Rethinking Management Education Robert French, Christopher Grey, 1996-08-30 At a time of ever increasing debate about orthodox approaches to management education and their application in the post industrial era this innovative book brings together the work of authors actively engaged in developing new forms of education The introduction contrasts dominant utilitarian and functionalist conceptions of management education with various alternatives It argues the need for a critical and pluralistic form of management education whereby participants are introduced to the full diversity of appropriate perspectives and debates The remainder of the book echoes this commitment by exploring a range of approaches including those based in psychoanalysis critical theory and poststructuralism Throughout t Rethinking the MBA Srikant Datar, David A. Rethinking Education Helen Gunter, 1997 Jurassic Management takes a challenging look at educational management and argues that self organisation and micropolitics are essential to understanding organisational survival and development

Rethinking Strategic Learning Russ Vince, 2004-04-22 Russ Vince examines learning as both a social and a strategic process invariably linked to emotions and politics that are mobilized by attempts at learning and organizing He makes a substantial contribution to theories of organizational learning and develops new ideas about critical reflection and collective leadership The author outlines a critical perspective on HRD arguing that staff responsible for learning and change in organizations have put too much effort into the development of individuals and not enough into

understanding and engaging with organizational dynamics that limit and shape individuals opportunities and abilities to learn and change HRD is explained as an intervention within a political system and practice of management and leadership with all the difficulties and contradictions that attempting to manage and to lead are likely to contain and reveal This means that the focus of HRD is on action on developing the capacity to act on generating credibility through action and on influencing and working with others in situations loaded with emotion and politics

Rethinking Management Education - Indian Context
 Nimisha Pandey,2004 This article explores the area of quality of service in higher education Education and training influences ones behavior beliefs values attitudes expectations on which the subsequent behavior of a student is based The method of education depends on the trainer student relationship decision making structures social and practical principles etc At present professional education is complex as compared to the education in general On one hand professional education seems to be socially valuable and contributes to the economic prosperity and international competitiveness and on the other hand it seems to be an individualistic and consumerist culture defining to the economic and career position of the individual This is contingent upon the continuation of the fundamental links between education and effectiveness of management practices and performance of individual managers On the quality measures for academic staff one need to articulate and examine the assumptions by the organization such as The policies and strategies evolved by the board and top management quality is implicit The qualification and service experiences are also a measure of quality Expansion in size turnover and activities are consequence of quality management There are many more assumptions explained in the paper Being a quality management institution many organizations have failed to identify core competencies among the academic staff and therefore the parameters of quality to them are not uniform There is also ambiguity about managing feedback on the performance at the faculty end Communication process is not defined and in many business schools there are no internal mechanism of monitoring such type of problems as counselling or mentoring And at last the quality of teaching and education alone suffer

Rethinking Economic Theories Tiago Cardão-Pito,2025-09-29 In recent times economic theories have provided the dominant explanations of how to understand and organize human societies This book argues that the study of economic theories must not be restricted to the disciplines of economics political economy or economic sociology and must encompass our relationship to the biosphere In this new volume Tiago Card o Pito further develops his innovative system to organize the major economic theories into two major theoretical groups one is termed hedonist economic theory primarily mainstream economics which generally defends moneyed persons politically and the other is work based economic theory the most well known version of which is Marxism which defends workers politically It is shown that economics can only be understood through the political disputes between these two major theories but it is also argued that both major economic theories are fundamentally unprepared for addressing human societies and the biosphere They both attribute metaphysical status to money describing monetary flows as the constitutive being of economic social and ecological phenomena

Furthermore both theories follow the overinclusive and tautological post Adam Smith concept of capital which confuses monetary and non monetary flows Although human work remains highly relevant in our technologically enhanced times this book demonstrates that returning to work based economic theory is no longer a viable option to contest the dominance of hedonist economic theory A new bio social theory is required to explain the integration of human societies into the biosphere This book is a vital reading for students and scholars of economic and social theory political economy economic sociology organization sustainability and ecological issues Global Perspectives on Educational Leadership Reform Anthony H. Normore, 2010-11-08 This volume focuses on educational reform leadership development programs and professional development processes intended to prepare and develop prospective and practicing educational leaders into leadership positions and examines issues that affect leaders serving in the role of educational leader learner *Rethinking the Business Models of Business Schools* Kai Peters, Richard R. Smith, Howard Thomas, 2018-01-17 Business schools around the world have grown and prospered in the last few decades but what does the future hold for business schools This book explores the potential future disruption of the business school tradition by considering funding value chains strategic groups value orientation innovation and business models **The Engaged Business School** Anthony Sturgess, 2023-09-18 Bridging the gap between business and business schools fulfilling potential or thwarted ambition The Engaged Business School is a road map to unlocking the potential between business and business schools at a time when it really matters responding to a global economic and social recovery *The Business School in the Twenty-First Century* Howard Thomas, Peter Lorange, Jagdish Sheth, 2013-07-18 Three world experts share their insights on designing the business school of the future and how to make it work Skills, Training and Human Resource Development Irena Grugulis, 2006-11-22 Taking a critical perspective Skill Training and Human Resource Development focuses on the way people are developed at work the skills that are encouraged the way they are controlled and the implications they have for people It draws on a wide range of research and covers an array of organizational practices **Professional Development and Institutional Needs** Gillian Trorey, Cedric Cullingford, 2017-07-05 Increasing demands on institutions to deliver set targets and value for money has led to an erosion of the notion of staff development The authors explore the tensions between the personal needs of the individual and the demands of managers **The Academic Citizen** Bruce Macfarlane, 2006-09-27 With increasing focus on excellence in research and teaching the service role of the individual academic is often neglected This book calls for greater recognition of this important aspect of academic life highlighting the importance of mentoring committee work and pastoral care in the daily running of universities Drawing from extensive examples from models around the world The Academic Citizen points to the benefits of effective communication with colleagues in the faculty across the university and in corresponding faculties across the world as well as those in maintaining positive associations with the wider world *Good Governance, Democratic Societies and Globalization* Surendra Munshi, Biju Paul Abraham, 2004-03-20 This book discusses

