An Ethical Approach to Practitioner Research Anne Campbell, Susan Groundwater-Smith, 2007-09-12

Practice based research is burgeoning in a number of professional areas An Ethical Approach to Practitioner Research covers a comprehensive range of issues and dilemmas encountered in practitioner and action research contexts While principally focused upon practitioner inquiry in education it takes account of and acknowledges that others engaged in professional practice such as in legal nursing and social care contexts face similar issues and dilemmas It aims to stimulate ethical thinking and practice in enquiry and research contexts Following moves to promote professional learning and development in the workplace there is an increase in the number of practitioners engaging in action or inquiry based learning in the workplace supported by university staff or consultants as evidenced in the emergence of professional learning communities and learning networks There are many tensions inherent in relationships between practitioners and academics in terms of the setting of the research agenda the policy implications that may flow from it and the right to publish outcomes Negotiating that relationship requires ethical probity where each party recognises understands and respects mutual responsibilities The book explores this through a wide variety of roles from those of academic researchers consultants and teachers to professional practitioners as researchers and importantly students and children It therefore illustrates a number of differing perspectives about ethics and research which are allied to those roles Drawing on the expertise of international researchers and academics from America Australia and Europe the book provides invaluable support to the novice researcher and

illuminates some of the more intricate issues for the more experienced research practitioner Packed with detailed and thought provoking examples this book contains both theoretical analyses of ethical matters and offers practical advice to practitioner and action researchers across the fields of schools hospitals and community and family settings A *Practitioner's Guide to Public Archaeology* Elizabeth C.
