Resistance Rebellion And Consciousness In The An:

Resistance, Rebellion, and Consciousness in the Andean Peasant World, 18th to 20th Centuries Steve J. Stern, 1987 The contributors historians and anthropologists from a number of countries move beyond the traditional structural analysis of society to a finer understanding of people as actors Native Andean initiatives and consciousness are clearly placed at the center of this inquiry which merges the best methods of history and anthropology Stern begins with a vigorously argued theoretical essay in which he identifies major findings and arguments running throughout the book demonstrates their pertinence to the more general field of peasant studies and draws out the implications for theory and method He reappraises the role of peasant consciousness and political horizons and the significance of ethnic factors in explaining peasant consciousness and revolt The case studies themselves revamp the history of Andean peasant rebellion and consciousness in Peru and Bolivia This is accomplished by studying violent uprisings as transitional moments within a long term trajectory embracing varied forms of resistance and by scrutinizing closely the ideological and cultural aspects of domination political legitimacy and rebellion The results sharply alter our understanding of three major historical problems the crisis of Spanish colonial rule and the outbreak of native Andean insurrection in the eighteenth century the response to peasants to creole wars and nation building efforts in the nineteenth century and the political strategies and dilemmas of Andean peasants in the context of populist and radical politics in the twentieth century *Native Insurgencies and the Genocidal Impulse in the Americas* Nicholas A. Robins, 2005-10-26 This book investigates three Indian revolts in the Americas the 1680 uprising of the Pueblo Indians against the Spanish the Great Rebellion in Bolivia 1780-82 and the Caste War of Yucatan that began in 1849 and was not finally crushed until 1903 Nicholas A Robins examines their causes course nature leadership and goals He finds common features they were revitalization movements that were both millenarian and exterminatory in their means and objectives they sought to restore native rule and traditions to their societies and they were movements born of despair and oppression that were sustained by the belief that they would witness the dawning of a new age His work underscores the link that may be found but is not inherent between genocide millennialism and revitalization movements in Latin America during the colonial and early national periods *Resistance, Rebellion, and Consciousness in the Andean Peasant World, 18th to 20th Centuries* Steve J. Stern, 2022 In *The Postcolonial State in Africa* Crawford Young offers an informed and authoritative comparative overview of fifty years of African independence drawing on his decades of research and first hand experience on the African continent Young identifies three cycles of hope and disappointment common to many of the African states including those in North Africa over the last half century initial euphoria at independence in the 1960s followed by disillusionment with a lapse into single party autocracies and military rule a period of renewed confidence radicalization and ambitious state expansion in the 1970s preceding state crisis and even failure in the disastrous 1980s and a phase of reborn optimism during the continental wave of democratization beginning around 1990 He

explores in depth the many African civil wars especially those since 1990 and three key tracks of identity Africanism territorial nationalism and ethnicity Only more recently Young argues have the paths of the fifty three African states begun to diverge more dramatically with some leading to liberalization and others to political social and economic collapse outcomes impossible to predict at the outset of independence This book is the best volume to date on the politics of the last 50 years of African independence International Affairs The book shares Young s encyclopedic knowledge of African politics providing in a single volume a comprehensive rendering of the first 50 years of independence The book is sprinkled with anecdotes from his vast experience in Africa and that of his many students and quotations from all of the relevant literature published over the past five decades Students and scholars of African politics alike will benefit immensely from and enjoy reading The Postcolonial State in Africa Political Science Quarterly The study of African politics will continue to be enriched if practitioners pay homage to the erudition and the nobility of spirit that has anchored the engagement of this most esteemed doyen of Africanists with the continent African History Review The book s strongest attribute is the careful way that comparative political theory is woven into historical storytelling throughout the text Written with great clarity even for all its detail and its interwoven use of theory makes it a great choice for new students of African studies Australasian Review of African Studies

The Shining Path of Peru NA NA,2016-04-30 This is the first book in English to provide a truly comprehensive view of Shining Path Sendero Luminoso a major guerilla movement in Peru Sendero s Maoist principles first begin in the 1960s with a small band of supporters and no attention from the outside world but later emerged as the most radical and dogmatic expression of Marxist revolution in the Hemisphere

