Rethinking Teacher Education:

Rethinking Teacher Education Anne Edwards, Peter Gilroy, David Hartley, 2005-07-08 Rethinking Teacher Education is a thorough and critical analysis of the ambivalences and uncertainties that face those in teacher education. The authors draw on their different experiences of teacher education to try to make sense of current practices and where they might lead. The book analyzes past and present constructions of teacher education and offers insights into how a re-evaluation might address teachers' positions in relation to knowledge, learners, economic demands and democratic values. The issues addressed include political and economic uncertainty and teacher education, philosophical uncertainty and teacher education, modernist policy solutions, psychology, an agent of modernity in teacher education, sociocultural and other collaborative responses to uncertainty. The book will be of interest to all those involved in teacher education including sociologists, psychologists and philosophers of education. *Rethinking Teacher Education for the 21st Century* Wioleta Danilewicz, Alicja

It intends to provide valuable and fresh insights from research studies and examples of best practices from Europe and all over the world. Lynch, 2010 Rethinking Teacher Education David Hopkins, Ken Reid, 2012-05-04 In recent years there has been a new mood in teacher education. The emphasis is on professional studies, on encouraging trainee teachers to think intelligently about how to tackle problems of the classroom. This book surveys the developments which are taking it further in both Britain and North America. It goes on to argue the case for consolidating the new approach in a thoughtful, structured and comprehensive way. It argues that teacher education should be regarded as a discipline in its own right, that teacher education should be increasingly school focused and problem centered, that it needs to blend theory more effectively with practice. It argues that teacher training programmes should prepare teachers for an uncertain future in a changing world. This calls for an emphasis on process rather than content in programmes and the preparing of teachers who are self-directed.

Rethinking Teacher Education Selma Wassermann, 2022-02-28 The book offers concrete and specific suggestions for improving teacher education programs including improved strategies for selection into the program, key ingredients for pre-service course work, courses that emphasize skill development in critical areas of teaching practice and more effective evaluation of student teaching that emphasizes professional development. **Rethinking Teacher Education** Richard Smith, David Lynch, 2010 From the people who turned teacher education on its ear in Australia in 2001 comes a text about preparing the next generation of teachers. researchers and the architects of the acclaimed Bachelor of Learning Management program BLM take their previously published ideas about teaching and teacher education further to detail a new paradigm in the preparation of teachers Drawing on 30 years of teacher education research and their own experiences in redeveloping teacher education in Australia Smith and Lynch explore what it means to be a teacher in the 2000s outlining a new vision for the preparation of teachers in a Knowledge Age

Toward a Framework of Resources for Learning to Teach Lauren Gatti, 2016-08-19 This book advances a new framework for learning to teach using in depth case studies to show how learning to teach in any type of program can best be understood as a recursive and dynamic process wherein teachers differentially access programmatic relational experiential disciplinary and dispositional resources In the last twenty years debates in the field of teacher preparation have increasingly become paralyzing and divisive as rhetoric around the failure of university teacher preparation intensifies The author addresses the historical and practical factors that animate these debates arguing that novice teachers and teacher educators

must understand the central conflicts in the field however the book also advances a way of approaching learning to teach that accounts for but does not get stuck at the level of programmatic designation Using lively in depth case studies the author shows how novice urban English teachers from two different teacher preparation pathways a university based program and an urban teacher residency learn to teach within a policy context of high stakes testing and college readiness
