Respiratory Function In Speech And Song:

Respiratory Function in Speech and Song Thomas J. Hixon, 1987 *Respiratory Function in Singing* Thomas J. Hixon, 2006 *The Management of Voice Disorders* M. D. Morrison, Hamish Nichol, Linda Rammage, 2013-11-11 There has been a tremendous growth of interest in the human voice and its disorders during the past decade. This has led to the development of a variety of voice labs or voice clinics that are able to offer unique interdisciplinary assessment and treatment facilities. To cover all the bases the voice care team requires input from laryngology, speech language pathology, psychiatry, neurology, voice science, music pedagogy, biomedical engineering, and other peripheral fields. Because of the multidisciplinary nature of voice clinics, there have been a number of books written that address our subject from different professional perspectives. These tend to be multi-authored works that draw on expertise from around the world, such as a laryngologist from New York, a speech pathologist from Toronto, etc. All are colleagues that share similar interests but never actually share the management problems of the same patients. This book has been planned and written by the members of a single voice clinic. It is our hope that it will reflect a singleness of direction and purpose in the way it presents our approach to a complex topic. Because of our regular interactive meetings over problem patients in which we debate the meaning of our observations, the evolution of etiological classification systems, and the rationale for particular therapy approaches, we feel that we have become a team that is greater than the sum of its parts and that there is value in sharing our cumulative thoughts with others. This is not simply a laryngology text for laryngologists.

Respiratory Muscle Strength Training Christine Sapienza, Bari Hoffman, 2020-12-18 Respiratory Muscle Strength Training is a clinical guide intended to provide clinicians with the background information they need to understand respiratory muscle strength training (RMST). With a variety of case studies provided by well-known authors and clinicians, this text acts as a guidebook to the RMST protocol and provides practical information for use in the field of healthcare. In addition to real-world case studies, Respiratory Muscle Strength Training includes a chapter devoted to Frequently Asked Questions, a representative sample of the devices commonly used for respiratory training, and instructions for using them in patient care.

[The Oxford Handbook of Singing](#) Graham Welch, David Howard, John Nix, 2019-04-04 Singing has been a characteristic behaviour of humanity across several millennia. Chorus America 2009 estimated that 42.6 million adults and children regularly sing in one of 270,000 choruses in the US, representing more than 1.5 households. Similarly, recent European-based data suggest that more than 37 million adults take part in group singing. The Oxford Handbook of Singing is a landmark text on this topic. It is a comprehensive resource for anyone who wishes to know more about the pluralistic nature of singing. In part, the narrative adopts a lifespan approach, pre-cradle to senescence, to illustrate that singing is a commonplace behaviour which is an essential characteristic of our humanity. In the overall design of the Handbook, the chapter contents have been clustered into eight main sections embracing fifty-three chapters by seventy-two authors drawn from across the world, with each chapter illustrating and

illuminating a particular aspect of singing Offering a multi disciplinary perspective embracing the arts and humanities physical social and clinical sciences the book will be valuable for a broad audience within those fields *Bodily Charm* Linda Hutcheon, Michael Hutcheon, 2015-08-01 *Bodily Charm* is a passionate defense of opera as a living as well as live art Written for both the opera lover and the specialist by a physician and a literary critic it is an accessible and engaging interdisciplinary exploration of the operatic body both the actual physical bodies of the singers and audience members and the represented body on stage in operas such as *Death in Venice* *Salome* *Rigoletto* *Der Ring des Nibelungen* and *Elektra*
