*Right & Left* Rodney Needham, 1978 *Right and Left* is the first book to explore symbolic dualism systematically in a variety of cultures Featuring a new translation of Robert Hertz's seminal work *The Pre-eminence of the Right Hand* this rewarding collection presents seventeen essays written between 1909 and 1971 by notable scholars on both literary and ethnographic aspects of the subject Many appear here in English for the first time and several have been materially revised for this volume Together these essays reveal the amazing range of dual symbolic classifications such as right and left masculine and feminine yin and yang and support Hertz's contention that polarity is a fundamental aspect of human expression back cover

*Right & Left* Rodney Needham, 1973      ***Right and Left***, 1992      ***Right & Left*** Rodney Needham, 1973      ***Right and Left***, 1992      ***Right and Left, Essays on Dual Symbolic Classification, Edited and with an Intro*** Rodney Needham, 1973      *Thinking with Demons* Stuart Clark, 1999 This is a work of fundamental importance for our understanding of the intellectual and cultural history of early modern Europe Stuart Clark offers a new interpretation of the witchcraft beliefs of European intellectuals based on their publications in the field of demonology and shows how these beliefs fitted rationally with many other views current in Europe between the fifteenth and eighteenth centuries Professor Clark is the first to explore the appeal of demonology to early modern intellectuals by looking at the books they published on the subject during this period After examining the linguistic foundations of their writings the author shows how the writers' ideas about witchcraft and about magic complemented their other intellectual commitments in particular their conceptions of nature history religion and politics The result is much more than a history of demonology It is a survey of wider intellectual and ideological purposes and underlines just how far the nature of rationality is dependent on its historical context      ***Right and Left*** Rodney Needham, 1973      *Senses of Touch: Human Dignity and Deformity from Michelangelo to Calvin* Marjorie O'Rourke Boyle, 2021-10-11 *Senses of Touch* anatomizes the uniquely human hand as a rhetorical figure for dignity and deformity in early modern culture It concerns a valuational shift from the contemplative ideal as signified by the sense of sight to an active reality as signified by the sense of touch From posture to piety from manicure to magic the book discovers touch in a critical period of its historical development in anatomy and society It features new interpretations of two landmarks of western civilization Michelangelo's fresco of the Creation of Adam and Calvin's doctrine of election It also accords special attention to the typing of women as sensual creatures by using their hands as a heuristic Its alternative interpretations explore in theory and in practice the sensuality the creativity and the plain utility of hands thus integrating biology and culture      ***To Take Place*** Jonathan Z. Smith, 1987 In this broad ranging inquiry into ritual and its relation to place Jonathan Z. Smith prepares the way for a new approach to the comparative study of religion Smith stresses the importance of place in particular constructed ritual environments to a proper understanding of the ways in which empty actions become rituals He structures his argument around the territories of the Tjilpa aborigines in Australia and two sites in

Jerusalem the temple envisioned by Ezekiel and the Church of the Holy Sepulchre The first of these locales the focus of one of the more important contemporary theories of religious ritual allows Smith to raise questions concerning the enterprise of comparison His close examination of Eliade's influential interpretation of the Tjilpa tradition leads to a powerful critique of the approach to religion myth and ritual that begins with cosmology and the category of The Sacred In substance and in method To Take Place represents a significant advance toward a theory of ritual It is of great value not only to historians of religion and students of ritual but to all whether social scientists or humanists who are concerned with the nature of place This book is extraordinarily stimulating in prompting one to think about the ways in which space or place is perceived marked and utilized religiously A provocative example of the application of humanistic geography to our understanding of what takes place in religion Dale Goldsmith Interpretation

**Tall Tales about the Mind and Brain** Sergio Della Sala, 2007-01-11 Does listening to Mozart make us more intelligent Is there such a thing as a gay gene Does the size of the brain matter Does the moon influence our behaviour Can we communicate with the dead Can graphology tell us anything about a person's character Is the human brain clonable What role do dreams have in cognition Can mind conquer matter and diseases Are out of body experiences possible Can we trust our intuitions To some the answer to all these questions might well be a resounding no but to many people these represent serious beliefs about the mind and brain beliefs that drive their everyday behaviour beliefs that cost them huge amounts of money Whole industries have developed founded on these dubious claims about the mind and brain Even major corporations have dabbled with assessment methods such as those advocated by graphology accepting and rejecting candidates on the basis of their handwriting Expectant parents buy books and tapes by the dozen showing them how to improve the intelligence of their child by playing them classical music People subscribe to expensive therapies founded on beliefs rather than science or risk their health buying books that tell them how they can conquer illness through positive thinking perhaps at the expense of more scientifically proven treatments Tall Tales

about the Mind and Brain presents a sweeping survey of common myths about the mind and brain In a lighthearted and accessible style it exposes the truth behind these beliefs how they are perpetuated why people believe them and why they might even exist in the first place      Attraction of Opposites David Maybury-Lewis,Uri Almagor,2025-10-01 The Attraction of Opposites considers a puzzling phenomenon Why do societies all over the world organize their social thought and institutions in patterns of opposites The essays collected in this volume examine contemporary societies throughout the world that organize their social theories or institutions in binary form Through analysis of these rich materials the distinguished contributors explore the enduring human attraction to dualism They consider whether this is due to the natural twoness of things and if not why polarity should play such a prominent role in both ancient cosmologies and modern philosophies in early empires and in modern two party systems This study of dual organization tells us something important about human beings illuminating a mode of thought and social organization that has represented an attractive option throughout human history      **The Changing Faces of Space** Maria Teresa Catena,Felice Masi,2018-01-11 This book focuses on various concepts of space and their historical evolution In particular it examines the variations that have modified the notions of place orientation distance vacuum limit bound and boundary form and figure continuity and contingency in order to show how spatial characteristics are decisive in a range of contexts in the determination and comprehension of exteriority in individuation and identification in defining the meaning of nature and of the natural sciences in aesthetical formations and representations in determining the relationship between experience behavior and environment and in the construction of mental and social subjectivity Accordingly the book offers a comprehensive review of concepts of space as formulated by Kant Husserl Heidegger Einstein Heisenberg Penrose and Thorne subsequently comparing them to notions developed more recently in the current age which Foucault dubbed the age of space The book is divided into four distinct yet deeply interconnected parts which explore the space of life the space of experience the space of science and the space of the arts
