Rethinking The Nuclear Weapons Dilemma In Europe:

Rethinking the Nuclear Weapons Dilemma in Europe P. Terrence Hopmann, Dr. Frank Barnaby, 1988-06-18 **START and the Future of Deterrence** Michael J. Mazarr, 1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment It also projects the likely future of deterrence strategies and strategic force postures Other topics such as the Soviet nuclear doctrine are also covered **Towards New Global Strategies: Public Goods and Human Rights** Erik André Andersen, Birgit Lindsnaes, 2007-08-31 This book aims to contribute to the debate on global public goods a debate which has been taking place for some time in the UN and the World Bank among the regional development banks and bilaterally among states and donors There is a need for new visions and strategies and to examine global infrastructure on the basis of the idea that global public goods including human rights contribute to cohesion at local regional and international levels The book investigates the possibilities and disadvantages of applying the idea of public goods in a global context It explains the history of the concept and its significance for human rights The authors include in addition to academics representatives from public institutions civil society organizations independent consultants the media and the private sector *The Last Great Nuclear Debate* T. Halverson, 1995-11-20 Fundamental changes in international relations during 1989-90 toppled the pillars of the security policy paradigm which had characterised the Cold War That convulsion swept aside the last of many nuclear debates to rend NATO Immediately the nuclear problems which had plagued the 1980s were tossed aside Yet many important and interesting elements of the decade's nuclear history had not been fully explained With the nuclear issue's rapid shift to irrelevancy previously hidden information on the period became at once less secret and more easily available Thus through extensive interviews with participants and careful analysis of open sources missing parts of the puzzle emerged This book is intended to provide a fuller explanation of NATO's last great nuclear debate **Ibss: Political Science: 1988** British Library of Political and Economic Science, 1992 This bibliography lists the most important works in political science published in 1988 *Jonathan Dean* Hans Günter Brauch, Teri Grimwood, 2014-05-20 Jonathan Dean 1924-2014 was a distinguished U.S. diplomat 1950-1980 and from 1984 to 2007 global security adviser to the Union of Concerned Scientists Washington D.C. During the 1980s and 1990s he was a pioneering conceptual thinker writer and speaker on détente in Europe global cooperative security arms control and disarmament He authored *Watershed in Europe* 1987 *Meeting Gorbachev's Challenge* 1989 and *Ending Europe's Wars* 1994 This volume contains his biography and bibliography six texts on détente and arms control in Europe in the 1980s *Beyond First Use* MBFR *Alternative Defence* Berlin A Crisis Management Center *Conventional Arms Control in Europe* and six texts on the new security order in Europe since the 1990s *Components of a Post Cold War Security System for Europe* *Constraining Technological Weapons Innovation* NATO *Enlargement Act II* *Ten Years after the Wall* *Future Security in Space* *Rethinking Security* *Return to the Grootean Pattern* **Key Players and Regional Dynamics in Eurasia** M. Freire, R.

Resolving the Security Dilemma in Europe Bjørn Møller,1991 For the first time since the beginning of the Cold War more than 40 years ago the political determinants of military security in Europe are changing much more quickly than the technological ones Non offensive defence is now a more acceptable strategy than it was before and this book points towards realistic solutions to the problems of excessive dependence on nuclear weapons and or self defeating offensive force structures The ideas examined are especially important for British and American audiences since the Anglo Saxon countries are the ones most wedded to NATO orthodoxy and therefore the slowest to react to the current wave of change

European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it
