Restoring Americas Failed Democracy:

The Failure of Democratic Nation Building: Ideology Meets Evolution A. Somit, S. Peterson, 2015-12-29 Throughout history authoritarian governments have outnumbered democratic ones to an overwhelming degree Even today true democracies are an exception In this book Somit and Peterson argue that the main reason for this pattern is that humans are social primates with an innate tendency for hierarchical and authoritarian social and political structures Democracy requires very special enabling conditions before it can be supported by a state conditions that require decades to evolve As a result attempts to export democracy through nation building to states without these enabling conditions are doomed to failure The authors argue that money and energy devoted to nation building around the globe by the U S would be better spent on problems facing the country domestically

preserving Freedom and opportunity for the individual justice for the masses a healthy environment a stable society and a vibrant economy is falling victim to the seemingly invincible juggernaut of Globalism The five cardinal prerogatives of a free people are all being surrendered with little debate and even less thought The rights of a sovereign people to formulate their own independent foreign policy to raise and command a national army to admit or exclude aliens to levy tariffs on goods of foreign manufacture and to coin their own money are under attack all over the world through such peculiar pretenders to legitimacy as the North American Free Trade Agreement NAFTA the General Agreement on Tariffs and Trade GATT and the European Union E U We no longer can even remember what makes a group of people into a nation A common culture a common heritage a common language shared goals shared sacrifice shared progress This book is a must read for our politicians on the left and on the right lest because of party politics America is made to give into a secondary role on the world stage of ruthless politics and demagoguery Contrary Destinies Leon D. Pamphile, 2017-03-15 Provides a wealth of information about the nature of American occupations in Haiti that can be useful to Latin American historians and political scientists interested in international relations between the United States and other countries in the region Leslie G Desmangles author of *The Faces of the Gods Vodou and Roman Catholicism in Haiti* Unpacks the cultural political and economic impact of U S occupation and by extension American imperialism in Haiti Quito Swan author of *Black Power in Bermuda The Struggle for Decolonization* In 1915 United States Marines arrived in Haiti to safeguard lives and property from the political instability of the time While there the Marine Corps controlled everything from finance to education from health care to public works and built an army La Garde d Haiti to maintain the changes it implemented Ultimately the decisions made by the United States about and for Haiti have indelibly shaped the development of what is generally considered the poorest country in the Western Hemisphere *Contrary Destinies* presents the story of the one hundred year relationship between the two countries Leon Pamphile chronicles the internal external and natural forces that have shaped Haiti as it is today striking a balance between the realities faced by the people on the island and the global and transnational contexts that affect their lives He examines how American policies towards the Caribbean nation during the Cold War and later as the United States became the sole world superpower and the legacies of the occupation contributed to the gradual erosion of Haitian independence culminating in a second occupation and the current United Nations peacekeeping mission Leon D Pamphile is founder and executive director of the Functional Literacy Ministry of Haiti He is the author of *Haitians and African Americans A Heritage of Tragedy and Hope* *An Unbroken Educational Apartheid Legacy* David E. Morgan Ph.D., 2015-03-17 This is a thought provoking book on the black white academic achievement gap in Chicago s predominantly black communities of color and what highly effective school boards can do to change it In this book the reader will be powerfully enlightened by a civil and human rights debate that calls for effective leadership in our schools beginning with effective school boards The primary agenda of effective school boards is raising student achievement performance levels and

engaging the school district community to attain that goal These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders Simultaneously it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago s south suburban communities of color In both highs and lows of awesome moments as educational reform leaders and school board members we are in a strategic leadership position to help school boards carry out their essential responsibilities for creating equity and excellence in public education In doing so highly effective school leaders can team with our school board leaders to lead our school district communities in preparing all students to succeed in a rapidly changing global society School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity Education is freedom In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery s peak numbers in 1860 this book addresses a subject that is critically essential timely and in need of immediate attention for the security success and ultimate survival of black America As the problems of the academic under achievement gap is addressed in this book it is also essential that school boards educators and community and national leaders accept reality to view the problem in its true perspective to contemplate it as it is in providing essential solutions toward removing limiting and limited school boards dysfunctions obstructions and other barriers to academic achievement in effective school board leadership Supporting educational excellence will thereby produce more African American scholars in mathematics science and in many other disciplines This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on Vision Standards Assessment Resource Alignment Climate Collaboration and Continuous Academic Improvement **Hubris, Self-Interest, and America's Failed War in Afghanistan** Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America s logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence

influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition s inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan s inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter s duration scale and cost America s leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough
