

Rethinking Future Higher Education

BY MARIO RAICH, SIMON DOLAN, PAWEŁ ROWIŃSKI, CLAUDIO CISULLO,
COURTNEY ABRAHAM AND JAN KLIMEK

"Education is a sustainable way for cultural change and transformation."

The world around us has already changed dramatically, and the pace is accelerating exponentially. So far, the so-called "education" has not been able to catch up with this fourth industrial revolution. Visionary people are already looking beyond it, talking about the "age of transhumanism". In view of the accelerating development of Artificial Intelligence (AI) and Cyber-Reality (CR) it becomes mandatory to define human uniqueness vs. intelligent machines and Cyber Entities.¹ The new reality requires a lifetime education model, which is truly future oriented, and proposed to be based on four pillars: learning, research and design, development and deployment. This article stretches our imagination and hopefully will serve as a creative reference allowing educators to dream and deploy new systems.

INTRODUCTION: REVISITING THE FUTURE

Curiosity and the joy of creation are the power engines of education!

If we look 25 years into the future from now, we can see a different world. The Cyber-Entities are supporting people everywhere and in all aspects of daily life and work; in politics and arts, in science and technology, in education and in entertainment; in "Our-Reality" (subjective) and in the Cyber-Reality (objective). It is a useful co-existence and collaboration, which has become an integral part of human civilisation. Robots and smart machines are taking care of large part of the physical and administrative work. A large part of the human population lives and works extensively in the Hybrid Reality composed of "Our-Reality" and "Cyber-Reality". The lifetime education is also increasingly shifting into the Cyber-Reality.²

With the Virtual-Reality becoming seamless to Our-Reality, the boundaries

between the different realities are increasingly blurry, the world has dramatically changed. Additionally, physical and mental abilities have been augmented thanks to advanced technologies and techniques. The mentally enhanced humans are considered as the intellectual elites with coaching and mentoring duties towards the rest of the population. They create the talent pool of scientist, technicians, engineers, future researchers and future designers, but they may also include some selected politicians and spiritual leaders.

People have become very "Cyber savvy". The use of the highly sophisticated and smart technology has become quite easy to handle. The social and professional life is shifting increasingly into the Virtual Reality. So are the crime and even wars. In countries ruled by powerful Lords the advanced technologies are also used for control of the citizens.
