Retired, Except on Demand: Life of Dr. Cicely Williams Sally Craddock,1983 **Retired Except on Demand** Sally Craddock,1983 The life of pediatrician Dr Cecily Williams whose work took her all over the world **Ruling Minds** Erik Linstrum,2016-01-04 The British Empire used intelligence tests laboratory studies and psychoanalysis to measure and manage the minds of subjects in distant cultures Challenging assumptions about the role of scientific knowledge in the exercise of power Erik Linstrum shows that psychology did more to reveal the limits of imperial authority than to strengthen it *History of Medicine, Third Edition* Jacalyn Duffin,2021-06-28 The third edition of this bestselling introduction to medical history has been thoroughly updated to include recent scholarship and new events in major fields of medical endeavor *A History of Women in Medicine and Medical Research* Dale DeBakcsy,2022-12-15 In the nineteenth century a small but dedicated group of European and American women rose to agitate for the inclusion of women in the medical profession It is a historic tale that we have told and retold for decades but it is far from where the story of women as physicians and healers begins Stretching back into deepest antiquity we possess accounts of women who were consulted by emperors and paupers alike for their medical expertise They were surgeons apothecaries midwives university lecturers and medical researchers in correspondence with the most learned societies of their time And then it all came crashing down A History of Women in Medicine and Medical Research is the story of the women who participated in that early Golden Age and of a medical establishment closing ranks against them so effectively that by the early Victorian era they not only were barred from practicing medicine but from so much as stepping into a classroom where medical topics were being discussed It is the story of that intrepid band of reformers and pioneers who built back the women s medical profession from the ashes and constructed a thriving new community of researchers and practitioners who within a century had retaken not only the ground that had been lost but boldly advanced to levels of fame and achievement unimaginable to any previous era Told through in depth accounts of the lives of the pioneers and practitioners who built and rebuilt the women s medical movement this title dives into the lives of not only legendary figures like Florence Nightingale Gertrude Elion Rosalyn Yalow and Elizabeth Blackwell but visits women the world over whose medical contributions broke down doors and advanced the cause of women s and world health like the revolutionary medieval physician Trota of Salerno the pioneering eighteenth century midwife and businesswoman Madame du Coudray the microbiological research trailblazer Mary Putnam Jacobi and the HIV researcher and world epidemic response coordinator Francoise Barre Sinoussi With over 140 stories spanning three millennia of global medicine this book shines a light on the unknown heroes towering discoveries tragic missteps and profound struggles that have accompanied the Rise Fall and Rebirth of the women s medical profession **History of Medicine, Second Edition** Jacalyn Duffin,2016-10-27 Jacalyn Duffin s History of Medicine has for ten years been one of the leading texts used to teach medical and nursing students the history of their profession It has also been widely used in history courses and by general

Current Catalog National Library of Medicine (U.S.), *Tropical Medicine in the Twentieth Century* Helen J.

Power, 2012-11-12 First published in 1998 Despite the upsurge of interest in the history of tropical medicine international public health and the provision of health care in colonial and post colonial tropical countries no major text discusses the history of the academic discipline in the twentieth century In Britain the two Schools of Tropical Medicine opened within six months of each other in the final year of the nineteenth century They have played a pivotal role in developing tropical medicine as an academic discipline in postgraduate medicine with an active research profile The Schools also affected the development of health care in the tropical colonies They trained the Medical Officers of the Colonial Medical Service and the indigenous doctors whose training failed to include infectious endemic diseases and lacked an emphasis on community health The Schools also contributed to a body of knowledge applied by the colonial powers international agencies and independent nation states as part of their health care programmes Ultimately the Schools helped the developing world to establish its own priorities for health This volume charts the history of the Liverpool School of Tropical Medicine from 1898 to 1990 **David**

