Rise Of Meso Government In Europe:

The Rise of the Meso Government in Europe L J Sharpe,1993-04-14 This authoritative survey highlights the emergence of the meso an intermediate level of government between the locality and the centre In northern Europe this distinctive dimension tends to take the form of a refurbished county or Land in southern Europe it usually comprises an entirely new elected regional government *Multi-Level Governance and European Integration* Liesbet Hooghe,Gary Marks,2002-05-30 European politics has been reshaped in recent decades by a dual process of centralization and decentralization At the same time that authority in many policy areas has shifted to the supranational level of the European Union so national governments have given subnational regions within countries more say over the lives of their citizens At the forefront of scholars who characterize this dual process as Omulti level governance OLiesbet Hooghe and Gary Marks argue that its emergence in the second half of the twentieth century is a watershed in the political development of Europe Hooghe and Marks explain why multi level governance has taken place and how it shapes conflict in national and European political arenas Drawing on a rich body of original research the book is at the same time written in a clear and accessible style for undergraduates and non experts **Dynamics of Regional Growth in Europe** Andres Rodriguez-Pose,1998-11-19 In a period of deep economic social and political transformation regional disparities seem to be particularly resistant to change The emergence of a global economy the shift in production methods and the greater mobility of capital labour and raw materials have not brought about a radical reshuffling of the prevailing regional disparities There is a greater concentration of economic activity in core areas and very few peripheral regions are taking advantage of the process of global restructuring The Dynamics of Regional Growth in Europe looks for the reasons behind this persistence in the social political and institutional arrangements of a large set of European regions by trying to relate two scientific approaches concerned with regional economic performance which share very little in common the literature on socio economic restructuring and structural change and neoclassical and endogenous growth theories OXFORD GEOGRAPHICAL AND ENVIRONMENTAL STUDIES AIMS TO PUBLISH THE BEST ORIGINAL RESEARCH STUDIES IN THE RELATED FIELDS OF GEOGRAPHY AND ENVIRONMENTAL STUDIES IT S SCOPE IS INTERNATIONAL PRESENTING A BROAD AND DIVERSE RANGE OF SCHOLARLY APPROACHES FROM ACROSS THE WORLD SERIES EDITORS GORDON CLARK ANDREW GOUDIE AND CERI PEACH **International Encyclopedia of Public Policy and Administration Volume 4** Jay Shafritz,2019-03-01 This is the fourth volume of a four volume encyclopaedia which combines public administration and policy and contains approximately 900 articles by over 300 specialists This Volume covers entries from R to Z It covers all of the core concepts terms and processes of applied behavioural science budgeting comparative public administration devel La regionalización y sus consecuencias sobre la autonomía local Council of Europe. Regions in Central Europe Sven Tägil, 1999 The subject of Euro regions is topical and controversial but those of Central Europe have been neglected by scholars Central Europe is demarcated variously according to geographical political economic and cultural criteria The subjective term region and its theoretical implications are considered in the opening chapters The empirical section ranges in time from the appearance of the German stem duchies in the Middle Ages to cross border cooperation in the Oder area today and geographically from Baden Wurttemberg in the west to Transylvania Carpatho Ruthenia and the Kaliningrad enclave in the east The authors all highlight the complex problems of local identity and the centrality of culture in shaping notions of the region

Restructuring the European State Paolo Dardanelli, 2017-12-12 Since 1950 devolution reforms have been widespread across Western Europe leading to constitutional transformation in Belgium Italy Spain and the United Kingdom as well as the potential for state breakup as witnessed by independence referendums in Scotland and Catalonia Over the same period European integration has transferred power upwards to what is now the European Union The simultaneous occurrence of these seemingly contradictory trends raises fundamental questions Is state restructuring a uniform process Has it been fuelled by European integration and if so how Restructuring the European State uses a comparative analysis to present a systematic investigation of the connections between European integration and state restructuring Paolo Dardanelli argues that there are two distinct dynamics of state restructuring bottom up where one or more regions demand self government and top down where the central government decides to devolve power Through quantitative analyses of thirteen key phases of state restructuring in Belgium Denmark France Italy Spain and the United Kingdom he shows that European integration has a powerful influence only in bottom up cases Dardanelli points to a striking paradox of integration whereby

an ethos of Europe growing ever closer to union has become associated with fragmentation divergence and increased complexity rather than a seamless system of multilevel governance Innovative and rigorously researched *Restructuring the European State* marks a major advance in our understanding of contemporary European politics *European Politics* Klaus H Goetz, Peter Mair, Gordon Smith, 2013-09-13 This book arises out of a specially commissioned issue of *West European Politics* marking the journal's 30th anniversary It examines the profound changes in the European political landscape over the last three decades including the fall of Communism progressive European integration territorial restructuring public sector reforms at European national regional and local levels changes in democratic participation protest elections political communication political parties and party competition and challenges to the welfare state The book also discusses how political science has responded to these changes in terms of its substantive focus concepts methods and theories Many of the 17 contributions included identify important challenges for the future including those stemming from EU integration the reduced electoral accountability of politicians the problematic legitimization of party government and the sharpening of the edges of the state Contributors include K A Anderson F C Castles C Crouch M Egeberg M Ferrera H Goetz L Hooghe E M Immergut R F Inglehart M Keating H D Klingemann H Kriesi M Lodge J Lovenduski P Mair G Marks Y M ny L Morlino H Obinger V A Schmidt P C Schmitter and G Smith This book was published as a special issue of *West European Politics*

Community, Scale, and Regional Governance Liesbet Hooghe, Gary Marks, Arjan H. Schakel, Sara Niedzwiecki, Sandra Chapman Osterkatz, Sarah Shair-Rosenfield, 2016 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world *Transformations in Governance* is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private

networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Crafting Democracy Jennifer A. Yoder, 2013-02-07 The importance of subnational regions to politics governance and economic development in Western Europe has long been recognized However far less is known about recent steps to introduce a regional level of politics in East Central Europe Reforms there are part of the larger process of crafting democracy that is regional reforms are linked to the economic and political transition away from communism and toward Europe specifically the European Union Crafting Democracy offers an important comparative analysis of the process and outcomes of region building in the four Visegrád countries Jennifer A Yoder investigates why some but not other post communist countries chose to introduce a regional level of elected government In the 1990s for example Poland boldly took the lead in regionalization while the Czech Republic and Slovakia lagged behind Hungary meanwhile declined to create regions The author argues that these regional reform processes have potentially far reaching implications for state society relations political participation and policymaking at the domestic level The emergence of new actors at the subnational level moreover creates opportunities for cross border and European Union level initiatives
