The Algorithm of Creation Nicholas Hagger, 2023-10-27 2023 SMN Book Prize Winner Significant Contribution to its Field *The Algorithm of Creation* is the last of Nicholas Hagger's quartet on the unity of the universe and humankind and follows *The Universe and the Light* 1993 *The One and the Many* 1999 and *The New Philosophy of Universalism* 2009 It offers an algebraic formula written out for him by Junzaburo Nishiwaki Japan's T S Eliot in Tokyo in October 1965 that sums up the wisdom of the East A A 0 Based on ancient Chinese thinking yin dark yang light the Tao it shows all opposites reconciled in the underlying unity of the One Void whose emptiness is also a fullness During a dinner at a conference of leading scientists at Jesus College Cambridge in September 1992 watched by Nobel physics prizewinner Roger Penrose Hagger reversed the formula to 0 A A when he wrote down the maths for his view of the origin and creation of the universe and showed the first two particles emerging from the Void's singularity influenced by the 1992 discovery of ripples in the cosmic microwave background radiation and the Presocratic Anaximander of Miletus In this work Hagger shows how this algebraic formula has worked as a universal algorithm 0 A A 0 Its many variations have acted as rules that have controlled the creation and development of the expanding universe its evolution and the rise of human history religion and science and its ultimate fate The formula is behind many of Hagger's works and his application of this algorithm to all human knowledge of the universe and all disciplines takes him to a first ever Theory of Everything which is set out at the end the algorithm of Creation containing 100 mathematical symbols reflecting all the variations that can be summed up in the above algorithm This startling achievement has been made possible by his Universalist cross disciplinary approach which focuses on the fundamental oneness of the universe and humankind and the unitive vision

cold to the grey and to the unending It also provides a face albeit necrotic to the seemingly impersonal sociological forces that undermine the West for in a near perfect correspondence with the zombie the West itself appears to be necrotic in a galloping way Both need brains to ease the pain p 48 **Aliens and Us Are We Prepared Yet?** Vikas Gupta,2010-04-23

The subject of aliens is not a new one and has been around for a really long time now We talk about it all the time News and articles about the possibility of alien visits or attacks are everywhere Perhaps this has become so common that people have started to shrug it off thinking this is just one of those science fiction topics that media loves to sensationalize If all of a sudden we have an alien encounter one day are we psychologically prepared for this Like many of you even I think we are not In fact we might be in a state of shock as they might turn out to be completely different from any of our imaginations about them But if we are prepared for anything then such an alien encounter might not be shocking The objective of this book is to prepare its readers psychologically to deal with the subject of aliens and the first alien encounter In other words aiming to prepare humanity with the cope of a possible shock upon an impending alien encounter There are a lot of mysteries in this world that might have some paranormal behavior associated to them but they are kind of scattered and appear here and there In other words although these mysteries have been documented well enough by a lot of people from time to time but they do not appear related This book attempts to bring together these mysteries and relate them with one possible explanation that is common the alien connection Also it is trying to bring this subject out from the confines of a circle of scientists subject experts and enthusiasts to a common person So this book is for a common man by a common man

that laid the foundation for all future developments in the ancient Near East *Genetic Enslavement* Bruce L. Gary, 2011-06

Every living thing is assembled by its genes This is a crucial starting point for exploring a fundamental human dilemma As stated so starkly by Richard Dawkins a human is a lumbering machine created for the task of safeguarding and propagating the all important genes within I would add that since the machine s behavior is driven by brain circuits pre wired by those genes sometimes we are prone to doing things which work against our individual best interest in order to advance the cause of the genes In other words some of our genes are our enemies outlaw genes because they jeopardize individual well being as they work to assure themselves genetic immortality Every thinking person must face the following dilemma How can I achieve liberation from genetic pitfalls when my values and thinking are so profoundly influenced by the very same genes that have created those pitfalls The more one tries to answer this question the harder it is to imagine that an answer is possible Nevertheless this is a challenge that can become irresistibly fascinating This book is an attempt to bravely explore one of Humanity s most profound existential dilemmas The fate of a civilization is also affected by the outlaw genes especially those responsible for a feeling of discontent with civilization and a vague preference for a simpler society which I would describe as resembling those found in the human ancestral environment This book explores how a flawed human nature undermines every civilization starting a decline and eventual fall Those of us born during the 20th Century are lucky for having seen the best of times for our civilization and as a questionable bonus we may now witness from close up the forces that have condemned every past civilization to ruin *Birds And Neverending Clouds* Pasquale De Marco, 2025-08-12