Livingstone and the Myth of African Poverty and Disease Sjoerd Rijpma, 2015-06-24 This study about David Livingstone is different from all other publications about him Here Livingstone is not the main topic of interest the focus of the author is on nutrition and health in pre colonial Africa and Livingstone is his key informant David Livingstone and the Myth of African Poverty and Disease is an unusual book After a close examination of Livingstone's writings and comparative reading of contemporary authors Sjoerd Rijpma has been able to draw cautious conclusions about the relatively favourable conditions of health and nutrition in southern and central Africa during the pre colonial period His findings shed new light on the medical history of Sub Saharan Africa The surprise awaiting travellers in and also before 19th century Africa was that the inhabitants of the interior even the slaves were healthier and better fed than many of their contemporaries in Europe's Industrial Revolution An impressive piece of scholarship truly forensic in its close reading and re reading of Livingstone's published works and those of other travellers during the same era clearly a labour of love which has taken years to complete Joanna Lewis **Bibliography of the History of Medicine**, 1984 **Women in Jamaica**, 1997 The first detailed bibliography of

books unpublished reports theses and articles written on women in Jamaica up to 1994 There is no limitation in scope except that newspaper articles are excluded as is material published after 1994 Most of the works identified were written after 1970 as the bulk of the research on women in Jamaica really had its genesis with the declaration of International Women s Year in 1975 Prior to that research seems to have been concentrated on the twin subjects of family and fertility Certain areas are yet to be tapped and recorded but the bibliography by identifying what already exists points to areas where material is lacking Introduction Women in Jamaica is intended for the practitioner the researcher and the tertiary level student and lecturer It cites over 600 works under topical headings such as Arts and Literature Biography Education Economic Conditions and Employment Family and Fertility Health Legal Issues Politics and Social Conditions This volume includes short listings of bibliographies periodicals and audiovisual material

The Architecture of Confinement Anoma Pieris,Lynne Horiuchi,2022-02-24 In this global and comparative study of Pacific War incarceration environments we explore the arc of the Pacific Basin as an archipelagic network of militarized penal sites Grounded in spatial physical and material analyses focused on experiences of civilian internees minority citizens and enemy prisoners of war the book offers an architectural and urban understanding of the unfolding history and aftermath of World War II in the Pacific Examples are drawn from Australia New Zealand Singapore Japan and North America The Architecture of Confinement highlights the contrasting physical facilities urban formations and material character of various camps and the ways in which these uncover different interpretations of wartime sovereignty The exclusion and material deprivation of selective populations within these camp environments extends the practices by which land labor and capital are expropriated in settler colonial societies practices critical to identity formation and endemic to their legacies of liberal democracy

Women and Modern Medicine ,2016-10-11 Modernising scientific medicine emerged in the nineteenth century as an increasingly powerful agent of change in a context of complex social developments Women s lives and expectations in particular underwent a transformation in the years after 1870 as education employment opportunities and political involvement extended their personal and gender horizons For women medicine came to offer not just treatment in the event of illness but the possibilities of participation in medical practise of shaping social policies and political understandings and of altering the biological imperatives of their bodies The essays in this collection explore various ways in which women responded to these challenges and opportunities and sought to use the power of modernising Western medicine to further their individual and gender interests

Perspectives on the Japanese Occupation in Malaya and Singapore, 1941-1945 Yōji Akashi, Mako Yoshimura, 2008-12-01. Information on the Japanese Occupation of Malaya and Singapore is sparse and Japanese language materials are particularly difficult to find because the Japanese military systematically destroyed war-related documents when the war ended. The contributors to this volume participated in a Forum that spent four years locating surviving materials relating to the Occupation of Malaya. The group had three objectives: to collect primary sources; to interview Japanese military and civilian officials who took part in the military administration; and people in Malaysia and Singapore who experienced the period and to publish the results of the studies. Based on interviews with Japanese Malaysians and Singaporeans who lived through the war years and materials gathered from archives and libraries in Britain, Malaysia, Singapore, USA, Australia and India, the Forum has produced a number of Japanese language publications. This book makes available some of their research findings in English. Topics covered include the Watanabe Military Administration, Japanese research activities in Malaya, Japan's Economic Policies, Malayan Communist Party Leaders and the Anti-Japanese Resistance, the Massacre of Chinese in Singapore, Railway Transportation during the Japanese Occupation Period, The Singapore Internment Camp for Allied Civilian Women and the Japanese Surrender. This volume is a revised version of *Akashi Yoji ed Nippon Senryōka no Eiryō Maraya Shingaporu* Tokyo Iwanami Shoten Publishers Co 2001. **History of Medicine** Jacalyn Duffin, 1999-01-01. Examining discoveries and disasters, ideas, patients and diseases in fields from anatomy to pharmacology to surgery, this is a highly accessible overview of medical history as a vibrant component of intellectual and cultural history.

