## **Right To Development A Primer:**

**The Right to Development** Centre for Development and Human Rights, 2004-05-25 The Right to Development RTD a concept that emerged in the 1970s is one of the most debated and contentious issues in international relations RTD builds on the rights based approach to development seeking to integrate the norms and principles of human rights with policies and plans to promote development Despite its importance for the world s poor and dispossessed a great deal of definitional confusion still surrounds the concept This primer introduces the concept of RTD as well as discusses its practical application in the Indian setting It is divided accordingly into two sections the first of which traces the origins and the evolution of the idea of RTD This section identifies the defining parameters and content of RTD and focuses especially on the three rights the rights to food education and health that have been identified as a good starting point for the implementation of RTD The last chapter in this section underscores the importance of women s rights in order to emphasise the need to focus on safeguarding and promoting the human rights of vulnerable groups Part II covers substantially the Indian situation relating to RTD The first chapter in this section provides an overview of the legal and institutional mechanism in India for the protection of human rights in general and women s rights in particular The next chapter examines the implementation of the rights to food health and education The last chapter in this section details the functioning of Public Interest Litigation PIL which has emerged in recent years as an important mechanism for securing social justice and the challenges and limitations of this mechanism

**The Right to Development in International Law** Khurshid Iqbal, 2009-09-10 The Right to Development in International Law rigorously explores the right to development RTD from the perspectives of international law as well as the constitutionally guaranteed fundamental rights and the Islamic concept of social justice in Pakistan The volume draws on a wide range of relevant sources to analyse the legal status of international cooperation in contemporary international law before exploring the domestic application of the right to development looking at the example of Pakistan a country that is undergoing radical transformation in terms of its internal governance structures and the challenges it faces for enforcing the rule of law Of particular importance is the examination of the RTD and Shari ah law in Pakistan which adds a new perspective to the RTD debate and enriches the discussion about human rights and Shari ah across the world Through focusing on Pakistan the book links international perspectives and the international human rights framework with the domestic constitutional apparatus for enforcing the RTD within that jurisdiction In doing so Khurshid Iqbal argues that the RTD may be promoted through existing constitutional mechanisms if fundamental rights are widely interpreted by the superior courts effectively implemented by the lower courts and if Shari ah law is progressively interpreted in public interest Iqbal s work will appeal to researchers professionals and students in the fields of law human rights development international law South Asian Studies Islamic law and international development studies [Reflections on the Right To Development](#) Arjun Sengupta, Archana Negi, Moushumi Basu, 2005 The Right to Development RTD is a new and highly

Zinnos,2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to

education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic *Realizing the Right to Development* United Nations. Office of the High Commissioner for Human Rights, 2013 This book is devoted to the 25th anniversary of the United Nations Declaration on the Right to Development It contains a collection of analytical studies of various aspects of the right to development which include the rule of law and good governance aid trade debt technology transfer intellectual property access to medicines and climate change in the context of an enabling environment at the local regional and international levels It also explores the issues of poverty women and indigenous peoples within the theme of social justice and equity The book considers the strides that have been made over the years in measuring progress in implementing the right to development and possible ways forward to make the right to development a reality for all in an increasingly fragile interdependent and ever changing world

**The African Human Rights Judicial System** Luis Gabriel Franceschi, 2014-03-17 This book deals with two interconnected yet often forgotten realities of the constitutional order in Africa first the foreign affairs power that gives the specific organs of the State the capacity to create and empower universal regional and sub regional governance and judicial structures Secondly the international judicial function in Africa with a specific focus on the African Court on Human and Peoples Rights and the upcoming merger with the African Court of Justice to form one court The African Court of Justice and Human and Peoples Rights

**International Economic Law and the Digital Divide** Rohan Kariyawasam, 2008-01-01 In this well researched book the author explains the digital divide and its repercussions for developed and developing nations In his view the overzealous disciplining at the WTO level of instruments affecting trade notwithstanding developing countries still have important tools in their hands intellectual property protection competition policies tax regimes that can help them attract foreign direct investment a crucial ingredient in reducing the current divide Borrowing from the institutions that we have seen developed in international economic relations is highly recommended as well In short whether the divide will continue to persist or conversely whether it will gradually become a historical feature of international relations critically depends on the political will on both sides of the divide The author makes a persuasive argument to support his thesis empirically researched and with strong foundations in theory Petros C Mavroidis Columbia Law School US and University of Neuchâtel Switzerland This path breaking book focuses on the WTO e commerce and information communications technologies It sheds light on how international economic law can be used as a tool in the application of technological processes to facilitate development in developing countries Rohan Kariyawasam begins by looking predominantly at the rise of international digital networks He offers an introduction to the networks used in the delivery of electronic products and network based transactions and the application of WTO law to the sector He then suggests how developing countries can use economic law and technology to tap digital markets in the developed world The

book also argues that the advance of basic living standards in some developing countries can be achieved through technological processes but that this cannot happen without such states paying greater attention to the enforcement of economic social and cultural rights at home Picking up the property rights debate including through bilateral trade the author argues that ensuring beneficial technology transfer will require balancing foreign investor rights to protect intellectual property It will also involve restrictions imposed by competition law and WTO surveillance to check the possible misuse of market power by multinational companies The proposed mixture of measures should he argues provide incentives for Foreign Direct Investment Providing a thorough review of the application of WTO law to the telecommunications sector and the regulation of international digital networks this book will be of great interest to postgraduate students in international economic law and international development law as well as those interested in human rights law and technology It will also appeal to government regulators NGOs and technologists interested in ICTs and development
