Fundamentals of Media Effects Jennings

Bryant, Susan Thompson, Bruce W. Finklea, 2012-05-03 Mass medias potential to influence audience beliefs and behavior is a subject that has long fascinated scholars and the general public The ongoing interest and concern are reflected in the common tendency to blame the media for many of societys problems This extensively revised and updated edition cuts through popular notions of presumed effects to provide a balanced informed up to date treatment of the media effects literature The clear compelling presentation illuminated by dozens of new photographs equips readers with a fundamental understanding of the history theoretical underpinnings and current status of media effects research knowledge that will help them navigate in a media saturated environment Several outstanding elements distinguish the Second Edition of Fundamentals of Media Effects New chapters explore the impact of computer video games the effects of the Internet and social networking sites and the way mobile communication devices have transformed the way we live An extensive new chapter on childrens educational television describes the considerable body of research that supports positive effects like language development and flexible thinking skills Framing studies are covered in a separate chapter where they are distinguished both theoretically and experimentally from agenda setting and priming Finally the authors provide overviews of classic and current research studies in an invaluable feature called Research Spotlight which enable readers to envision how theories translate into research

Suspense Peter Vorderer, Hans Jurgen Wulff, Mike Friedrichsen, 2013-12-16 This volume begins with the general assumption that suspense is a major criterion for both an audience s selection and evaluation of entertaining media offerings This assumption is supported not only by the popularity of suspenseful narratives but also by the reasons users give for their actual choice of media contents Despite this there is no satisfying theory to describe and explain what suspense actually is how exactly it is caused by films or books and what kind of effect it has on audiences This book s main objective is to provide that theory by bringing together scholars from different disciplines who are working on the issue The editors goal is to reflect the state of the art as much as it is to highlight and encourage further developments in this area There are two ways of approaching the problem of describing and explaining suspense an analysis of suspenseful texts or the reception process Researchers who follow the more text oriented approach identify the uncertainty of the narrative outcome the threat or danger for the protagonist the play with time delay or other factors as important and necessary for the production of suspense The more reception oriented scholar focuses on the cognitive activities of audiences readers expectations the curiosity of onlookers their emotions and their relationships with the protagonists A correspondence between the two seems to be quite difficult though necessary to determine Both perspectives are important in order to describe and explain suspense Thus the editors utilize the thesis that suspense is an activity of the audience reader onlooker etc that is related to specific features and characteristics of the text books films etc Their question is What kind of relation The answer comes from finding out how why and which elements of the text cause effects that are experienced as suspense

Scholars from semiotics literary criticism cultural studies and film theory assess the problem from a text oriented point of view dealing primarily with the how and which Other scholars present the psychological perspective by focusing on the cognitive and emotional processes that underlie viewers experience of suspense that is the reception theory tries to answer the question of why suspenseful texts may be experienced as they are *Psychology of Entertainment* Jennings Bryant, Peter Vorderer, 2013-10-31 As entertainment becomes a trillion dollar a year industry worldwide as our modern era increasingly lives up to its label of the entertainment age and as economists begin to recognize that entertainment has become the driving force of the new world economy it is safe to say that scholars are beginning to take entertainment seriously The scholarly spin on entertainment has been manifested in traditional ways as well as innovative ones Representing the current state of theory and research *Psychology of Entertainment* promises to be the most comprehensive and up to date volume on entertainment It serves to define the new area of study and provides a theoretical spin for future work in the area Divided into three basic parts this book addresses the fundamental mechanisms and processes involved in orienting to and selecting entertainment fare as well as receiving and processing it explores the mechanisms and processes by which we are entertained by the media messages we select and receive and provides an opportunity for the application of well established as well as emerging psychological and psychobiological theories to be applied to the study of entertainment in ways that seldom have been utilized previously *Psychology of Entertainment* will appeal to scholars researchers and graduate students in media studies and mass communication psychology marketing and other areas contributing to the entertainment studies area

Audience Responses to Real Media Violence Mary Grace Antony, 2015-02-13 Audience Responses to Real Media Violence The Knockout Game considers an emerging and relatively overlooked area of media effects research user generated cellphone videos that feature real violence and its victims Focusing specifically on a recent sinister media trend known as the Knockout Game Mary Grace Antony explores how audiences respond to the victims in these videos How do we assess the realism of this violence And how do these evaluations of realism in turn influence our feelings of empathy and concern for the victims of violence The burgeoning abundance and availability to real media violence online makes these questions more relevant today than ever before and illustrates our complex responses to new and emerging media subgenres Mass Media Effects Research Raymond W. Preiss, 2007 Publisher description

