Reticuloendothelial System 1 Morphology:

Disorders of the Monocyte Macrophage System F. Schmalzl, D. Huhn, H. E. Schaefer, 2012-12-06 The origin and function of normal monocytes and macrophages have been clearly defined by extensive investigations in human and in animal models The central importance of this cell system for the biological defense mechanisms is well established phagocytosis inactivation and destruction of organic and inorganic materials an important role in the initiation of humoral and cell mediated immunological responses and the secretion of a variety of chemical mediator and effector substances are the most important features of this ontogenetically ancient cell system However the data on this cellular system are rather recent and this may explain why relatively little attention has been paid to the pathology of the monocyte macrophage system MMS until now In addition this monograph should focus attention on the secondary pathophysiological implications of the MMS in disorders not primarily originating from this system Several techniques are available to identify even abnormal individuals of this cell system and therefore can be employed for the study of severely altered or neoplastic monocytic cells General

comprehensive overview of macrophages and related cell types in a short review volume is an impossible task When I selected the topics to be included some equally important areas were omitted by necessity and for this I apologize My choices have been somewhat eclectic touching subjects of personal interest such as osteoclast biology and macrophage electrophysiology or of current fashion apoptosis antigen processing cell adhesion molecules The book has also had to encompass areas of a more general flavor to provide balance for the general reader such as reviews of macrophage development heterogeneity and function and of the surface molecules expressed by macrophages I thank all the authors for their prompt submissions all have been of high quality and my editorial tasks thankfully have been minimal Michael A Horton London United Kingdom ix Contents Chapter J An Overview of Receptors of MPS Cells Iain Fraser and Siamon Gordon 1 Introduction 1 2 The Mononuclear Phagocyte System 2 3 Diversity of Macrophage Plasma Membrane Receptors 6 3 1 A Structural Approach to Classification 6 3 2 Multisubunit Receptors 3 3 Soluble Receptors 9 3 4 Lectins and Lectin Like Receptors 12 4 Functions and Selected Examples 14 4 1 Growth Differentiation and Modulation 14 4 2 Cell Cell and Cell Matrix Interactions 16 4 3 Endocytosis and Scavenger Receptors 16 4 4 Secretory Responses and Biosynthesis of Effector Molecules 17 5 Concluding Remarks 17 6 References 18

Pharmacology John Hadden, 2013-11-09 This comprehensive treatise on the reticuloendothelial system is a project jointly shared by individual members of the Reticuloendothelial RE Society and biomedical scientists in general who are interested in the intricate system of cells and molecular moieties derived from those cells which constitute the RES It may now be more fashionable in some quarters to consider these cells as part of what is called the mononuclear phagocytic system or the lymphoreticular system Nevertheless because of historical developments and current interest in the subject by investigators from many diverse areas it seems advantageous to present in one comprehensive treatise current information and knowledge concerning basic aspects of the RES such as morphology biochemistry phylogeny and ontogeny physiology and pharmacology as well as clinical areas including immunopathology cancer infectious diseases allergy and hypersensitivity It is anticipated that by presenting information concerning these apparently heterogeneous topics under the unifying umbrella of the RES attention will be focused on the similarities as well as interactions among the cell types constituting the RES from the viewpoint of various disciplines The treatise editors and their editorial board consisting predominantly of the editors of individual volumes are extremely grateful for the enthusiastic cooperation and enormous task undertaken by members of the biomedical community in general and especially by members of the American as well as European and Japanese Reticuloendothelial Societies

Neurobiology of Cerebrospinal Fluid
2 James H. Wood, 2013-06-29 Since the publication of Neurobiology of Cerebrospinal Fluid 1 in 1980 that text has become the definitive reference concerning cerebrospinal fluid CSF for both basic scientists and clinicians involved in the investigation of degenerative convulsive cerebrovascular traumatic immunological demyelinating inflammatory neoplastic neuroendocrine and psychiatric disorders That initial volume began a tradition of detailed topic reviews written by international authorities

with first hand expertise in their respective fields of CSF research Neurobiology of Cerebrospinal Fluid 2 represents a hefty collection of extensively referenced and illustrated chapters covering topics not discussed in Vol 1 More specifically these chapters contain ample charts of original data summary charts and anatomical diagrams Detailed illustrations of experimental and clinical techniques have been included to facilitate their practical application Each chapter in this multidisciplinary text has been critically reviewed by two experts in the respective field and the appropriate revisions have been made Recently published references and text modifications have been added at the proof stage in an effort to provide the most up to date review chapters possible

Histology Ray C. Henrikson,Joseph E. Mazurkiewicz,1997 The purpose of this book is twofold The concise presentation in outline format enables the student initially to gain an overview of histology and later to review the discipline This is particularly important in today s biomedical curriculum because of the reduction in time devoted to basic sciences and the dispersal of specific disciplinary materials into evolving nontraditional curricula Second the inclusion of approximately 300 study questions and integration of their answers with the text enables the student to review histology in a timely and efficient manner in the context of licensing and other comprehensive examinations