Colonial and Postcolonial Change in Mesoamerica Rani T. Alexander,Susan Kepecs,2018-11-01 This book offers a new account of human interaction and culture change for Mesoamerica that connects the present to the past Social histories that assess the cultural upheavals between the Spanish invasion of Mesoamerica and the ethnographic present overlook the archaeological record with its unique capacity to link local practices to global processes To fill this gap the authors weigh the material manifestations of the colonial and postcolonial trajectory in light of local regional and global historical processes that have unfolded over the last five hundred years Research on a suite of issues economic history production of commodities agrarian change resistance religious shifts and sociocultural identity demonstrates that the often shocking patterns observed today are historically contingent and culturally mediated and therefore explainable This book belongs to a new wave of scholarship that renders the past immediately relevant to the present which Alexander and Kepecs see as one of archaeology s most crucial goals

reflects on the ways gender shapes relationships among subjects research and representation *Between Reform and Revolution* Linda J. Seligmann,1995 This is the story of one of the most ambitious agrarian reforms in Latin American history The book argues that the economic political and cultural dynamics set in motion by the reforms are central to understanding the brutal civil war that ensued in Peru between the state and the Maoist Leninist Shining Path guerilla movement **A World History of Tax Rebellions** David F. Burg,2004-06-01 A World History of Tax Rebellions is an exhaustive reference source for over 4 300 years of riots rebellions protests and war triggered by abusive taxation and tax collecting systems around the world Each of the chronologically arranged entries focuses on a specific historical event analyzing its roots and socio economic context **Transactions of the Royal Historical Society: Volume 8** Royal Historical Society,1999-02-04 Volume 8 of The Royal Historical Society Transactions contains essays based around the theme identities and empires The Human Tradition in Mexico Jeffrey M. Pilcher,2003 Table of contents **The Oxford Handbook of Latin American History** Jose C. Moya,2011 This Oxford Handbook comprehensively examines the field of Latin American history **The Time of Freedom** Cindy Forster,2012-01-11 The time of freedom was the name that plantation workers campesinos gave to Guatemala s national revolution of 1944 1954 Cindy Forster reveals the critical role played by the poor in organizing and sustaining this period of reform Through court records labor and agrarian ministry archives and oral histories Forster demonstrates how labor conflict on the plantations prepared the ground for national reforms that are usually credited to urban politicians She focuses on two plantation zones that generated exceptional momentum the coffee belt in the highlands around San Marcos and the United Fruit Company s banana groves near Tiquisate Although these regions were unlike in size and complexity language and race popular culture and work patterns both erupted with demands for workers rights and economic justice shortly after the fall of Casta eda in 1944 A welcome balance to the standard top down histories of the revolution Forster s sophisticated analysis demonstrates how campesinos changed the course of the urban revolution By establishing the context of grassroots mobilization she substantially alters the conventional view of the entire revolution and particularly the reforms enacted under President Albenz **We are an Indian Nation** Jeffrey P. Shepherd,2010-04-15 Though not as well known as the U S military campaigns against the Apache the ethnic warfare conducted against indigenous people of the Colorado River basin was equally devastating In less than twenty five years after first encountering Anglos the Hualapais had lost more than half their population and nearly all their land and found themselves consigned to a reservation This book focuses on the historical construction of the Hualapai Nation in the face of modern American colonialism Drawing on archival research interviews and participant observation Jeffrey Shepherd describes how thirteen bands of extended families known as The Pai confronted American colonialism and in the process recast themselves as a modern Indigenous nation Shepherd shows that Hualapai nation building was a complex process shaped by band identities competing visions of the past creative reactions to modernity and resistance to state power He analyzes how the Hualapais

transformed an externally imposed tribal identity through nationalist discourses of protecting aboriginal territory and he examines how that discourse strengthened the Hualapais claim to land and water while simultaneously reifying a politicized version of their own history Along the way he sheds new light on familiar topics Indian white conflict the creation of tribal government wage labor federal policy and Native activism by applying theories of race space historical memory and decolonization Drawing on recent work in American Indian history and Native American studies Shepherd shows how the Hualapai have strived to reclaim a distinct identity and culture in the face of ongoing colonialism We Are an Indian Nation is grounded in Hualapai voices and agendas while simultaneously situating their history in the larger tapestry of Native peoples confrontations with colonialism and modernity

Genocides by the Oppressed Nicholas A. Robins, Adam Jones, 2009-05-12
In the last two decades the field of comparative genocide studies has produced an increasingly rich literature on the targeting of various groups for extermination and other atrocities throughout history and around the contemporary world However the phenomenon of genocides by the oppressed that is retributive genocidal actions carried out by subaltern actors has received almost no attention The prominence in such genocides of non state actors combined with the perceived moral ambiguities of retributive genocide that arise in analyzing genocidal acts from below have so far eluded serious investigation Genocides by the Oppressed addresses this oversight opening the subject of subaltern genocide for exploration by scholars of genocide ethnic conflict and human rights Focusing on case studies of such genocide the contributors explore its sociological anthropological psychological symbolic and normative dimensions
