Tinkering toward Utopia David B. TYACK,Larry Cuban,David B Tyack,2009-06-30 For over a century Americans have translated their cultural anxieties and hopes into dramatic demands for educational reform Although policy talk has sounded a millennial tone the actual reforms have been gradual and incremental Tinkering toward Utopia documents the dynamic tension between Americans faith in education as a panacea and the moderate pace of change in educational practices In this book David Tyack and Larry Cuban explore some basic questions about the nature of educational reform Why have Americans come to believe that schooling has regressed Have educational reforms occurred in cycles and if so why Why has it been so difficult to change the basic institutional patterns of schooling What actually happened when reformers tried to reinvent schooling Tyack and Cuban argue that the ahistorical nature of most current reform proposals magnifies defects and understates the difficulty of changing the system Policy talk has alternated between lamentation and overconfidence The authors suggest that reformers today need to focus on ways to help teachers improve instruction from the inside out instead of decreeing change by remote control and that reformers must also keep in mind the democratic purposes that guide public education

Murphy, 2023-02-16 This book examines the evolution of schooling from bureaucracy and hierarchy to post industrial schools and places teachers leadership on center stage at the same time That is it asks teachers to deepen leadership in their classrooms and with other teachers The book carries education and schooling from formal control to a social influence process and addresses the deeply rooted difficulty of focusing too much energy on content It reveals the strong power of

internal and external context and helps educators implant the idea of the school not as a fixed immutable home but as a relatively deep social process. It shows how co leadership comes alive in schools. Communities of schooling is one of the three most critical developments in education in the last 140 years. When it is linked with the two other fundamental reorientations in schooling dispersed ownership and constructivist work it becomes the most powerful force in education since the 1700s. This book shows how communities of schooling replace the earlier pillars of learning as telling hierarchy of control and non democratic influence. The work also explains the meaning and understanding of school work as a social influence process where all school based educators exert power but at different levels. The idea of enhancing individual and collective capacity through interdependency shared work and collective responsibility is unpacked. Earl, 2004-08-02. explicit goal of using such data to improve practice Participatory evaluation is a natural suitable and effective approach to school improvement and educational change and has been practiced by the editors and several colleagues for many years Though participatory applied research strategies are growing in popularity there is a paucity of documented empirical support for the approach presenting a set of original empirical studies and a critical analysis of them this book will add to our knowledge about variations in the approach conditions that support it its viability within the culture of schools and school systems and its likely impact defined in terms of the use of research data and organisational learning The book will be useful for educational practitioners interested in critically evaluating the potential of participatory evaluation as an integral part of their own approach to educational reform It will also clarify an agenda for research to further our understanding of the organisational benefits of this type of collaborative systematic enquiry
