Research on Enhancing the Interactivity of Online Learning Vivian H. Wright, Cynthia S. Sunal, Elizabeth K. Wilson, 2006 Our goal with this book Research on Enhancing the Interactivity of Online Learning is to present a juried scholarly and accessible review of research theory and or policy on specific issues of interactive online learning for K 16 educators administrators and students of online learning Online learning has become the norm rather than the exception for many of today s students Instructors are more willing to explore online learning options students are enrolling in record numbers and colleges as well as many K 12 institutions are offering more online courses As educators we have more tools than ever to ensure online course success but just as with a traditional class we must continue to place emphasis on good pedagogy To achieve good pedagogy online teaching takes additional time and a restructuring of course content by the instructor Student issues include coping strategies ease of navigation skills required to complete the course availability of online resources feedback from the instructor and collaborative interactive learning opportunities Principles of interactive online learning are new to many and this book provides a forum for interactive online learning research while also including ideas that enhance both the practical and theoretical aspects of interactive online learning The editors have included chapters that can further knowledge and understanding of emerging trends and foster debate regarding issues that surround interactive online learning The underlying theme of each chapter is the importance of pedagogy that is research based and effective It is our hope that the experiences advice and recommendations of the authors

featured in this book will further your growth in effective interactive online learning and design as you continue to explore what enhances student learning Learning Online Barbara Means, Marianne Bakia, Robert Murphy, 2014-04-03 At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology Learning Online provides a much needed guide to different forms and applications of online learning This book describes how online learning is being used in both K 12 and higher education settings as well as in learning outside of school Particular online learning technologies such as MOOCs massive open online courses multi player games learning analytics and adaptive online practice environments are described in terms of design principles implementation and contexts of use Learning Online synthesizes research findings on the effectiveness of different types of online learning but a major message of the book is that student outcomes arise from the joint influence of implementation context and learner characteristics interacting with technology not from technology alone The book describes available research about how best to implement different forms of online learning for specific kinds of students subject areas and contexts Building on available evidence regarding practices that make online and blended learning more effective in different contexts Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models This in depth research work concludes with a call for an online learning implementation research agenda combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices

Learning, Culture, and Community in Online Education Michelle M. Kazmer, 2004 In 1996 the Graduate School of Library and Information Science at the University of Illinois at Urbana Champaign began an Internet based teaching program allowing students across the United States and the world to earn a Master's degree from a distance The program known as LEEP Library Education Experimental Project has been an outstanding success and as an early innovation in Internet use provides important lessons on how to flourish in an online environment Learning Culture and Community in Online Education brings together significant new research on online education using the LEEP program as a model to reveal a wealth of information about innovative online practices Contributions by administrators philosophers faculty librarians technical staff and researchers in the traditions of education computer science folklore information science and sociology reveal the many perspectives to be taken into account when creating and maintaining distance learning programs More than an analysis of the LEEP program this book is an essential introduction to the variety of social and educational phenomena that occur within the socio technical environments that support online learners **High-Impact Practices in Online Education** Kathryn E. Linder, Chrysanthemum Mattison Hayes, 2023-07-03 This volume offers the first comprehensive guide to how high impact practices HIPs are being implemented in online environments and how they can be adjusted to meet the needs of online learners This multi disciplinary approach will assist faculty and administrators to effectively implement HIPs in distance education courses and online programs With a chapter devoted to each of the eleven HIPs this collection offers guidance that

takes into account the differences between e learners and traditional on campus students A primary goal of High Impact Practices Online is to share the ways in which HIPs may need to be amended to meet the needs of online learners Through specific examples and practical suggestions in each chapter readers are introduced to concrete strategies for transitioning HIPs to the online environment that can be utilized across a range of disciplines and institution types Each chapter of High Impact Practices Online also references the most recent and relevant literature on each HIP so that readers are brought up to date on what makes online HIPs successful The book provides guidance on how best to implement HIPs to increase retention and completion for online learners

Global Perspectives on Online Education During a Time of Emergency: Conditions, Contexts and Critiques Patricia Marybelle Davies, 2025-02-18

Global Perspectives on Online Education During a Time of Emergency presents viewpoints on the unprecedented shift to online education as a result of the COVID 19 pandemic It aims to broaden and deepen readers understanding of studies that could better address academic issues related to teaching and learning online The pandemic triggered the disruption of national educational systems and a rapid transition to online education but there were few guidelines on how to proceed Consequently the role of educational technologies and distinctions between formal and informal U learning became blurred Greenhow Lewin 2016 This volume examines how

educators adopted new pedagogical practices adapted to flexible working environments and tackled new technologies to maintain educational systems following the global outbreak of the coronavirus. It showcases innovative practices and critiques several learning theories of online education. The chapters are developed using two main approaches: empirical investigations and reviews of existing research. The empirical chapters present significant new findings of broad relevance. The review chapters use established studies to describe recent developments of broad significance and highlight unresolved questions and future directions. The volume as a whole provides research-based insights on evidence on the contexts and conditions of the emergency transition to online education worldwide and useful recommendations on emergent directions in online education. This is a vital text for educational researchers, technologists, and practitioners. It includes empirical data, theoretical questions, and methodological approaches addressing online education. The volume explores flexible learning, alternative pedagogical practices, and changes in digital environments, examining futuristic approaches at a crucial moment of global reform in online education.

Learning Together Online Starr Roxanne Hiltz, Ricki Goldman, 2004-09-22. This book is about the past and future of research on the effectiveness of learning networks, also known as e-learning or online learning or Web-based learning. Learning networks are groups of people using computer technology, communicating and collaborating online to build knowledge together. Over the past decade, there has been an explosion, not only of online courses but also of studies on them. In *Learning Together Online: Research on Asynchronous Learning Networks*, leading researchers in the field use an integrated theoretical framework which they call Online Interaction Learning Theory to organize what past research shows and where future research is going. It models the variables and processes that are important in determining the relative effectiveness of online learners working to reach a deeper level of understanding by interacting with each other and with the texts under investigation. Now that there have been hundreds of studies and thousands of courses offered online, what does the empirical evidence show? This book addresses the question directly by presenting what is known from research results about how to design and teach courses effectively online, ranging from the organizational context and characteristics of students to learning theories and research design methods. It also provides a research agenda for the next decade. *Learning Together Online: Research on Asynchronous Learning Networks* is both a textbook for graduate students and a professional reference for faculty teaching online, researchers conducting studies, and graduate students taking courses about learning technologies who need to know the state of the art of research in the area of online learning.

What Every Student Should Know about Researching Online David Munger, Shireen Campbell, 2007. *What Every Student Should Know About Researching Online* teaches students how to conduct research. In the first place, they will look the Web. They will learn how to use search engines and databases and judge what they find; how to document the materials they borrow; and how to avoid online plagiarism. Annotated screen shots of Web pages show students where to locate the information they need to create a proper citation. Numerous examples of properly cited online and electronic sources are also provided. The

What Every Student Should Know About series is a collection of guide books designed to help students with specific topics that are important in a number of different college courses. Instructors can package any one of these booklets with their Allyn Bacon Longman textbook for no additional charge or the booklets can be purchased separately.
