Residential Mobility Migration And Metropolitan Change:

Residential Mobility, Migration, and Metropolitan Change Alden Speare, Sidney Goldstein, William H. Frey, 1975

Household Mobility in America Brian Joseph Gillespie, 2016-12-22 This book provides an interdisciplinary analysis of the correlates and consequences of residential relocation Drawing on multiple nationally representative data sets the book explores historic patterns and current trends in household mobility individuals mobility related decisions and the individual family and community outcomes associated with moving These sections inform later discussions of mobility related policy practice and directions for future research Commuting and Relocation of Jobs and Residences Jos Ommeren, 2018-04-27

This title was first published in 2000 An analysis of commuting behaviour from an integrated labour and housing market perspective A theoretical search model is proposed and analyzed with an emphasis on two owner households The book provides insights into the relationship between job and residential moving and commuting behaviour **Homeowners and Neighborhood Reinvestment** George C. Galster, 1987 This book investigates the efforts of homeowners to maintain and improve their dwellings Their behavior it has found depends on economic variables as well as the sociological structure of their neighborhoods Residential satisfaction expectations of the neighborhood and mobility plans were taken into account Multivariate statistical analyses of models were conducted using household data from Minneapolis and Wooster Ohio Three important findings emerged First homeowners sense of solidarity with their neighbors is as significant in determining their efforts at home upkeep as are their income or age Second the optimism of homeowners toward increases in property values results in behavior opposite to that produced by optimism about neighborhood quality of life This implies that different kinds of predictable gaming behavior occur among homeowners depending on the neighborhoods in which they live Third both short term and extremely long term plans to move prove damaging to home upkeep The results of this study form the basis for a better understanding of such residential phenomena as class succession racial transition and gentrification Galster s findings will also be valuable for analyzing policies that attempt to encourage neighborhood reinvestment The Planning Role in Stretching the City Shlomit Flint Ashery, 2023-09-09 This research aims to uncover new insights into minority housing strategies and their impact on densely populated urban areas The study assumes that as space becomes scarce inter and intra groups interactions in the urban space motivate people to maximize the utility of the resources at their disposal This stretch of the built environment provides them with critical selective advantages and a sense of security and belonging Based on two neighbourhoods in London it contributes to our understanding of housing decisions in the context of illegality and shows the capacity of a given urban form for adaptation It creates a new semi private public space partly segregated yet deeply integrated a sphere that on the one hand enables traditional nested places and on the other a fertile environment for integration This manuscript contributes two new ideas to the knowledge base of residential selections and the geography of opportunities The first is a detailed analysis of a hyper segregation integration pattern resulting from complementary

residential strategies operating at the individual unit level The second is multidimensional stretching a bottom up initiation that allows individuals to maximize resources through territorial and spatial practices Sociological Human Ecology Michael Micklin, Harvey M Choldin, 2019-09-18 First published in This volume grew out of concerns raised by the contributors and a few others over the current status of human ecology within the field of sociology Stemming from conferences and subsequent discussions by a group of sociologist demographers on recent developments in sociological human ecology which started at the annual meeting of the Population Association of America in 1976 the original essays contained in this book are designed to review and assess the current state of knowledge in the field **Applied Urban Analysis** Ian Cullen, 2013-04-15 Much of the theoretical literature in planning and human geography at present is materialist in perspective This offers a powerful critique but locates the dynamics of urban systems too specifically in just one basic social relationship It fails to provide an intellectual base broad enough for constructive detailed urban analysis partly because it fails to do justice to the reflective awareness of the individual The alternative humanist position redresses the balance in favour of the individual but again cannot serve the practical requirements of urban analysis since it so often ignores social or contextual analysis Ian Cullen synthesizes these two apparently inconsistent theoretical positions and to render the increasingly obscure debate between them accessible This book was first published in 1984 Families and Housing Markets Margaret C. Simms, 1980 **Behavioral Problems in Geography Revisited** Kevin R Cox, Reginald Golledge, 2015-12-22 This collection of papers originally published in 1981 reviews and evaluates past and possible future advances in a field of central importance to human geography behavioral geography The book includes critical studies which show how the approach has contributed substantially to work within four areas of major application in behavioral geography urban travel behavior environmental cognition residential mobility and spatial diffusion The final section of the book focuses on the shortcomings of the behavioral approach and considers the alternative modes of analysis available Population Issues Leo J.G. van Wissen, Pearl A. Dykstra, 2012-12-06 This volume marks the end of an eight year program of research on population issues launched in 1990 by the Netherlands Organization for Scientific Research The NWO Priority Program on Population Issues Initiatives for this program of research were taken over ten years ago by Hans Van Ginkel who became the first program chair and Dirk Van De Kaa The Dutch community of population scientists is deeply indebted to them for their early efforts At the time the program carried the name Between Individual Development and Social Solidarity Population and Society in a Period of Transition The goals of the Priority Program were threefold To reduce the fragmentation of research on population issues to increase collaboration among population researchers with different disciplinary backgrounds and to strengthen the position of population studies in Dutch academe and in international forums Looking back over eight years of programmed research we can safely say that the Priority Program has given an enormous impetus to population research in the Netherlands as this volume attests This program of research could not have been carried out successfully without the

