## **Restructuring The Labour Market Cambridge Studies In Sociology:**

*Restructuring the Labour Market* D. Ashton, M. Maguire, M. Spilsbury, 2016-07-27 This book represents an advance in our knowledge of the labour market For the first time it combines the analysis of both quantitative and qualitative data to produce an explanation of the main changes which have transformed the labour market during the recession For the first time it demonstrates the segmented character of the youth labour market and the significance of the local labour markets The result is a substantial contribution to labour market segmentation theory and to the analysis of social policy in this field

*The Vocational Quest* Helen Connell, Nicholas Lowe, Malcolm Skilbeck, Kirsten Tait, 2002-02-07 Government attempts in recent years to create a national system of vocational education and training have marked a profound shift both in educational policy and in underlying concepts of what education is for Relations between schools and the working world are changing all the time and the implementation of ideas of vocationalism has forced a blurring of the time honoured boundaries between educations concerned with concepts and training or with skills The challenge now is to define how the schools can give young people the foundations for life in a working world in which they are likely to have to change jobs and where work will fill a smaller proportion of their lives The Vocational Quest maps the evolution of vocationalism in Britain in historical terms and examines how the particular forms that have come into being in the last few years compare with developments in other parts of the world including Continental Europe Japan the United States Australia and New Zealand It argues for new forms of communication and partnership between formal education and training and the wider community in which values will be shared and no one partner will win at the expense of others

*Youth and Policy* Howard Williamson, 2019-06-04 First published in 1997 this volume is concerned primarily though not exclusively with one particular vulnerable group unqualified young men on the margins These young men whose cultures of machismo manualism and anti mentalism previously served to prepare them for the manual labour market are increasingly the careerless the jobless and the folk devils of the modern post industrial society In research they have received considerable attention though more for their capacity to be spectacular deviant and bizarre than through the deep anxieties and despondency about the future experienced by many Howard Williamson contends that the development of effective youth policy depends essentially upon a synthesis of political priorities professional agendas and young people s perspectives and responses While not quite an underclass many suffer from a tangle of pathologies which obstructs the possibility of them finding a way back into mainstream economic housing and relationship transitions

**Temporary Agency Work and Globalisation** Huiyan Fu,2016-03-03 Despite its geographic and industry expansion as part of the ongoing globalisation of service activity temporary agency work TAW is relatively understudied TAW is characterised by a distinct triangular structure where workers are typically hired by staffing or employment agencies while being dispatched to firms that use them as a type of temporary or non regular labour This agency mediated labour dispatching as a newly institutionalised industry has registered rapid growth rates over recent decades across vast swathes of the globe To a great degree TAW is part of a wider structural transformation of work and employment under neoliberalism Arguably controversy over the expanding non regular workforce is at its most acute when it comes to unsavoury labour selling practices In this connection TAW is an exemplary field in which to examine today s flexible capitalism and its concomitant phenomenon i e inequality Featuring holistic and interdisciplinary perspectives this edited collection provides a comprehensive overview of TAW in an international context It reveals how the TAW industry is intertwined with the changing relationship between the state corporations and labour unions at the institutional structural level and also the perceptions and experiences of ordinary workers in everyday practice By combining global and local forces macro and micro levels of analysis and theoretical and empirical investigations the book offers fresh insights into recurring issues of labour flexibility and inequality contributes to practical applications and facilitates fruitful cross national collaborations
