Abstract

The rapid reshaping of the global economic order requires fundamental shifts in international business scholarship and management practice. New forms of protectionist policies, new types of internationalization motives, and new tools of techno-nationalism may lead to what we call “bifurcated governance” at the macro-level and “value chain decoupling” at the micro-level. As a result, innovation networks will require novel reconfigurations. We examine the emerging constraints on multinational enterprises, imposed by a bifurcated world order. We also discuss how the dynamic capabilities framework can guide scholars and managers alike to achieve new forms of evolutionary fitness.

INTRODUCTION

The global economic system created in the post-World War II (WWII) era is now being disrupted and undergoing significant structural reshaping. While in need of improvement, the post-WWII system led to an extended epoch of peace and an unprecedented rise in prosperity. It lifted up, albeit unevenly, the welfare of much of the world’s population as it encouraged enterprise formation and growth, brought investment, and, importantly, transferred advanced technology to many parts of the world. At the micro-level, the transfer of managerial best practices in a variety of functional areas, and in overall firm-level governance, may well have been the greatest contribution of the post-WWII system—in a downward cascading motion—to the functioning of the world economy, and it was brought about by multinational enterprise (MNE) investment and capability transfers (Dunning, 1958; Verbeke, Coeurderoy &

Reshaping Globalization:

Reshaping Globalization Violetta Zentai, Andrea Krizsán, 2003 If the importance of globalization were judged by the volume of discussion it has generated it would surely be a concept of fundamental importance in the contemporary world And yet as a concept globalization is often indigestible meaning different things to different people and remaining obscure in its connotations A virtue of this volume of essays is that the phenomena of globalization are made more approachable by being divided into five discrete themes each of which forms part of the overall concept and each of which has important implications for policy decisions at the international regional and national levels By differentiating the concept in this way into the production of global knowledge the provision of global public goods the global trade system global foreign aid and global governance the analysis is sharpened in an illuminating and stimulating manner At the same time the editors Drs Violetta Zentai and Andrea Krizsan provide a masterly introductory essay that shows how the various parts make up the whole The fact that the book is a product of an international conference held at the Central European University shortly after September 11 in 2001 adds a layer to its significance The Center for Policy Studies at the Central European University and its collaborators deserve praise for such a thorough and timely analysis of these various strands of globalization Book jacket

Reshaping Protestantism in a Global Context Volker Küster, 2009 The regional contributions from Africa and Asia show how the old European made denominational differences fade in the light of African Instituted Churches or Pentecostalism Reshaping Protestantism is not a backward oriented project of reconstructing the original but makes use of the inner protestant pluralism to cope with globalization and changing religious landscapes Who reads through the different articles can only come to the conclusion Yes there is a contribution to be expected from mainline Protestantism in all its variety

Reshaping Globalisation Heribert Dieter, 2003 **Shaping Globalization** Nicanor Perlas, 2019-03-25 Civil Society has become a major power in the world The stunning defeat of the controversial and secretive Multilateral Agreement on Investments the massive worldwide WTO protests and the yearly meetings of the World Social Forum are testimony to its coming of age From these significant victories civil society continued to catch world attention with the Arab Spring the grassroots movement that helped elect former US President Barack Obama and the significant gains of the anti fracking campaign With tens of millions of citizens and over a trillion dollars involved in advancing its agenda civil society now joins the state and the market as the third key institution shaping globalization However it cannot fully mobilize its resources and power as it currently lacks clear understanding of its identity Shaping Globalization argues that global civil society is a cultural institution wielding cultural power and shows how through the use of this distinct power it can advance its agenda in the political and economic realms of society without compromising its identity Nicanor Perlas outlines the strategic implications for civil society both locally and globally and explains that civil society s key task is to inaugurate threefolding the forging of strategic partnerships between civil society government and business Such authentic tri sector

partnerships are essential for advancing new ways for nations to develop and for charting a different sustainable type of globalization Using the model of the Philippine Agenda 21 we are shown how civil society and progressive individuals and agencies in government and business are demonstrating the effectiveness of this new understanding to ensure that globalization benefits the environment the poor and society as a whole This reprinted edition includes a new Afterword

Shaping Globalization Bertelsmann Stiftung,2013-01-25 The rise of new economic powers in Asia and Latin America has changed the size and the direction of cross border investment flows Emerging economies like China Brazil and India have become major destinations of foreign direct investment within the past decade and they are also taking on the role of investor themselves The unprecedented shifts in global investment flows have revived the debate over the effects of foreign investment on growth employment and income distribution In this book leading experts analyse the most important trends from the increasingly active role emerging economies play as investors in Africa to the rising suspicion in the U S and Europe of Chinese takeovers Global challenges like climate change and the ageing of societies will act as new drivers of foreign investment reshaping the patterns of globalization once again Globalization Stefan A. Dreiling,Derek Y. Darves,2016-09-26 Depictions of globalization commonly recite a story of a market unleashed bringing Big Macs and iPhones to all corners of the world Human society appears as a passive observer to a busy revolution of an invisible global market paradoxically unfolding by its own energy Sometimes this market is thought to be unleashed by politicians working on the surface of an autonomous state This book rejects both perspectives and provides an analytically rich alternative to conventional approaches to globalization By the 1980s an enduring corporate coalition advanced in nearly synonymous terms free trade tax cuts and deregulation Highly networked corporate leaders and state officials worked in concert to produce the trade policy framework for neoliberal globalization Marshalling original network data and a historical narrative this book shows that the globalizing corporate titans of the late 1960s aligned with economic conservatives to set into motion this vision of a global free market **The Systems View of Life** Fritjof Capra,Pier Luigi Luisi,2014-04-10 Over the past thirty years a new systemic conception of life has emerged at the forefront of science New emphasis has been given to complexity networks and patterns of organisation leading to a novel kind of systemic thinking This volume integrates the ideas models and theories underlying the systems view of life into a single coherent framework Taking a broad sweep through history and across scientific disciplines the authors examine the appearance of key concepts such as autopoiesis dissipative structures

Crawford, Lewis V. Baldwin, 2019-10-05 The burgeoning terrain of Martin Luther King Jr studies is leading to a new appreciation of his thought and its meaningfulness for the emergence and shaping of the twenty first century world This volume brings together an impressive array of scholars from various backgrounds and disciplines to explore the global significance of King then now and in the future Employing King s metaphor of the great world house the major focus is on King s appraisal of the global human struggle in the 1950s and 1960s his relevance for today s world and how future generations might constructively apply or appropriate his key ideas and values in addressing racism poverty and economic injustice militarism sexism homophobia the environmental crisis globalization and other challenges confronting humanity today The contributors treat King in context and beyond context taking seriously the historical King while also exploring how his name activities contributions and legacy are still associated with a globalized rights culture Dreams of Peace and Freedom Jay Winter, 2008-10-01 In the wake of the monstrous projects of Hitler Stalin Mao and others in the twentieth century the idea of utopia has been discredited Yet historian Jay Winter suggests alongside the major utopians who murdered millions in their attempts to transform the world were disparate groups of people trying in their own separate ways to imagine a radically better world This original book focuses on some of the twentieth century s minor utopias whose stories overshadowed by the horrors of the Holocaust and the Gulag suggest that the future need not be as catastrophic as the past The book is organized around six key moments when utopian ideas and projects flourished in Europe 1900 the Paris World s Fair 1919 the Paris Peace Conference 1937 the Paris exhibition celebrating science and light 1948 the Universal Declaration of Human Rights 1968 moral indictments and student revolt and 1992 the emergence of visions of global citizenship Winter considers the dreamers and the nature of their dreams as well as their connections to one another and to the history of utopian thought By restoring minor utopias to their rightful place in the recent past Winter fills an important gap in the history of social thought and action in the twentieth century Dynamics Among Nations Hilton L. Root, 2013-11 An innovative view of the changing geopolitical landscape that draws on the science of complex adaptive systems to understand changes in global interaction Liberal internationalism has been the West s foreign policy agenda since the Cold War and the West has long occupied the top rung of a hierarchical system In this book Hilton Root argues that international relations like other complex ecosystems

exists in a constantly shifting landscape in which hierarchical structures are giving way to systems of networked interdependence changing every facet of global interaction Accordingly policymakers will need a new way to understand the process of change Root suggests that the science of complex systems offers an analytical framework to explain the unforeseen development failures governance trends and alliance shifts in today s global political economy Root examines both the networked systems that make up modern states and the larger interdependent landscapes they share Using systems analysis in which institutional change and economic development are understood as self organizing complexities he offers an alternative view of institutional resilience and persistence From this perspective Root considers the divergence of East and West the emergence of the European state its contrast with the rise of China and the network properties of their respective innovation systems the trajectory of democracy in developing regions and the systemic impact of China on the liberal world order Complexity science Root argues will not explain historical change processes with algorithmic precision but it may offer explanations that match the messy richness of those processes

Fortune Favors the Bold Lester C. Thurow, 2009-10-13

Bestselling author and renowned economist Lester Thurow argues forcefully that globalization is not a done deal and we must seize the moment now if we are to create a new global economy in which all can prosper In this new book Thurow examines the newly forming global economy with a special focus on the role of the US and the dangers to our own national well being He examines such questions as What s at stake for us in the global economy Why is it important that the system be equitable and that other countries prosper along with us What should our goals as a nation be long term and short term What are the tough choices that need to be made in our relationship with other countries and world regulatory bodies What role should we be playing globally What are the political economic social choices tradeoffs we will have to confront Thurow contends that the huge and growing US trade deficit poses grave dangers to the value of the dollar and is putting our own economy in jeopardy As the world economy leaps national boundaries its hallmark seems to be a rising instability and a growing inequality between the first and third worlds Financial crises in the third world come ever more frequently and seem to be ever more severe The first world economies seem to be in ever more frantic boom and bust cycles Globalization causes riots throughout the world and is one factor in the rise of terrorism against the West Thurow shows how some nations including Ireland and China have embraced the concept of globalization and placed themselves into a position to prosper with growing and productive national economies He contrasts their positive actions with Japan whose leaders have allowed the nation to drift into stagnation and have destroyed its prosperity He argues that this is the time to choose globalization or be left behind the time to build a global economy that eliminates the defects and he provides plenty of ideas for corporations governments economists and citizens to act upon
