**Wetland and Riparian Restoration** Society for Ecological Restoration. Conference, 1997 *An International Perspective on Wetland Rehabilitation* W.J. Streever, 2012-12-06 Bill Streever author of Bringing Back the Wetlands and numerous technical articles

about wetland restoration and creation worked for two years to bring together this collection of papers Authors ranging from private landowners to government managers to scientists present regional overviews case studies and discussions of various issues Regional overviews cover areas as small as the Commonwealth of the Northern Mariana Islands to areas as large as Australia and Africa Case studies range from relatively small projects such as rehabilitation of damage caused by wheel ruts in the high arctic to much larger projects such as attempts to rehabilitate thousands of hectares of Northern Territory wetlands in Australia Seedbank ecology economics remote sensing community involvement the role of the wetland consulting industry and other issues are discussed In an effort to synthesize information from around the world Joy Zedler presents a model that allows comparison of projects and may lead to better predictability of project outcomes In An International Perspective on Wetland Rehabilitation authors describe planting engineered structures prescribed flooding excavation and other rehabilitation methods from Israel to New Zealand to the Netherlands and elsewhere For the first time one volume offers an impression of the magnitude and diversity of the field of wetland rehabilitation around the globe

**Bioindicators for Assessing Ecological Integrity of Prairie Wetlands** Paul R. Adamus,1996 National Management Measures to Protect and Restore Wetlands and Riparian Areas for the Abatement of Nonpoint Source Pollution ,2001 **Wetland Ecology** Paul A. Keddy,2010-07-29

This text provides a synthesis of the existing field of wetland ecology using a few central themes including key environmental factors that produce wetland community types and some unifying problems such as assembly rules restoration and conservation

**Integrating Landscape Ecology Into Natural Resource Management** Jianguo Liu,William W. Taylor,2002-08 The rapidly increasing global population has dramatically increased the demands for natural resources and has caused significant changes in quantity and quality of natural resources To achieve sustainable resource management it is essential to obtain insightful guidance from emerging disciplines such as landscape ecology This text addresses the links between landscape ecology and natural resource management These links are discussed in the context of various landscape types a diverse set of resources and a wide range of management issues A large number of landscape ecology concepts principles and methods are introduced Critical reviews of past management practices and a number of case studies are presented This text provides many guidelines for managing natural resources from a landscape perspective and offers useful suggestions for landscape ecologists to carry out research relevant to natural resource management In addition it will be an ideal supplemental text for graduate and advanced undergraduate ecology courses

**Wetland Creation, Restoration, and Conservation** W.J. Mitsch,2005-12-23 This book covers selected papers that were presented by participants at a Wetland Invitational held in Columbus Ohio USA in May 2003 They are divided by subject matter into four general categories 1 Restoration of a large river basin and delta 2 Long term wetland restoration 3 Creation of wetlands for mitigation of wetland loss 4 Conservation and restoration of the world s wetlands Provides key integrated long term assessments Covers a selection of the world s most significant wetlands Addresses management

approaches for wetland conservation creation and restoration      [The World's Largest Wetlands](#) Lauchlan H. Fraser, Paul A. Dale, Richard A. Haeuber, 2011-06-27 This volume applies ecological principles and guidelines to understand past and current land use and land management and more importantly endeavors to promote more ecologically sound approaches to future land use and management decisions The volume incorporates case studies from a wide variety of disciplines and perspectives The case studies explore past and current land use decisions on both public and private lands and include practical approaches and tools for land use decision making Perhaps the most important feature of the book is the linking of ecological theory and principle with applied land use decision making the theoretical and empirical are joined through concrete case studies of actual land use decision making processes In this volume readers will find a statement of fundamental ecological principles that are relevant for land use planning and management coupled with multiple in depth explorations of the application of these principles in action In addition most case studies describe specific tools and approaches for incorporating endeavors to join fundamental ecological knowledge with cutting edge application in order to both educate and provide concrete guidance for decision making The intended audience is broad and multidisciplinary from undergraduate and graduate level courses in environmental studies to professional land use planners      **The Natural Water Garden** Brooklyn Botanic Garden, 1997 Discusses natural water gardens and wetland ecology and explains how to plant and maintain different types of backyard wetlands      *The Biology of Freshwater Wetlands* Arnoud van der Valk, 2012-02-09 A combination of low oxygen levels and dense plant canopies present particular challenges for organisms living in this aquatic habitat      *Wetlands* Sharon L. Spray, Karen L. McGlothlin, 2004-02-16 The purpose of the Exploring Environmental Challenges A Multidisciplinary Approach series is to publish a collection of short texts that each explore a specific environmental issue and describe the methodologies theories and findings pertaining to that issue from both natural and social science perspectives Each text contains three natural science essays three social science essays and a concluding essay Intended for introductory environmental studies courses these balanced thoughtful and rigorous texts aim to provide students with a deeper understanding of the relationship between people and their environment and to serve as a foundation for further inquiry and discussion Wetlands introduces students to the natural ecological functions and policy issues of wetlands so they will have a solid understanding of why these ecosystems are necessary and why their governance remains a significant environmental challenge Although not a comprehensive overview on wetlands it does provide background material for a more comprehensive investigation into the science behind and the management of these ecosystems      **Creating Freshwater Wetlands** Donald A. Hammer, 2014-07-22 Creating Freshwater Wetlands Second Edition clearly demonstrates the step by step processes required to restore or create freshwater wetlands It presents practical advice on choosing sites getting help attracting and stocking
