The Building and Breaking of Peace Molly M. Melin,2021 Private corporations are rarely discussed as playing a role in efforts to curb civil violence even though they often have strong interests in maintaining stability Violence often damages the infrastructure necessary to deliver goods to market or may directly target companies Corporations also have a normative obligation to conduct business in ways that promote peace While there are historical examples of firm instigated violence and firms reaping benefits from instability and conflict there is also evidence that corporations proactively engage in peacebuilding For example firms devise programs to promote economic development offer access to education and employ former combatants In *The Building and Breaking of Peace* Molly M Melin develops a theory of the conflicting roles corporations play in both building and preventing peace Melin shows that corporations engage in peacebuilding when there is a gap in the state s capacity to enforce laws but they also weigh the opportunity costs of peacebuilding responding to the need for action when conditions enable them to do so Firms are uniquely situated in their ability to raise the cost of violence and proactive firms can increase the years of peace in a country At the same time an active private sector can make it harder for states with ongoing conflict to reach an agreement as they act as an additional veto player in the bargaining process Including original cross national data of peacebuilding efforts by firms in Latin America the Middle East and Africa from 2000 to 2018 and in depth case analyses of corporate actions and outcomes in Colombia Northern Ireland and Tunisia Melin shows that corporations help to prevent violence but not resolve it In examining the corporate motives for peacebuilding and the implications of these activities for preventing violence and conflict resolution the book builds a more holistic picture of the peace and conflict process The findings also help explain why armed civil conflicts persist despite the multitude of diverse actors working to end them *Resources in Education* ,1997 *Justice in Conflict* Mark Kersten,2016-08-04 What

happens when the international community simultaneously pursues peace and justice in response to ongoing conflicts What are the effects of interventions by the International Criminal Court ICC on the wars in which the institution intervenes Is holding perpetrators of mass atrocities accountable a help or hindrance to conflict resolution This book offers an in depth examination of the effects of interventions by the ICC on peace justice and conflict processes The peace versus justice debate wherein it is argued that the ICC has either positive or negative effects on peace has spawned in response to the Court s propensity to intervene in conflicts as they still rage This book is a response to and a critical engagement with this debate Building on theoretical and analytical insights from the fields of conflict and peace studies conflict resolution and negotiation theory the book develops a novel analytical framework to study the Court s effects on peace justice and conflict processes This framework is applied to two cases Libya and northern Uganda Drawing on extensive fieldwork the core of the book examines the empirical effects of the ICC on each case The book also examines why the ICC has the effects that it does delineating the relationship between the interests of states that refer situations to the Court and the ICC s institutional interests arguing that the negotiation of these interests determines which side of a conflict the ICC targets and thus its effects on peace justice and conflict processes While the effects of the ICC s interventions are ultimately and inevitably mixed the book makes a unique contribution to the empirical record on ICC interventions and presents a novel and sophisticated means of studying analyzing and understanding the effects of the Court s interventions in Libya northern Uganda and beyond

Historical Origins of International Criminal Law Morten Bergsmo, CHEAH Wui Ling, YI Ping, 2014-12-12 The historical origins of international criminal law go beyond the key trials of Nuremberg and Tokyo but remain a topic that has not received comprehensive and systematic treatment This anthology aims to address this lacuna by examining trials proceedings legal instruments and publications that may be said to be the building blocks of contemporary international criminal law It aspires to generate new knowledge broaden the common hinterland to international criminal law and further develop this relatively young discipline of international law The anthology and research project also seek to question our fundamental assumptions of international criminal law by going beyond the geographical cultural and temporal limits set by the traditional narratives of its history and by questioning the roots of its substance process and institutions Ultimately we hope to raise awareness and generate further discussion about the historical and intellectual origins of international criminal law and its social function The contributions