Moving Images David Buckingham, 1996 Concerns about the effects of television on young children are a recurrent focus of public controversy Yet amid all the anxiety children s voices are rarely heard In this book one of Britain s leading television researchers investigates children s own perspectives on what they find frightening moving and upsetting From Nightmare on Elm Street to My Girl from The Colour Purple to The News at Ten what children find upsetting is often difficult to predict David Blackburn gives a detailed insight into children s responses to horror films to weepies and soap operas to news and to reality programmes He looks at how they learn to cope with their feelings about such material and how their parents help or hinder them in doing so This study offers

a new approach to studying the role of television in children's lives and should be of interest to parents and teachers as well as policy makers and educationalists

Willing Suspension of Disbelief Anthony J. Ferri, 2007-01-01 Samuel Taylor Coleridge's 1817 term a willing suspension of disbelief has survived and been used by film critics and others to describe what happens when a movie viewer watches a movie While film scholars and professionals have alluded to the term in a parenthetical or tertiary manner this manuscript makes a definitive account for the concept and provides a contemporary analysis of the film viewing process from a variety of critical and empirical perspectives

Media, Children, and the Family Dolf Zillmann, Jennings Bryant, Aletha C. Huston, 2013-11-05 This book brings together a group of scholars to share findings and insights on the effects of media on children and family Their contributions reflect not only widely divergent political orientations and value systems but also three distinct domains of inquiry into human motivation and behavior social scientific psychodynamic or psychoanalytical and clinical practice Each of these three domains is privy to important evidence and insights that need to transcend epistemological and methodological boundaries if understanding of the subject is to improve dramatically In keeping with this notion the editors asked the authors to go beyond a summary of findings and lend additional distinction to the book by applying the binoculars of their particular perspective and offering suggestions as to the implications of their findings One of the goals of the conference that resulted in this book was consensus building in the area of media and family From examining the findings and insights of a diverse group of scholars it seems that consensus building in several areas is a distinct possibility Addressing the concerns of educators about the influence of the mass media of communication entertainment programs in particular on children and the welfare of the nuclear family this volume projects directions for superior programming especially for educational television The influence of sex and violence on children and adults is given much attention and the development of moral judgment and sexual expectations among other things is explored The critical analysis of media effects includes examination of positive contributions of the media such as the search for missing children and exemplary educational programs

Communication and Emotion Jennings Bryant, David R. Roskos-Ewoldsen, Joanne Cantor, 2003-05-14 This collection serves two important functions it synthesizes theory and research in the vital and vibrant area of communication and emotion and it highlights the scholarly work and contributions of Dolf Zillmann the preeminent contributor to this area of inquiry As one of the most productive and influential scholars in the annals of communication inquiry Zillmann is well known for his contributions in the areas of communication emotion media effects and aggression Editors Jennings Bryant David Roskos Ewoldsen and Joanne Cantor have collected groundbreaking essays from scholars active in the field all of whom studied under or worked with Zillmann during his exemplary career The contributions included here acknowledge the significance of Zillmann's work and identify many of the intellectual streams that contributed to his scholarship Utilizing both psychology and communication perspectives this volume covers the current literature in communication and emotion with a focus on key theories media effects and entertainment theory As a

comprehensive synthesis of theory and research in communication and emotion it will be of great interest to scholars in communication theory cognitive and social psychology and psychophysiology With a concluding state of the art chapter by Dolf Zillmann himself this volume offers a thorough and distinctive examination of communication and emotion scholarship and it will serve as an invaluable resource for current and future generations of scholars **Television and Political**

Advertising Frank Biocca, 2014-02-04 This volume represents one of the first major scholarly efforts to unravel the psychological and symbolic processing of political advertising Utilizing survey experimental qualitative and semiotic methodologies to study this phenomenon the contributors to Television and Political Advertising trace how political ads help to interpret the psychological reality of the presidential campaign in the minds of millions of voters A product of the National Political Advertising Research Project this interdisciplinary effort is valuable to researchers in advertising communication and consumer psychology since it helps define future work on the relationship between television politics and the mind of the voter This volume Television and Political Advertising Signs Codes and Images is the second of two and covers such areas as Generating Meaning in the Pursuit of Power Analyses of the Meaning of Political Ads The Campaign Documentary as an Ad and Regulating Signs and Images **Horror Films** James B. Weaver, Ron Tamborini, 2013-11-05 Why do so many of us enjoy being told frightening stories What are some of the consequences that result from such exposure In light of the considerable popularity of horror films over the last three decades these questions have become the focus of growing attention for many scholars However research on audience preferences for and reactions to horror films has been performed eclectically by investigators from varied theoretical and methodological backgrounds As a result the information has not been effectively integrated This volume was written to address this problem and to position the study of audience responses to frightening fiction as a significant research topic
