Naturekind Melissa Leach, James Fairhead, 2025-10-07 A new paradigm that integrates human and nonhuman communication and culture Are language and culture uniquely human justifying an exceptionalism that sets people apart from the rest of nature New discoveries in the biological sciences have challenged this assumption finding syntax symbolism and social learning beyond the human and identifying culture as a second inheritance system across the phyla from whales to insects and plants Biologists are constrained however by the mechanistic ways communication is understood In *Naturekind* Melissa Leach and James Fairhead address this impasse by extending insights from structural linguistics social semiotics anthropology and Indigenous theorization into wider life integrating them with new biological findings to develop a new structural biosemiotics paradigm Leach and Fairhead argue that such a paradigm can provide a unified theory of meaning making across all of nature or naturekind allowing new theorisation about human and nonhuman communication and culture They examine people s communicative encounters with chickens horses bees bats and plants and with assemblages of living and nonliving entities forests seas soils and cities Marrying the new biology with the structural social sciences they contend provides powerful insights for living well with wider life on a shared planet and transforming political relations *The USPC Guide to Bandaging Your Horse* Susan E.
