

HOW TO: RESTORE CORROSION RESISTANCE TO WELDS AND POWDER COATING.

PROBLEM:

When welding galvanized tubing, heat can vaporize the protective zinc coating near the weld. The remaining zinc provides some protection, but the zinc-free area will rust. This also applies to the interior diameter (ID) of the tube.

SOLUTION:

Zinc-rich paints and cold galvanizing compounds restore corrosion protection to the weld areas on **both the ID and OD**, with varied application methods.

Be sure to take the proper steps when cleaning the surface of weld slag and oil to insure a strong mechanical bond. For more details on this, ask for our booklet "**Restoring Corrosion Protection**".

Cold Galvanizing for Powder Coating Applications

Painting or powder coating over zinc increases the rust-free product life by **up to 5 times**. For customers who powder coat – and want additional corrosion protection in the weld zones – **cold galvanizing compounds** are available. These are both **heat resistant** (up to 750° F) and **act as a primer** for powder coating.

Concrete Repair, Rehabilitation and Retrofitting II Mark G. Alexander,Hans-Dieter Beushausen, Frank Dehn,Pilate Moyo,2008-11-13 The Second International Conference on Concrete Repair Rehabilitation and Retrofitting ICCRRR 2005 was held in Cape Town South Africa from 24 26 November 2008 The Conference followed the very successful First International Conference also in Cape Town in 2005 and continued as a collaborative venture by researchers from the South African Research Programme in Concrete Materials based at the Universities of Cape Town and The Witwatersrand and The Construction Materials Sections at Leipzig University and MFPA Leipzig in Germany The background in industry and the state of national infrastructures continues to be highly challenging and demanding The facts remain that much of our concrete infrastructure deteriorates at unacceptable rates that we need appropriate tools and techniques to undertake the vast task of sound repair maintenance and rehabilitation of such infrastructure and that all this must be undertaken with due cognisance of the limited budgets available for such work New ways need to be found to extend the useful life of concrete structures cost effectively Confidence in concrete as a viable construction material into the 21st century needs to be retained and sustained particularly considering the environmental challenges that the industry and society now face The conference proceedings contain papers presented at the conference and classified into a total of 12 sub themes which can be grouped under the three main themes of i Concrete durability aspects ii Condition assessment of concrete structures and iii Concrete repair rehabilitation and retrofitting The major interests in terms of submissions exists in the fields of innovative materials for durable concrete construction integrated service life modelling of reinforced concrete structures NDE NDT and measurement techniques

repair methods and materials and structural strengthening and retrofitting techniques The large number of high quality papers presented and the wide range of relevant topics covered confirm that these proceedings will be a valued reference for many working in the important fields of concrete durability and repair and that they will form a suitable base for discussion and provide suggestions for future development and research

Advances in the Bonded Composite Repair of Metallic Aircraft Structure A.A. Baker,L.R.F. Rose,Rhys Jones,2003-01-23 The availability of efficient and cost effective technologies to repair or extend the life of aging military airframes is becoming a critical requirement in most countries around the world as new aircraft becoming prohibitively expensive and defence budgets shrink To a lesser extent a similar situation is arising with civil aircraft with falling revenues and the high cost of replacement aircraft This book looks at repair reinforcement technology which is based on the use of adhesively bonded fibre composite patches or doublers and can provide cost effective life extension in many situations From the scientific and engineering viewpoint whilst simple in concept this technology can be quite challenging particularly when used to repair primary structure This is due to it being based on interrelated inputs from the fields of aircraft design solid mechanics fibre composites structural adhesive bonding fracture mechanics and metal fatigue The technologies of non destructive inspection NDI and more recently smart materials are also included Operational issues are equally critical including airworthiness certification application technology including health and safety issues and training Including contributions from leading experts in Canada UK USA and Australia this book discusses most of these issues and the latest developments Most importantly it contains real histories of application of this technology to both military and civil aircraft

Corrosion Mitigation Coatings Ashish Kumar,Chandrabhan Verma,Abhinay Thakur,2023-11-06 Experience the eco friendly breakthrough in corrosion mitigation through functionalized thin film coatings This book delves deep into the cutting edge advancements in synthesizing and applying functionalized thin film coatings to safeguard metals and alloys by replacing commercially available toxic inhibitors It includes an overview of properties applications and methodologies to detect and inhibit corrosion

Corrosion of Steel in Concrete Luca Bertolini,Bernhard Elsener,Pietro Pedferri,Elena Redaelli,Rob B. Polder,2013-02-26 Steel reinforced concrete is used ubiquitously as a building material due to its unique combination of the high compressive strength of concrete and the high tensile strength of steel Therefore reinforced concrete is an ideal composite material that is used for a wide range of applications in structural engineering such as buildings bridges tunnels harbor quays foundations tanks and pipes To ensure durability of these structures however measures must be taken to prevent diagnose and if necessary repair damage to the material especially due to corrosion of the steel reinforcement The book examines the different aspects of corrosion of steel in concrete starting from basic and essential mechanisms of the phenomenon moving up to practical consequences for designers contractors and owners both for new and existing reinforced and prestressed concrete structures It covers general aspects of corrosion and protection of reinforcement forms of attack in the presence of carbonation and chlorides problems

of hydrogen embrittlement as well as techniques of diagnosis monitoring and repair This second edition updates the contents with recent findings on the different topics considered and bibliographic references with particular attention to recent European standards This book is a self contained treatment for civil and construction engineers material scientists advanced students and architects concerned with the design and maintenance of reinforced concrete structures Readers will benefit from the knowledge tools and methods needed to understand corrosion in reinforced concrete and how to prevent it or keep it within acceptable limits

Concrete Repair Michael G. Grantham,2011-04-04 Concrete is an inherently complex material to produce and an even more complex material to repair With growing pressure to maintain the built environment and not simply to demolish and rebuild the need to repair concrete buildings and other structures is increasing and is expected to become of greater importance in the future This straightforward
