Religion Als Phänomen:

Romanticism and the Re-Invention of Modern Religion Alexander J. B. Hampton, 2019-01-17 Early German Romanticism sought to respond to a comprehensive sense of spiritual crisis that characterised the late eighteenth century. The study demonstrates how the Romantics sought to bring together the new post-Kantian idealist philosophy with the inheritance of the realist Platonic Christian tradition. With idealism they continued to champion the individual while from Platonism they took the notion that all reality including the self participated in absolute being. This insight was expressed not in the language of theology or philosophy but through aesthetics which recognised the potentiality of all creation including artistic creation to disclose the divine. In explicating the religious vision of Romanticism this study offers a new historical appreciation of the movement and furthermore demonstrates its importance for our understanding of religion today.

Theatre and Religion Günter Ahrends, Hans-Jürgen Diller, 1998 *Phenomenology and the Holy* Espen Dahl, 2013-02-12
SCM Veritas engages in critical and original questions of pressing concern to both philosophers and theologians. The major concern of all books in this series is to display a rigorous theological critique of categories not often thought to be theological in character such as phenomenology or metaphysics which are mainly considered as philosophical categories. All the books in this series aim to illustrate that without theology something essential is lost in our accounts of such categories not only in the abstract but in the way in which we inhabit the world. *Phenomenology and the Holy* is a study of the holy which attempts to find this both in the ordinary and in the sublime thus challenging the reduction of the holy to a discrete and separated field of experience. Phenomenology is a key area of twentieth-century philosophy in which there is a wide interest not only among philosophers but also among theologians and religious studies scholars. **The Pragmatics of Defining Religion** Jan G. Platvoet, Arie Leendert Molendijk, 1999 *The Pragmatics of Defining Religion* is a multidisciplinary volume on the problem of the definition of religion with chapters on the polemics of defining religion in modern contexts, the history of the concept of religion, the methodology of its definition; it includes several definition proposals. *Towards Religious Competence* Hans-Günter Heimbrock, Christoph Th. Scheilke, Peter Schreiner, 2001 In this book scholars around Europe reflect on the changing role of religious education in a time of growing pluralism in Europe and across the world. The various contributions from different European countries (England and Wales, Germany, Netherlands and Norway) focus on the debate about the existing multicultural and multireligious situation in European societies. Difference and diversity especially of religion is seen as a challenge for education in Europe. The chapters mention trends and common challenges for religious education. As a key term of religious education, religious competence is introduced. It includes the ability to deal with religious pluralism and differences in a constructive way. It is argued that contextual religious education facilitates a new religious competence. The book also contains detailed information about current developments in the field of religious education in some European countries. *Normativity and Empirical Research in Theology* Johannes A. van der Ven, Michael Scherer-Rath, 2004-11-01

The idea for this volume originates from the first meeting of the International Society of Empirical Research in Theology ISERT in 2002 at the Radboud University Nijmegen In this volume researchers and academics from South Africa Great Britain Switzerland Germany and the Netherlands debate about the fundamental question of the role of theological normativity in empirical research in theological fields In fourteen contributions this book would like to illuminate the significance of this central topic for the discipline of practical theology The first part of the book provides a discussion about the empirical character of practical theology and the consequences for scientific research in theological fields The second part deals with the normative implications of empirical research It is shown with the help of concrete research projects that empirical research is possible in practical theology and that theology works normatively in empirical research Beyond the Babylonian Trauma Gerald Hartung, 2018-09-24 Hartung works out both the linguistic and philosophy of language setting as well as socio political and cultural implications of the radical critique of language developed in the late 19th and early 20th centuries by philosophers as diverse as Steinthal Cohen Simmel or Cassirer He argues that the theories pleaded for a plurality of linguistic and cultural forms as well as for a new logic beyond the traditional nature culture partition Love's Transcendence and the Problem of Theodicy Claudia Welz, 2008 Claudia Weltz explores responses to the problem of evil that do not end up in a theodicy Kierkegaard's and Rosenzweig's reasons for having no reason to defend God and their ethics of love are discussed in the context of German idealism and French phenomenology BOOK JACKET , *Groundless Gods* Eric E Hall, Hartmut von Sass, 2014-12-25 *Groundless Gods* The Theological Prospects of Post Metaphysical Thought deals with possible interpretations of an emerging interest in contemporary theology postmetaphysical theology This book attempts to openly come to grips not only with what metaphysics and postmetaphysics imply but also with what it could mean to do or not do theology from the standpoint of the nonmetaphysician The book asks for instance whether this world has any singular definition and whether God is some being standing apart from the world or an experience within the world

