

# LEARNING THEORIES

## DEFINITION

Learning theories are frameworks that explain how people acquire and retain knowledge. They provide a systematic way to understand how individuals process and respond to new information. Different theories focus on different aspects of the learning process, such as cognitive, behavioral, and constructivist approaches.

## EXAMPLE

One example of a learning theory is behaviorism, which focuses on observable and measurable behaviors. This theory suggests that learning occurs through the reinforcement or punishment of certain actions. For example, in a classroom setting, a student may receive praise or a good grade for completing a task correctly, reinforcing the behavior of completing tasks.

John Quay, Jennifer Bleazby, Steven Stolz, Maurizio Toscano, R. Scott Webster, 2018-04-09 The issue of methodology is a fundamental concern for all who engage in educational research. Presenting a series of methodological dialogues between eminent education researchers including Michael Apple, Gert Biesta, Penny Enslin, John Hattie, Nel Noddings, Michael Peters, Richard Pring and Paul Smeyers, this book explores the ways in which they have chosen and developed research methods to style their investigations and frame their arguments. These dialogues address the specialized and technical aspects of conducting educational research, conceptualize the relationship between methodology and theory and provide in-depth discussion of concerns including falsifiability, openness, interpretation and researcher judgement. Foregrounding the researchers' first-hand experience and knowledge, this book will provide future and current researchers with a deeper comprehension of the place of theory in education research. An illuminating resource for undergraduate and postgraduate researchers alike, **Theory and Philosophy in Education Research** confronts the intricate complexities of conducting education research in a highly engaging and accessible way. **Higher Education: Handbook of Theory and Research**
