Rise And Fall Of Structural Marxism Louis Althusser And His Influence:

The Rise and Fall of Structural Marxism Ted Benton, 1984 Louis Althusser and the Traditions of French Marxism William Lewis, 2005-10-17 Throughout the course of the twentieth century communism has enjoyed direct competition with all other governmental and economic systems Often communist countries produced their own special brand of party intellectual These figures rightly occupied their place within their own national context and within the context of the International Some communist intellectuals through the high level of erudition exhibited in their writing have received a wider reception despite their direct linkage to party politics e g Antonio Gramsci Georg Lukacs and Victor Serge are good examples After 1956 when Khrushchev exposed Stalin's atrocities to the Twentieth Congress of the Communist Party of the Soviet Union and as a result to the entire world Marxist philosophy was widely discredited It had been assumed that Stalin's excesses were somehow encouraged or supported through Marx's thought When in the mid 1960s Louis Althusser first offered his re-readings of Marx's philosophy it and communist political practice were in ruin However Althusser was in a unique cultural and historical position Thinking and writing concomitant with the structuralists and poststructuralists in France and also having access to certain theoretical tools while simultaneously committing himself entirely to Marxist thought Althusser was conceivably the last of his tradition He was a Marxist philosopher who unlike Sartre at the end of his life did not abandon communism to for instance existentialism In Louis Althusser and the Traditions of French Marxism William Lewis gives readers a striking example of intellectual biography and critical theory His approach considering the work and life of Althusser within French Marxism and French intellectual culture fills a void in contemporary scholarship But much more importantly Lewis is able to show how Althusser's thought is the result of and a response to specific French intellectual and political traditions of reading Marx It is through this combination of concerns **Louis Althusser** Warren Montag, 2002-12-17 The publication of Louis Althusser's autobiography *The Future Lasts Forever* shattered the myth of Althusser as austere structural Marxist It not only illuminated the private life of this public thinker but suggested that his previously published works could be read very differently Louis Althusser is the first major overview of Althusser's work since the publication in French of thousands of pages of essays books and letters unknown before 1990 and makes a strong case for a radical reconsideration of his work in the light of this new material Focusing particularly on Althusser's writings on art theatre and literature as well as those of Althusser's collaborator Pierre Macherey Warren Montag traces the contradictory development of Althusser's thought from the early sixties to his autobiography Additional material includes an annotated bibliography of texts by and on Althusser and the book also features a previously untranslated essay by the theorist on Brecht and Marx *Poststructuralism and Critical Theory's Second Generation* Alan D. Schrift, 2014-09-11 *Poststructuralism and Critical Theory's Second Generation* analyses the major themes and developments in a period that brought continental philosophy to the forefront of scholarship in a variety of humanities and social science disciplines and

that set the agenda for philosophical thought on the continent and elsewhere from the 1960s to the present Focusing on the years 1960-1984 the volume examines the major figures associated with poststructuralism and the second generation of critical theory the two dominant movements that emerged in the 1960s Althusser Foucault Deleuze Derrida Lyotard Irigaray and Habermas Influential thinkers such as Serres Bourdieu and Rorty who are not easily placed in standard histories of the period are also covered Beyond this thematic essays engage with issues as diverse as the Nietzschean legacy the linguistic turn in continental thinking the phenomenological inheritance of Gadamer and Ricoeur the influence of psychoanalysis the emergence of feminist thought and a philosophy of sexual difference the renewal of the critical theory tradition and the importation of continental philosophy into literary theory

On the Theory and History of Ideological Production Malcolm K. Read, 2023-08-28 On the Theory and History of Ideological Production promotes the existence of an ideological unconscious understood primarily as a product of social relations not of the Ideological State Apparatus Attention focuses upon the transition from feudalism to capitalism as theorised by the Spanish Marxist and former student of Althusser Juan Carlos Rodríguez Theorization of the ideological unconscious presupposes a change of terrain from the individual society opposition to a problematic based on the social formation The present text assesses Rodríguez's work alongside that of his contemporaries Fredric Jameson Noam Chomsky Terry Eagleton Roy Bhaskar Slavoj Žižek and others