An Introduction to International Health Michael Seear, 2012-11. At a time when developed world populations are healthier and richer than they have ever been, why is there still so much poverty and disease in the world? Why do rich countries hold so many poor countries in debt and why do millions of children die every year from avoidable diseases? This new edition attempts to answer these pressing questions. *An Introduction to International Health* Second Edition is a comprehensive and detailed exploration of international health and the modern aid industry. This provocative new edition is masterfully constructed around four essential themes: What is international health? Why is population health so poor in developing countries? What is the extent of the problem? What can be done about it? The thoroughly updated second edition provides answers to these questions and includes new discussions on war, governance and human rights in developing countries and the various issues surrounding water sanitation and infectious diseases. Solutions are examined via primary

health care strategies poverty alleviation and developing world debt relief as well as human rights interventions Unique to this book is its how to component The final section discusses how to work safely and effectively in a developing country This eye opening text is an essential read for all those interested in international health **Sharing the Burden of Sickness**

Jonathan Roberts,2021-11-09 A medical history of Accra that accounts for plural medical traditions and multiple notions of health and healing *On an Empty Stomach* Tom Scott-Smith,2020-04-15 *On an Empty Stomach* examines the practical techniques humanitarians have used to manage and measure starvation from Victorian scientific soup kitchens to space age high protein foods Tracing the evolution of these techniques since the start of the nineteenth century Tom Scott Smith argues that humanitarianism is not a simple story of progress and improvement but rather is profoundly shaped by sociopolitical conditions Aid is often presented as an apolitical and technical project but the way humanitarians conceive and tackle human needs has always been deeply influenced by culture politics and society Txhese influences extend down to the most detailed mechanisms for measuring malnutrition and providing sustenance As Scott Smith shows over the past century the humanitarian approach to hunger has redefined food as nutrients and hunger as a medical condition Aid has become more individualized medicalized and rationalized shaped by modernism in bureaucracy commerce and food technology *On an Empty Stomach* focuses on the gains and losses that result examining the complex compromises that arise between efficiency of distribution and quality of care Scott Smith concludes that humanitarian groups have developed an approach to the empty stomach that is dependent on compact commercially produced devices and is often paternalistic and culturally insensitive

Terrors of the Table Walter Gratzer,2006-11-22 *Terrors of the Table* is an absorbing account of the struggle to find the necessary ingredients of a healthy diet and the fads and quackery that have always waylaid the unwary and the foolish when it comes to the matter of food and health Walter Gratzer tells the tale of nutrition s heroes heroines and charlatans with characteristic crispness and verve We find an array of colourful personalities from the distinguished but quarrelsome Liebig to the enterprising Lydia Pinkham But we also find the slow recognition that the lack of vital ingredients can cause terrible illnesses scurvy rickets beriberi These diseases stalked the poor in the West even into the 20th century and scandalously remain in poorer parts of the world today The narrative stretches from classical times to the modern day and gives a valuable historical perspective to our current understanding It also highlights some of the problems faced by the developed world regarding health today in particular diabetes and obesity And despite our far greater understanding of what our body needs there are still many who would fall for fads and fancy diets some dangerous others just daft Of course the story of nutrition does not end there We have discovered the key vitamins and minerals our body needs but research continues on the connections between diet health and disease The body s biochemistry is complex and there are no easy answers no magic formula that applies to all individuals The safest and most rational course would seem to be a sensible moderate and varied diet not forgetting that a little of what you fancy does you good
