social justice and provides a framework for reasoning through many interrelated environmental challenges for both current and future generations

Ethics, Religion and Biodiversity Lawrence S. Hamilton,1993 **Muslim Environmentalisms** Anna M. Gade,2019-08-20 How might understandings of environmentalism and the environmental humanities shift by incorporating Islamic perspectives In this book Anna M Gade explores the religious and cultural foundations of Islamic environmentalisms She blends textual and ethnographic study to offer a comprehensive and interdisciplinary account of the legal ethical social and empirical principles underlying Muslim commitments to the earth Muslim Environmentalisms shows how diverse Muslim

communities and schools of thought have addressed ecological questions for the sake of this world and the world to come. Gade draws on a rich spectrum of materials: scripture, jurisprudence, science, art, and social and political engagement, as well as fieldwork in Indonesia and Southeast Asia. The book brings together case studies in disaster management, educational programs, international development, conservation projects, religious ritual and performance, and Islamic law to rethink key theories. Gade shows that the Islamic tradition leads us to see the environment as an ethical idea moving beyond the established frameworks of both nature and crisis. Muslim Environmentalisms models novel approaches to the study of religion and environment from a humanistic perspective, reinterpreting issues at the intersection of numerous academic disciplines to propose a postcolonial and global understanding of environment in terms of consequential relations.

Sacred Natural Sites Bas Verschuuren, Robert Wild, Jeffrey Mcneely, Gonzalo Oviedo, 2012-06-25. Sacred Natural Sites are the world's oldest protected places. This book focuses on a wide spread of both iconic and lesser known examples such as sacred groves of the Western Ghats, India; Sagarmatha Chomolungma Mt Everest, Nepal; Tibet and China; the Golden Mountains of Altai, Russia; Holy Island of Lindisfarne, UK; and the sacred lakes of the Niger Delta, Nigeria. The book illustrates that sacred natural sites, although often under threat, exist within and outside formally recognised protected areas, heritage sites. Sacred natural sites may well be some of the last strongholds for building resilient networks of connected landscapes. They also form important nodes for maintaining a dynamic socio-cultural fabric in the face of global change. The diverse authors bridge the gap between approaches to the conservation of cultural and biological diversity by taking into account cultural and spiritual values together with the socio-economic interests of the custodian communities and other relevant stakeholders.

Pilgrims and Pilgrimages as Peacemakers in Christianity, Judaism and Islam Antón M. Pazos, 2016-04-08. Pilgrimages can be analysed as acts of conflict, such as the Crusades, or also as platforms for relationship building and rapprochement between religions. With a set of contributions from leading experts in the field, this book explores the concept of pilgrimage in Christianity, Judaism and Islam. Some specific examples of pilgrimages that helped to strengthen links between different religions or civilisations are explored, ranging from Europe to Asia and from the Middle Ages to the twentieth century. Even though every pilgrimage that is investigated here has helped to link different worlds, the case studies show that this relationship rarely led to a better inter-understanding. Nowadays, peaceful coexistence seems to be its greatest achievement.

The Philosophy of Religion

Harald Høffding, 1906 The Good in Nature and Humanity Stephen R. Kellert, Timothy Farnham, 2013-04-10 Scientists theologians and the spiritually inclined as well as all those concerned with humanity's increasingly widespread environmental impact are beginning to recognize that our ongoing abuse of the earth diminishes our moral as well as our material condition. Many people are coming to believe that strengthening the bonds among spirituality, science and the natural world offers an important key to addressing the pervasive environmental problems we face. The Good in Nature and Humanity brings together 20 leading thinkers and writers including Ursula Goodenough, Lynn Margulis, Dorion Sagan, Carl Safina, David Petersen, Wendell Berry, Terry Tempest Williams and Barry Lopez to examine the divide between faith and reason and to seek a means for developing an environmental ethic that will help us confront two of our most imperiling crises: global environmental destruction and an impoverished spirituality. The book explores the ways in which science, spirit and religion can guide the experience and understanding of our ongoing relationship with the natural world and examines how the integration of science and spirituality can equip us to make wiser choices in using and managing the natural environment. The book also provides compelling stories that offer a narrative understanding of the relations among science, spirit and nature. Grounded in the premise that neither science nor religion can by itself resolve the prevailing malaise of environmental and moral decline, contributors seek viable approaches to averting environmental catastrophe and more positively to achieving a more harmonious relationship with the natural world. By bridging the gap between the rational and the religious through the concern of each for understanding the human relation to creation, The Good in Nature and Humanity offers an important means for pursuing the quest for a more secure and meaningful world. **Biodiversity Conservation Ethics in Major Religions**

H. S. A. Yahya, 2010-10-22 Covering three broader issues: biodiversity, conservation, religious doctrine and environment, the book Biodiversity Conservation Ethics in Major Religions is the result of a unique approach. It attempts to initiate scientific discourse through the fabric of religions. Spread across 15 chapters, the book covers the essence of 10 religions on biodiversity, encompassing a wide range of issues related to conservation. The book promises to be a useful resource for biodiversity students, researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology. **The Journal of Religion**, 1922 Includes section: Book reviews
