Silent Winds of Aikido Don Dickie, The Silent Winds refers to the stillness and internal silence at the centre of all Aikido techniques The silence is infused with awareness awareness of the space surrounding you awareness of the internal landscape of thoughts and emotions and awareness of the technique you are performing This silence nurtures the intuition that guides the choices you make with respect to technique and movement in general The stillness and silence of Aikido allow techniques to flow seamlessly and effortlessly as intuitive choices replace the slower process of conceptual thought However the need for awareness and intuition in martial arts relies on the basic martial principles that form the foundation of the physical practice Appropriate distance alignment and timing of strikes are critical If there are no credible strikes then the need for awareness of what is happening in the space surrounding the nage diminishes as does the need for internal awareness of thoughts or emotions Without the threat of a sudden strike there is no need to make a split second intuitive choice This book is about the silent skill sets that translate from the mats to our life off the mats It is these skills that are important to building a more peaceful world Rather than technique the focus is on how we practice How we develop awareness of the space that surrounds us and find stillness in the waterfall of thoughts and emotions that cascade through our heads while we practice How we create new techniques in response to changing conditions and how the use of intuition can guide our practice and our interaction with people in our daily lives