valuable contributions and constructive input of a large group of scientists The scope and the focus of the Priority Program were defined by a preparatory committee chaired by Gerard Frinking **Societal Geo-innovation** Arnold Bregt, Tapani Sarjakoski, Ron van Lammeren, Frans Rip, 2017-04-03 This book contains the full research papers presented at the 20th AGILE Conference on Geographic Information Science held in 2017 at Wageningen University Research in Wageningen the Netherlands The selected contributions show trends in the domain of geographic information science directed to spatio temporal perception and spatio temporal analysis For that reason the book is also of interest to professionals and researchers in fields outside geographic information science in which the application of geoinformation could be instrumental in sparking societal innovation Housing and Planning References , 1975 **Innovative Approaches to Understanding Transportation/societal Interactions: Study design reports** , 1981 **The Changing Social Geography of Canadian Cities** Larry S. Bourne, David Ley, 1993 The contributors to this volume demonstrate the richness and diversity of the social landscapes and communities in Canadian urban centres emphasizing changes which occurred in the period from the mid 1960s to the early 1990s The nineteen non technical and integrative essays include reviews of the literature empirical studies and discussions of policy issues CONTENTS Introduction The Social Context and Diversity of Urban Canada David F Ley and Larry S Bourne Part One Patterns People and Place in Urban Canada Evolving Urban Landscapes D W Holdsworth Measuring the Social Ecology of Cities W K D Davies and R A Murdie Demography Living Arrangement and Residential Geography J R Miron Urban Social Behaviour in Time and Space D G Janelle Part Two Contexts Social Structure and Urban Space Migration Mobility and Population Redistribution E G Moore and M W Rosenberg The Emerging Ethnocultural Mosaic S H Olson and A L Kobayashi Work Labour Markets and Households in Transition D Rose and P Villeneuve Housing Markets Community Development and Neighbourhood Change Larry S Bourne and T Bunting Part Three Places Selected Locales Integrating Production and Consumption Industry Class Ethnicity and the Jews of Toronto D Hiebert Past Elites and Present Gentry Neighbourhoods of Privilege in the Inner City David F Ley From Periphery to Centre The Changing Geography of the Suburbs L J Evenden and G E Walker The Social Geography of Small Towns J C Everitt and A M Gill Part Four Needs Social Well being and Public Policy Social Planning and the Welfare State J T Lemon The Meaning of Home Home Ownership and Public Policy R Harris and G J Pratt Homelessness M J Dear and J Wolch Geography of Urban Health S M Taylor Changing Access to Public and Private Services Non family Childcare S Mackenzie and M Truelove Cities as a Social Responsibility Planning and Urban Form P J Smith and P W Moore **U.S. and West German Housing Markets** K. Stahl, R.J. Struyk, 2013-11-11 For many years countries have taken advantage of one another's experiences in formulating social policies and even in designing specific interventions Often such transfers have occurred on a fairly casual level sometimes greater rigor has been present In either case the goal has been to learn from previous experience at least to avoid repeating the mistakes of the past In light of the promise that such intercountry transfers hold it is somewhat surprising that so little

energy has gone into careful analytic work on the behavior of households in differing countries and how they respond to various changes especially those resulting from shifts in public policy This lack of careful analysis was a major force that motivated The Urban Institute to establish an international studies program in 1982 This volume represents one of the early products of the collaborative efforts that this initiative has spawned The results of the comparison of the housing markets in West Germany and the United States presented here offer examples of the type of unexpected conclusions that may emerge from careful analyses as well as more anticipated outcomes Despite the many similarities in the economies of the United States and West Germany and the general free market orientation of their housing sectors the papers in this volume document important differences in the way households make decisions about their housing and the consequences of these decisions

Selling Cities David P. Varady, Jeffrey A. Raffel, 1995-01-01 Shows that cities can be revitalized by attracting and retaining the middle class through schools and housing programs

Spatial Behavior in Haredi Jewish Communities in Great Britain Shlomit Flint Ashery, 2019-09-25 This book focuses on the strict orthodox Jewish Haredi community which comprises many sects whose communal identity plays a central role in everyday life and spatial organization The research reveals and analyses powerful mechanisms of residential segregation acting at the apartment building and near neighbourhood levels Identifying the main engines of spontaneous and organised neighbourhood change and evaluating the difficulties of liberalism dealing with non autonomous individuals in the housing market sheds light on similar processes occurring in other city centres with diverse population groups Highlighting the impact of various organisational levels on the spatial structure of the urban enclave the book focuses on the internal dynamics of ethno religious enclaves that emerge from three levels of action 1 individuals relationships with their own and other groups 2 the community leadership s powers within the group and in respect of other groups and 3 government directives and tools e g planning The study examines how different levels of communal organisation are reflected in the residential patterns of four British communities the Litvish communities of Golders Green and Gateshead and the Hassidic communities of Stamford Hill and Canvey Island
