Bhambra, John Holmwood, 2021-05-18 Modern society emerged in the context of European colonialism and empire. So too did a distinctively modern social theory laying the basis for most social theorising ever since. Yet colonialism and empire are absent from the conceptual understandings of modern society which are organised instead around ideas of nation state and capitalist economy. Gurminder K. Bhambra and John Holmwood address this absence by examining the role of colonialism in the development of modern society and the legacies it has bequeathed. Beginning with a consideration of the role of colonialism and empire in the formation of social theory from Hobbes to Hegel, the authors go on to focus on the work of Tocqueville, Marx, Weber, Durkheim and Du Bois. As well as unpicking critical omissions and misrepresentations, the chapters discuss the places where colonialism is acknowledged and discussed, albeit inadequately, by these founding figures, and we come to see what this fresh rereading has to offer and why it matters. This inspiring and insightful book argues for a reconstruction of social theory that should lead to a better understanding of contemporary social thought, its limitations and its wider possibilities. **Modern Sociological Theory** George Ritzer, Jeffrey Stepnisky, 2021-02-07 The authors are proud sponsors of the SAGE Keith Roberts Teaching Innovations Award, enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. Modern Sociological Theory gives readers a comprehensive overview of the major theorists and schools of sociological thought from sociology's 19th century origins through the mid 20th century. Written by an author team that includes one of the leading contemporary thinkers, the text integrates key theories with biographical sketches of theorists, placing them in historical and intellectual context. Handbook of Contemporary European Social Theory Gerard Delanty, 2006-09-27 This innovative publication maps out the broad and interdisciplinary field of contemporary European social theory. It covers sociological theory, the wider theoretical traditions in the social sciences including cultural and political theory, anthropological theory, social philosophy and social thought in the broadest sense of the term. This volume surveys the classical heritage, the major national traditions and the fate of social theory in a post-national and post-disciplinary era. It also identifies what is distinctive about European social theory in terms of themes and traditions. It is divided into five parts: disciplinary traditions, national traditions, major schools, key themes and the reception of European social theory in America and Asia. Thirty-five contributors from nineteen countries across Europe, Russia, the Americas and Asian Pacific have been commissioned to utilize the most up-to-date research available to provide a critical international analysis of their area of expertise. Overall, this is an indispensable book for students, teachers and researchers in sociology, cultural studies, politics, philosophy and human geography, and will set the tone for future research in the social sciences. *Reconstructing Social Theory, History and*