Religious Diversity and Education. Nordic Perspectives Geir Skeie, 2009 In the last ten years or so religious plurality has become higher on the agenda for religious education research in the Nordic countries This attention to religious plurality partly reflects processes of globalisation that include both physical migration and communication of ideas and is spread across the world making it smaller It also reflects the preoccupation of governments with social cohesion and as part of this intercultural education In the curricula of the Nordic countries this is manifested in different ways setting also the agenda for parts of educational research This book addresses issues related to the increasing religious plurality in the Nordic countries These issues are a challenge to many religious groups including historically dominant Lutheran national churches both nationally and locally They have also led to a reorientation in religious education research in the last decade A rich variety of research perspectives are presented under three headings Theoretical and methodical perspectives The world of the students Teachers and textbooks Nordic religious education research here proves to be internationally oriented in terms of theoretical

perspectives whilst also contributing to the debate through important empirical studies. Examples of issues covered in the book are unintended learning, dialogue, gender, life, interpretation, spirituality, identity, and values. In different ways, all the contributions in this book shed light on the common theme of diversity and are based on a will to include diverse perspectives both on the actors and the material of the classroom as well as on the life world of young people. The researchers represent different generations and different theoretical and methodological perspectives.

The Pragmatics of Defining Religion Platvoet, Arie Molendijk, 2018-11-13. This volume promotes a pragmatic, anti-essentialist and anti-hegemonic approach to the problem of the definition of religion. It argues that definitions of religion are context-bound strategies for pursuing a variety of purposes, extra-academic as well as academic. Religions being immensely varied, complex and multi-functional phenomena, they need to be studied by several academic disciplines from many different perspectives. It is therefore legitimate and useful that many definitions of religions are developed. The volume has contributions from scholars in Philosophy of Religion, the Comparative Study of Religions, Anthropology of Religion, Sociology of Religion, and Psychology of Religion. It has chapters on the polemics of defining religion in modern contexts, the history of the concept of religion, and the methodology of its definition; it includes several definition proposals.

Rationalization in Religions Yohanan Friedmann, Christoph Marksches, 2018-12-17. Current tendencies in religious studies and theology show a growing interest for the interchange between religions and the cultures of rationalization surrounding them. The studies published in this volume, based on the international conferences of both the Berlin Brandenburgische Akademie der Wissenschaften and the Israel Academy of Sciences and Humanities, aim to contribute to this field of interest by dealing with concepts and influences of rationalization in Judaism, Christianity, Islam, and religion in general. In addition to taking a closer look at the immediate links in the history of tradition between those rationalizing movements and evolutions in religion, emphasis is put on intellectual historical convergences. Therefore, the articles are led by central comparative questions such as: what factors foster/hinder rationalization? where are criteria for rationalization drawn from? in which institutions is rationalization taking place? who propagates, supports, and utilizes rationalization?

Studies in the History of Religions [Anonymus AC00528382], 1954.

Theology and the Religions Viggo Mortensen, 2003. The academic study of religion is undergoing great changes in response to globalization. Just as sociologists now find it necessary to think in terms of multiculturalism, so religion scholars and theologians today must work in the context of multireligiosity. Globalization is leading not only to multiethnic societies but also to plurality in religions and worldviews. *Theology and the Religions: A Dialogue* offers the first sustained analysis of the trend toward multireligiosity and its implications for the study of religion. Drawing on the resources of cultural analysis, religious studies, and theology, an international slate of scholars explores the relation of multiculturalism and multireligiosity, the need for interreligious dialogue, and the possibilities for a theology of religions. This groundbreaking work is supported by case studies of various religious traditions in diverse cultures from around the world. Special attention

is paid to Christian theological reflection however since as a global religion Christianity is particularly challenged by multireligiosity Offering an engaging wide angle view of religion worldwide Theology and the Religions makes a vital contribution to our understanding of the forces shaping the future of religious and social life Contributors Kajsa Ahlstrand Theodor Ahrens Jan Martin Berentsen Ulrich Dehn Helene Egnell Marianne C Qvortrup Fibiger Patrik Friedlund Virginia Garrard Burnett Geomon K George Elisabeth Gerle Friedrich Wilhelm Graf Hans Hauge Ulf Hedetoft S Mark Heim Chris Hewer Klaus Hock Michael Ipgrave Andrew J Kirk Lene K hle Volker K ster Aasulv Lande Oddbjorn Leirvik Ole Skjerve k Madsen Hiromasa Mase Mogens S Mogensen Viggo Mortensen Johannes Nissen Klaus N rnberger Caleb Oladipo Tinu Ruparell Risto Saarinen Lamin Sanneh Olaf Schumann Notto R Thelle Joachim Track V tor Westhelle H S Wilson **Radical Theology** Ingolf U. understanding of it it is clear that historical research has not been rendered obsolete or superfluous by it