good governance in democratic societies in the context of globalisation from a cross cultural perspective India and the European Union democratic unions representing old histories rich cultures and new aspirations are viewed comparatively in order to assess what they can learn from each other *Systems Education for a Sustainable Planet* Ockie Bosch,Robert Y. Cavana,2018-04-24 This book is a printed edition of the Special Issue Systems Education for a Sustainable Planet that was published in Systems Honing Self-Awareness of Faculty and Future Business Leaders Payal Kumar,Tom Elwood Culham,Richard J. Major,Richard Peregoy,2023-04-10 Honing Self Awareness of Faculty and Future Business Leaders emphasizes self awareness and management of emotions as a strong differentiator for generating student engagement well being and performance in complex and ambiguous societal and economic VUCA environments The Evolution of Business Knowledge Harry Scarbrough,2008-06-05 Top executives increasingly see the competitive advantage of their firms coming from their ability to exploit knowledge and learning Policy makers likewise see the fate of national and regional economies being determined by the emergence of a knowledge economy These views place great importance on the way in which knowledge evolves within business However to date our understanding of that evolution has been limited by a tendency to see knowledge as simply a resource or input to be transformed into outputs This R D centred view of business knowledge has recently been challenged by other views which emphasize the contribution of organizational learning social practices and management structures to its evolution within and between organizations Competitive success is seen as dependent on the firm s ability to mobilize all of these different kinds of knowledge Based on the findings of a major research programme funded by the UK s ESRC Economic and Social Research Council and DTI Department for Trade and Industry this book makes a major contribution to this emerging picture of the evolution of business knowledge The detailed empirical studies contained within it have been undertaken by some of the UK s leading management researchers They cover a variety of sectors ranging from overtly knowledge producing institutions such as business schools and the scientific professions through intermediary groups such as consultants and lobby groups to the creation and application of knowledge by firms large and small This work highlights the impact of different institutional contexts social networks and technological artefacts on the way different groups share and exploit knowledge for business goals Its findings challenge the idea that knowledge and learning are simply a resource or input to be directed by managers and policy makers Instead they show how knowledge evolves through its embedding and disembedding within different business contexts as much despite of rather than because of the efforts of management and policy makers who are often more concerned with the day to day pressures of their own roles **Organizational Immunity to Corruption** Agata Stachowicz-Stanusch,2010-06-01 The current discussion about corruption in organizational studies is one of the most growing most fertile and perhaps most fascinating ones Corruption is also a construct that is multilevel and can be understood as being created and supported by social and cultural interaction As a result an ongoing dialogue on corruption permeates the levels of analysis and numerous research domains in organizational

studies Thus I see a major opportunity and necessity to look on corruption from a multilevel and multicultural perspective Second in the global society of the world today where organizational boundaries are becoming increasingly transparent and during the Global Crisis which has been rooted in unethical and corrupt behavior of large corporations a deeper understanding of corruption its forms typologies ways to increase organizational immunity and the best practices how to fight against corruption that are particularly significant and can also uncover it means that individuals groups organizations and whole societies can be used to sustain a sense of purpose direction meaning and the right way for creating a moral frame for the ethical behavior in the world of flux Third there is a growing pressure in the field of organizational studies and management to formulate theories that stimulate thinking of corruption to change understanding of the phenomenon and what is the most important to carry out actions that produce valued outcomes This exciting book provides an authoritative and comprehensive overview of organizational corruption It is an essential reference tool to carry out further research on corruption in organization This book uncovers new theoretical insights that I hope will inspire new questions about corruption in organization it also changes our understanding of the phenomenon and encourages further exploration and research
