Adolescents, Media, and the Law Roger J. R. Levesque, 2007-06-18 There is much controversy about the dangers of a free media when it comes to children and adolescents Many believe that this constitutional right should be amended altered or revoked entirely to prevent the young from being negatively influenced Graphic violence sexual content and the depiction of cigarette smoking have all come under fire as being unacceptable in media that is geared toward adolescents from television and movies to magazines and advertising Yet not much has been written about the developmental science behind these ideas and what effects a free media really has on adolescents This book presents a synthesis of all current knowledge about the developmental effects of a free media on adolescents Levesque first presents a full analysis of research studies into the media s effects on adolescents in four key areas sexuality violence smoking and body image All findings are assessed within the context of normal adolescent development Levesque then discusses how this knowledge can be used to inform current standards for the regulation of free speech with regard to adolescents Both legal restrictions and less formal regulatory bodies schools parent groups etc are reviewed to present a full picture of the ways in which a free media is constrained to protect adolescent s development

Dangerous Adolescents, Model Adolescents Roger J.R. Levesque, 2005-12-27 Teachers make a difference As someone who grew up in one of the poorest and rural areas of a poor state and ended up attending elite graduate and professional schools I have much to credit my public school teachers My teachers sure struggled much to teach an amazingly wide variety of students from different backgrounds abilities and hopes Given that reality which undoubtedly repeats itself across the United States and globe one would think that I should be quite hesitant to criticize a system that produces countless grateful students and productive citizens I agree The pages that follow surely can be perceived as yet another attack on already much maligned schools that do produce impressive outcomes despite their limited resources increased obligations and the sustained barrage of attacks from competing interest groups Some may even view the text as an affront to the inalienable rights of parents to raise their children as they see fit Others surely could understand the analysis as another assault on our decentralized legal and school systems that should retain the right to balance the needs of communities parents schools and students I clearly did not intend and do not see the ultimate result as yet another diatribe on the manner teachers parents and communities treat students

Therapeutic Practice in Schools Volume Two The Contemporary Adolescent Lyn French,Reva Klein,2014-07-17 In common with Therapeutic Practice in Schools Working with the Child Within Routledge 2012 this second volume serves as a practical handbook for school based counsellors psychotherapists arts therapists and play therapists working with young people Written in accessible language it is eminently applicable to the practice of both qualified and trainee therapists Therapeutic Practice in Schools The Contemporary Adolescent begins with

an overview of key psychoanalytic ideas informing our understanding of adolescence before moving on to focus on life circumstances and issues which commonly bring young people to the therapist's consulting room in the school. Dedicated chapters on key themes including identity, relationships, sex and sexuality, anger, issues, self-harm, bereavement and bullying aim to deepen our understanding of the adolescent experience while also providing the therapist with invaluable insights into what one might say in the here and now of the session. Chapter authors, all with considerable experience in the field, discuss approaches to sustaining the therapeutic relationship in the face of ambivalence or defiant resistance as well as thinking about the impact of social media on all aspects of adolescent development. The advantages and limitations of working with adolescents in the educational setting, where school staff will have their own reasons for referring students for therapy while the young people themselves might come with a very different agenda, are also covered. It is widely acknowledged that engaging troubled or troublesome adolescents in therapy can make an enormous difference to their lives. This book ensures that both trainee and qualified therapists are supported in the often daunting yet ever stimulating and enlivening task of working with young people in the school setting.
