Resurgence Of The Real Body Nature And Place In Hypermodern World:

The Resurgence of the Real Charlene Spretnak, 2017-06-30 In this insightful beautifully written work one of America's most important feminist ecological thinkers reflects on the roots of modernity in Renaissance humanism the Reformation the Scientific Revolution and the Enlightenment Spretnak argues that an ecological postmodern ethos is emerging in the 1990s the creative cosmos and the complex sense of place Both a sharp critique and a graceful performance of the art of the possible The Resurgence of the Real changes the way we think about living in the modern world *Contemporary Perspectives on Ecofeminism* Mary Phillips, Nick Rumens, 2015-11-19 Why is ecofeminism still needed to address the environmental emergencies and challenges of our times Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment This book provides a much needed comprehensive overview of the relevance and value of using eco feminist theories It gives a broad coverage of traditional and emerging eco feminist theories and explores across a range of chapters their various contributions and uniquely spans various strands of ecofeminist thinking The origins of influential eco feminist theories are discussed including key themes and some of its leading figures contributors include Erika Cudworth Greta Gaard Trish Glazebrook and Niamh Moore and outlines its influence on how scholars might come to a more generative understanding of the natural environment The book examines eco feminism's potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world This timely volume makes a distinctive scholarly contribution and is a valuable resource for students and academics in the fields of environmentalism political ecology sustainability and nature resource management The Road from Empire to Eco-Democracy Gene Marshall, 2012-01-20 An examination of Social Awakening History Long Vision Holistic Social Understanding Strategies of Transformation As viewed by five United States Citizens in 2011 Lead author Gene Marshall with coauthors Ben Ball Marsha Buck Ken Kreutziger and Alan Richard Though vast changes are necessary we believe humanity can find a vision and plan of action that is both satisfying and realistic Our aim is to fertilize the fruitful imagination and courage it will require to walk this Road to Eco Democracy Wise insightful forthright systemic and clearly written with moments of special brilliance The framing of The Forces of Transformation and The Role and Limitations of Electoral Politics are particularly distinctive and useful contributions David Korten author of Agenda for a New Economy The Great Turning From Empire to Earth Community and When Corporations Rule the World I hope The Road is read and discussed by groups of friends and neighbors across the country Sidestepping the political stalemates of the day the authors name the basic problems facing our society explain why taking the long view is crucial but largely missing and propose the processes by which we might create an eco democracy Charlene Spretnak author of Relational Reality The Resurgence of the Real and States of Grace I was enormously cheered by The Road from Empire to

Eco Democracy which sets out a comprehensive menu of today's myths and why they must be revisited. In contrast these days I'm often depressed not so much by the disasters unfolding before eyes but rather by un-integrated non-systemic band-aid solutions which have become public policy staples. The Road neither trivializes the challenges nor tumbles into the trap of simplistic solutions. Yet beware the many proposals in the book are neither trivial nor easy.

The Future of Ecocriticism Serpil Oppermann, Ufuk Özdağ, Nevin Özkan, 2011-05-25 As we enter the second decade of the twenty-first century environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations. How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society's environmentally and socially destructive behaviors? The field of ecocriticism, also sometimes called environmental criticism, attempts to grapple with such issues. A branch of literary and cultural studies that essentially began in North America in the 1970s, ecocriticism is currently one of the most quickly developing areas of environmental research and teaching. *The Future of Ecocriticism: New Horizons* brings together thirty-two of the latest articles in the field, including work by some of the leading scholars from around the world. Although ecocriticism has been particularly active in North America, Western Europe, and East Asia, important studies of traditional environmental thought, environmental communication strategies, and environmental aesthetics have begun to emerge in every region of this world. This new book, co-edited by three prominent Turkish scholars and a leading American ecocritic, offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia. Another unique feature of *The Future of Ecocriticism: New Horizons* is the concluding dialogue among the four editors about the current state of the field.

Erotic Morality Linda Holler, 2002 This work examines the role of the senses and emotions, especially touch, in moral reflection and agency. It proposes that ethics consider touch as the centre of moral life rather than disciplines designed to control the body and feelings.

Contributions to Law, Philosophy and Ecology Ruth Thomas-Pellicer, Vito De Lucia, Sian Sullivan, 2016-05-26 *Contributions to Law, Philosophy and Ecology: Exploring Re-embodiments* is a preliminary contribution to the establishment of re-embodiments as a theoretical strand within legal and ecological theory and philosophy. Re-embodiments are all those contemporary practices and processes that exceed the epistemic horizon of modernity. As such, they offer a plurality of alternative modes of theory and practice that seek to counteract the ecocidal tendencies of the Anthropocene. The collection comprises eleven contributions approaching re-embodiments from a multiplicity of fields, including legal theory, eco-philosophy, eco-feminism, and anthropology. The contributions are organized into three parts: *Beyond Modernity*, *The Sacred Dimension*, and *The Legal Dimension*. The collection is opened by a comprehensive introduction that situates re-embodiments in theoretical context. Whilst closely

bound with embodiment and new materialist theory this book contributes a unique voice that echoes diverse political processes contemporaneous to our times Written in an elegant and accessible language the book will appeal to undergraduates postgraduates and established scholars alike seeking to understand and take re embodiments further both politically and theoretically

