The Anatomy of Melancholy Robert Burton, 1927

Reading Ruskin's Cultural Heritage Gill Chitty, 2023-04-28

John Ruskin's critical commentary on culture and society transformative in his own time established him as a leading critic of the 19th century. His prescient thinking resonates powerfully with today's issues in cultural heritage conservation. This volume presents his ideas in context, key extracts from his works and future directions for his foundational ideas. Ruskin's passionate responses to the environmental and social changes of his day chime with contemporary ideas on themes like sustainability, ethical production and environmentalism. Though widely recognised as a key figure in preservation history, his heritage work is rarely appreciated in full context and breadth. This volume presents six stimulating essays on Ruskin's readership and reception, his transformative perceptions of heritage futures and provocative writing on cultural landscapes and the arts and crafts. Extracts from both well-known and lesser-known works accompany each chapter to reflect the distinctive vocal quality of his texts, from his writing on architecture and buildings to landscape and cultural heritage. The volume offers a richer description of cultural context and meaning than usually afforded to Ruskin's work in conservation and critical heritage studies, finding its resonance and relevance. Written for an academic and professional audience in heritage studies and historic building conservation and particularly relevant for cultural heritage management, this is a core text and reference work for undergraduate and postgraduate students in history of art and architecture, heritage studies and architectural building conservation, also central to interests of cultural historians and scholars of nineteenth-century Victorian history and literature.

The Anatomy of Melancholy, what it Is, with All the Kinds, Causes, Symptomes, Prognostickes, & Several Cures of It. In Three Partitions, Philosophically, Medicinally, Historically, Opened and Cut Up

Robert Burton, 1927

The Royal Abbey of Reading Ron Baxter, 2016. First full-length survey of Reading Abbey, one of the most important ecclesiastical buildings of the Middle Ages. Reading Abbey was built by King Henry I to be a great architectural statement and his own mausoleum as well as a place of resort and a staging point for royal itineraries for progresses in the west and south-west of England. From the start it was envisaged as a monastic site with a high degree of independence from the church hierarchy; it was granted enormous holdings of land and major religious relics to attract visitors and pilgrims, and no expense was spared in providing a church comparable in size and splendour with anything else in England. However, in architectural terms the abbey has until recently remained enigmatic, mainly because of the efficiency with which it was destroyed at the Reformation. Only recently has it become possible to bring together the scattered evidence, antiquarian drawings and historic records, along with a new survey of the standing remains, into a coherent picture. This richly illustrated volume provides the first full account of the abbey from foundation to dissolution and offers a new virtual reconstruction of the church and its cloister; it also shows how the abbey formed the backdrop to many key historical events. Ron Baxter is the Research Director of the Corpus of Romanesque Sculpture in Britain and Ireland.