Songs of Experience Martin Jay, 2005-01-10 Few words in both everyday parlance and theoretical discourse have been as rhapsodically defended or as fervently resisted as experience Yet to date there have been no comprehensive studies of how the concept of experience has evolved over time and why so many thinkers in so many different traditions have been compelled to understand it Songs of Experience is a remarkable history of Western ideas about the nature of human experience written by one of our best known intellectual historians With its sweeping historical reach and lucid comparative analysis qualities that have made Martin Jay's previous books so distinctive and so successful Songs of Experience explores Western discourse from the sixteenth century to the present asking why the concept of experience has been such a magnet for controversy Resisting any single overarching narrative Jay discovers themes and patterns that transcend individuals and particular schools of thought and illuminate the entire spectrum of intellectual history As he explores the manifold contexts for understanding experience epistemological religious aesthetic political and historical Jay engages an exceptionally broad range of European and American traditions and thinkers from the American pragmatists and British Marxist humanists to the Frankfurt School and the French poststructuralists and he delves into the thought of individual philosophers as well including Montaigne Bacon Locke Hume and Kant Oakeshott Collingwood and Ankersmit Provocative engaging erudite this key work will be an essential source for anyone who joins the ongoing debate about the material linguistic cultural and theoretical meaning of experience in modern cultures

From Post-Maoism to Post-Marxism Kalpana Misra, 1998 This text chronicles Deng Xiaoping's institution of far

reaching and practical economic reforms that seem at odds with Communist theory and its emphasis on ideology. In fact while Deng often turned to Mao for ideological justification of his reforms those very reforms seemed to wear away to official ideology. Ultimately even though the post Mao government has fostered economic growth improved standards of living and intellectual pluralism these changes have resulted in a decline on the perceived legitimacy of the regime

Patterns in History David Bebbington, 1990-12 **The Spatial Logic of Social Struggle** Nikolaus Fogle, 2011-04-07 Pierre Bourdieu's theory of practice is widely regarded as among the most innovative and illuminating fruits of recent social thought. As evidence mounts that the spatial turn in the social sciences and humanities is no mere theoretical fad but rather an enduring paradigm of social and cultural research, Bourdieu's status as a profoundly spatial thinker takes on a renewed importance. *The Spatial Logic of Social Struggle: A Bourdieuan Topology* focuses on Bourdieu's philosophy of space, arguing that space is at once a condition for social knowledge, a methodological instrument, and a physical context for practice. By considering Bourdieu's theory of social space and fields alongside his several accounts of socially potent physical spaces, Nikolaus Fogle develops an understanding of the systematic co-determinations between social and physical space. He traces Bourdieu's ideas about the spatiality of social life through his investigations of Algerian peasant villages and Gothic cathedrals as well as spaces of class lifestyle and cultural creation, revealing that social and environmental struggles are only logical insofar as they are topological. He also demonstrates how a Bourdieuan dialectical understanding of social and physical space can be brought to bear on contemporary issues in architecture and urban development. This book will be useful and accessible not only to philosophers but also to architects, geographers, sociologists, and other scholars in the social sciences and humanities who take an interest in the social theory of space.

Fredric Jameson Sean Homer, 2018-12-07 Fredric Jameson has been described as probably the most important cultural critic writing in English today, and he is widely acknowledged as the foremost proponent for the tradition of critical theory known as Western Marxism. Yet his work has not been given the systematic review like other contemporary thinkers like Foucault and Derrida. *Fredric Jameson: Marxism, Hermeneutics, Postmodernism* is a thoroughly up-to-date detailed review and analysis of the work of this influential intellectual. Covering Jameson's work and thought from his early projects of form and history to his more recent engagements with postmodernism and cultural politics, this synthesis offers a balanced assessment of his ideas, their development, and their continuing influence.

realism exposes the faulty premises and reasoning behind such assertions and shows that anti realism has political implications unforeseen and unwanted by its adherents
