[The Biological Evolution of Religious Mind and Behavior](#) Eckart Voland, Wulf Schiefenhövel, 2009-08-12 In a Darwinian world religious behavior just like other behaviors is likely to have undergone a process of natural selection in which it was rewarded in the evolutionary currency of reproductive success This book aims to provide a better understanding of the social scenarios in which selection pressure led to religious practices becoming an evolved human trait i e an adaptive answer to the conditions of living and surviving that prevailed among our prehistoric ancestors This aim is pursued by a team of expert authors from a range of

disciplines Their contributions examine the relevant physiological emotional cognitive and social processes The resulting understanding of the functional interplay of these processes gives valuable insights into the biological roots and benefits of religion

The Axial Age and Its Consequences Robert N. Bellah,Hans Joas,2012-10-31 This book makes the bold claim that intellectual sophistication was born worldwide during the middle centuries of the first millennium bce From Axial Age thinkers we inherited a sense of the world as a place not just to experience but to investigate envision and alter A variety of utopian visions emerged and led to both reform and repression

Religion as Magical Ideology Konrad Talmont-Kaminski,2014-10-20 Religion as Magical Ideology examines the relationship between rationality and supernatural beliefs arguing that such beliefs are products of evolution cognition and culture The book does not offer a false rapprochement between reason and religion instead it explores their interrelationship as a series of complex adaptations between cognitive and cultural processes Exploring the nature of the tension between religious traditions and reason Religion as Magical Ideology develops a dual inheritance theory of religion which combines the cognitive byproduct and prosocial adaptation accounts and analyses the connection between the function of a belief and the degree of protection it gets from potential counter evidence With discussion ranging from individual cognitive mechanisms general functional considerations to the limits of evolutionary and cognitive processes the book offers readers a systematic account of how cognition shapes religious beliefs and practices

Confucianism, A Habit of the Heart Philip J. Ivanhoe,Sungmoon Kim,2016-02-01 Employs Robert Bellah s notion of civil religion to explore East Asia s Confucian revival Can Confucianism be regarded as a civil religion for East Asia This book explores this question bringing the insights of Robert Bellah to a consideration of various expressions of the contemporary Confucian revival Bellah identified American civil religion as a religious dimension of life that can be found throughout US culture but one without any formal institutional structure Rather this civil form of religion provides the ethical principles that command reverence and by which a nation judges itself Extending Bellah s work contributors from both the social sciences and the humanities conceive of East Asia s Confucian revival as a habit of the heart an underlying belief system that guides a society and examine how Confucianism might function as a civil religion in China Korea and Japan They discuss what aspects of Confucian tradition and thought are being embraced some of the social movements political factors and opportunities connected with the revival of the tradition and why Confucianism has not traveled much beyond East Asia The late Robert Bellah s reflection on the possibility for a global civil religion concludes the volume

Religion and the Philosophy of Life Gavin Flood,2019-01-10 Religion and the Philosophy of Life considers how religion as the source of civilization transforms the fundamental bio sociology of humans through language and the somatic exploration of religious ritual and prayer Gavin Flood offers an integrative account of the nature of the human based on what contemporary scientists tell us especially evolutionary science and social neuroscience as well as through the history of civilizations Part one contemplates fundamental questions and assumptions what the current

state of knowledge is concerning life itself what the philosophical issues are in that understanding and how we can explain religion as the driving force of civilizations in the context of human development within an evolutionary perspective It also addresses the question of the emergence of religion and presents a related study of sacrifice as fundamental to religions views about life and its transformation Part two offers a reading of religions in three civilizational blocks India China and Europe the Middle East particularly as they came to formation in the medieval period It traces the history of how these civilizations have thematised the idea of life itself Part three then takes up the idea of a life force in part three and traces the theme of the philosophy of life through to modern times On the one hand the book presents a narrative account of life itself through the history of civilizations and on the other presents an explanation of that narrative in terms of life

Evolution of God Leonardo Wolfe,2021-02-24 This debut book boldly seeks to argue competitively in the same intellectual field as famous atheists such as RICHARD DAWKINS CHRISTOPHER HITCHENS and BERTRAND RUSSELL and to do so in the spirit and style of such famous Christian apologists as C S Lewis and RAVI ZACHARIAS drawing heavily on basic science history physics psychology paleontology anthropology archeology neurology child development and even science fiction It describes the evolution of the human brain in ancient hominids allowing humans to eventually conceive a non physical realm the spirit world and as the mind evolved intellectually from primitive animism to Christology God revealed himself gradually as the developing hominid brain became able to comprehend new ideas For Believers the author presents a new intellectually satisfying way to understand and defend the Bible For both Skeptics and Believers a worldview is offered that is spiritually meaningful and scientifically sound

Sociology and the World's Religions M. Hamilton,1998-08-09 Sociological and related studies of systems of religion tend to be fragmented This book brings together and assesses a diverse range of substantive sociological anthropological and social psychological scholarship dealing with the broad spectrum of religious belief experience and behaviour from the work of anthropologists on the religions of tribal and pre industrial peoples to explorations of the origins development and impact of the great world religions The book will have particular appeal not only in the fields of sociology social anthropology but also religious studies
