Researching Violently Divided Societies Ethical And Methodological Issues:

Researching Violently Divided Societies Marie Smyth, Gillian Robinson, 2001 The book deals with the methodological and ethical issues arising when researching conflicts and violent or divided societies. It seeks to analyse what sort of research can give a sound understanding of the way conflict is caused and maintained in order to *Researching Violently Divided Societies* Marie Smyth, Gillian Robinson, 2001 All societies are to a certain extent divided by conflicts over race, ethnicity, religion, and class. However, in societies such as Britain and the United States, these tensions are contained and managed by social, economic, and political mechanisms. This book, produced as a result of an international collaboration between researchers in Eastern Europe, Africa, the Middle East, Northern Ireland, and elsewhere, aims to provide a guide to the issues faced by researchers working in violently divided contexts. Document the insights and practice wisdom of practising researchers operating in such contexts. Afford access to the lived experience of those researchers and the ethical and methodological challenges which face them. Present accounts and analysis which illustrate a wide range of diverse experiences and perspectives on the experience of doing research in violently divided societies. Explore the involvement of the researchers with the research material and the impact of doing the research on them. A range of ethical and methodological issues are covered, and the specific demands of conducting research in war-torn and divided societies has stimulated the contributors to analyse and critique issues such as the contribution of research to society, the benefit of research to respondents, and issues of objectivity, issues of concern to all researchers. However, in the often stark circumstances in which the contributors work, these issues take on an urgency and clarity that can potentially illuminate research practice generally. The book deals with the methodological and ethical issues arising when researching conflicts in violently divided societies where there is no consensus about policing, law, and order, the impartiality of the state, or indeed about the legitimacy of the state itself. With contributions from researchers who have worked in a range of very different divided societies around the world, it examines the conditions under which such inquiry is conducted and looks at the obstacles that researchers face. *Researching Violently Divided Societies* looks in detail at different case studies to offer a sound understanding of the most effective methodological approaches for improving responses to division and violence. Chapters cover the role and function of research in divided societies in Africa, the efficacy of research in Northern Ireland, dilemmas of identification and ethnography, research by insiders and outsiders, research for empowerment in Cambodia, the role of research in managing conflicts in Nigeria, researching ethnic conflict in Post-Soviet central Asia, a first-time researcher's experience in Bosnia, the ethics of psychiatric research in war zones, and a final comparison of policy. **New Perspectives in Political Ethnography** Lauren Joseph, Matthew Mahler, Javier Auyero, 2007-09-20 The use of ethnographic research, social research based on the observation of individuals or institutions where the researcher becomes part of the group or very close to the group to better understand their actions, is becoming more and more of a prevalent methodology within sociology. As

ethnography gains prominence within the discipline its focus theoretical underpinnings and narrative styles are also expanding to the yet unexamined worlds and institutions of society Politics political institutions and those working in politics state officials politicians and activists have so far missed the lens of the ethnographer As a group politicians and those in politics can be found in every corner of the world While political systems and politicians are by no means the same in every country what brings these people together to be part of the political process Ethnography is uniquely equipped to look microscopically at the foundations of political institutions and their attendant set of practices just as it is ideally suited to explain why political actors behave the way they do and to identify the causes processes and outcomes that are part and parcel of political life The volume based on a special issue of Qualitative Sociology has a two fold purpose to bring politics into the ethnographic literature and of ethnography in studies of politics The case studies included are based on the research of ethnographers studying the various level of politics in Brazil Japan El Salvador Bosnia the Philippines India and the United States It will be of interest to those in the sociology of politics political science and those looking for ethnographic research on a global level

Families of the Missing Simon Robins, 2013-05-29 Families of the Missing interrogates the current practice of transitional justice from the viewpoint of the families of those disappeared and missing as a result of conflict and political violence Studying the needs of families of the missing in two contexts Nepal and Timor Leste the practice of transitional justice is seen to be rooted in discourses that are alien to predominantly poor and rural victims of violence and that are driven by elites with agendas that diverge from those of the victims In contrast to the legalist orientation of the global transitional justice project victims do not see judicial process as a priority Rather they urgently seek an answer concerning the fate of the missing and to retrieve human remains As important are livelihood issues where families are struggling to cope with the loss of breadwinners and seek support to ensure economic security Although rights are the product of a discourse that claims to be global and universal needs are necessarily local and particular the product of culture and context And it is from this perspective that this volume seeks both to understand the limitations of transitional justice processes in addressing the priorities of victims and to provide the basis of an emancipatory victim centred approach to transitional justice

Ethics and Terrorism Max Taylor, John Horgan, 2021-11-24 This book provides a unique insight into the ethical issues and dilemmas facing practitioners and researchers of terrorism and counterterrorism Ethics play a central if largely unrecognised role in most if not all issues relevant to terrorism and political violence These are often most noticeable regarding counterterrorism controversies while often virtually absent from discussions about academic research practice At a minimum ethical issues as they relate to terrorism have rarely been explicitly addressed in a direct or comprehensive manner The chapters in this edited volume draws on the experience of both practitioners and researchers to explore how a regard to ethical issues might influence and determine research and practice in counter terrorism and in our understanding of terrorism Ethics and Terrorism recognizes that there are conflicting and often irreconcilable perspectives