Let Them Eat Data C. A. Bowers,2011-03-15 Do computers foster cultural diversity Ecological sustainability In our age of high tech euphoria we seem content to leave tough questions like these to the experts That dangerous inclination is at the heart of this important examination of the commercial and educational trends that have left us so uncritically optimistic about global computing Contrary to the attitudes that have been marketed and taught to us says C A Bowers the fact is that computers operate on a set of Western cultural assumptions and a market economy that drives consumption Our indoctrination includes the view of global computing innovations as inevitable and on a par with social progress a perspective dismayingly suggestive of the mindset that engendered the vast cultural and ecological disruptions of the industrial revolution and world colonialism In *Let Them Eat Data* Bowers discusses important issues that have fallen into the gap between our perceptions and the realities of global computing including the misuse of the theory of evolution to justify and legitimate the global spread of computers and the ecological and cultural implications of unmooring knowledge from its local contexts as it is digitized commodified and packaged for global consumption He also suggests ways that educators can help us think more critically about technology *Let Them Eat Data* is essential reading if we are to begin democratizing technological decisions conserving true cultural diversity and intergenerational forms of knowledge and living within the limits and possibilities of the earth s natural systems

Is Wildness Over? Paul Wapner,2020-04-03 Selected as one of The Progressive s Favourite Books of 2020 Wildness was once integral to our ancestors lives as they struggled to survive in an unpredictable environment Today most of us live in relative stability insulated from the vicissitudes of nature Wildness is over right Wrong argues leading environmental scholar Paul Wapner Wildness may have disappeared from our immediate lives but it s been catapulted up to the global level The planet itself has gone into spasm calving glaciers wildfires heatwaves mass extinction and rising oceans all represent the new face of wildness Rejecting paths offered by geoengineering and de extinction to bring the Earth under control Wapner calls instead for rewilding This involves relinquishing the desire for comfort at all costs and welcoming greater uncertainty into our own lives To save ourselves from global ruin it is time to stop sanitizing and exerting mastery over the world and begin living humbly in it

Spirituality and Sustainability Satinder Dhiman,Joan Marques,2016-06-13 This book aims to examine sustainability and spirituality philosophically with ethics as the balancing force The goal is to reveal the important intersection between sustainability and spirituality by using spirituality as the invisible guiding hand in the quest for sustainability The editors and contributors examine old social and economics dilemmas from a new perspective in order to provide alternative approaches to economic and social development The enclosed contributions cover a broad range of topics

such as sustainable development and human happiness contemporary spirituality environmental ethics and responsibility and corporate social responsibility In addition the title features real world case studies and discussion questions that inspire self reflection and theoretical and empirical deliberation in academic courses and business seminars Contemporary approaches to economic and social development have failed to address humankind's abiding need for spiritual growth For material development to be sustainable spiritual advancement must be seen as an integral part of the human development algorithm While the policy makers and governments can play their respective role each one of us has to consciously adopt spirituality and sustainability as a way of life This book will rely on the spiritual power of individuals to heal themselves and the environment Featuring interdisciplinary perspectives in areas such as science marine biology environmental policy cultural studies psychology philosophy ecological economics and ethics this book will provide extensive insights into the complimentary fields of spirituality sustainability and ethics

Exploration and Meaning Making in the Learning of Science
Bernard Zubrowski, 2009-08-14 Mountaineers Rock Climbers and Science Educators Around the 1920s rock climbing separated from mountaineering to become a separate sport At that time European climbers developed new equipment and techniques enabling them to ascend mountain faces and to climb rocks which were considered unassailable up to that time American climbers went further by expanding and improving on the equipment They even developed a system of quantification where points were given for the degree of difficulty of an ascent This system focused primarily on the pitch of the mountain and it even calculated up to degrees to give a high degree of quantification Rock climbing became a technical system Csikszentmihaly 1976 observed that the sole interest of rock climbers at that time was to climb the rock Rock climbers were known to reach the top and not even glance around at the scenery The focus was on reaching the top of the rock In contrast mountaineers saw the whole mountain as a single unit of perception The ascent to them is a gestalt including the aesthetic historical personal and physical sensations Csikszentmihaly 1976 p 486 This is an example of two contrasting approaches to the same kind of landscape and of two different groups of people Interestingly in the US Europe and Japan a large segment of the early rock climbers were young mathematicians and theoretical physicists while the mountaineers were a more varied lot

Copyright: Sacred Text, Technology, and the DMCA David Nimmer, 2003-01-01 This anthology brings together over a dozen articles published by David Nimmer over the past decade regarding copyright together with updated commentary weaving together the various threads running through them The unifying theme running through the work is the need to reconcile standards in order to protect that most ethereal creation of mankind the written word From that unique vantage point the discussion delves into the religious roots and sacred character of the act of creation Religion and copyright are brought into resonance as issues from one field are deployed to illuminate those in the other Given its culminating focus on the Digital Millennium Copyright Act this work of necessity drills deeply into current advances in technology notably the dissemination of works over the internet The religious perspective shines an unexpected light onto those issues as well
