Risiko Und Wagnis:

Environmental Standards Klaus Pinkau, Ortwin Renn, 2013-03-14 It is not uncommon that a group of scientists from many different disciplines join a working group discuss a topic of interest and edit a volume of articles related to this topic They may even agree on a jointly written introduction or conclusion The study group Environmental Standards established in 1987 as an expert panel of the German Academy of Sciences and Technology in Berlin broke with that common tradition and became involved in a fascinating but also pain staking experiment to compose a document on setting environmental standards that has been literally written and authorized by all group members The group consisted of eleven individuals representing the following disciplines physics chemistry biology engineering law psychology and sociology economics The study group had two major goals First to provide a document that summarizes the state of the art in each discipline with respect to the topic of environmental standards Since it is impossible to cover all environmental hazards in one book the panel members agreed to limit the discussion of the scientific material to one major case study the effects of ionizing radiation This topic was selected because the scientific data base is well developed in this area and levels of anthropogenic release can be compared with natural background levels These two conditions are rarely met by most chemical hazards

Environmental Standards Christian Streffer, Josef Bückner, Adrienne Cansier, Dieter Cansier, Carl Friedrich Gethmann, Robert Guderian, Gerd Hanekamp, Dietrich Henschler, Gerald Pösch, Eckard Reh binder, Ortwin Renn, Marco Slesina, Kerstin Wuttke, 2013-06-29 The rapid growth of the world population nearly six fold over the last hundred years combined with the rising number of technical installations especially in the industrialized countries has lead to ever tighter and more strained living spaces on our planet Because of the inevitable processes of life man was at first an exploiter rather than a careful preserver of the environment Environmental awareness with the intention to conserve the environment has grown only in the last few decades Environmental standards have been defined and limit values have been set largely guided however by scientific and medical data on single exposures while public opinion on the other hand now increasingly calls for a stronger consideration of the more complex situations following combined exposures Furthermore it turned out that environmental standards while necessarily based on scientific data must also take into account ethical legal economic and sociological aspects A task of such complexity can only be dealt with appropriately in the framework of an inter disciplinary group

Sinnsuche im Wagnis Siegbert Warwitz, 2022-05-24 Dieses Buch befasst sich mit der Frage welcher Sinn darin liegen könnte Sicherheiten aufzugeben und sich bewusst und aktiv in bedrohliche Lebenssituationen zu begeben Es sucht nach den Gründen die vitale Menschen Kinder Jugendliche Erwachsene Extremsportler Unternehmer Kriegsreporter Revolutionäre Missionare Märtyrer Forscher Entdecker Grenzgänger dazu bewegen mit allen Konsequenzen einer für sie tragenden Wertvorstellung einem Lebenstraum einer Berufung zu folgen und dabei gefährliche Grenzen zu überschreiten Was veranlasst diese Menschen dazu die verbreitete Selbstschutzregel Safety first zurückzustellen und sich für höhere eingestufte

Lebenswerte zu wagen Nach einer empirischen Analyse von acht Erklärungsmodellen die von pathologischen bis zur therapeutischen bis zu hedonistischen Ansätzen reichen gelangt der Verfasser zu einer Sicht des Problemfeldes nach der Wagnis auch als wertvolles Handeln begriffen werden kann In einer pädagogischen Wendung wird Wagnis sofern es von einer Wertebasis ausgeht und von Sinnstreben getragen wird eine menschenbildende Funktion zuerkannt die es lohnt von Kindheit an in einer Wagniserziehung entwickelt zu werden Dieser Gedanke wird mit R M Rilke in das Bild vom Leben in wachsenden Ringen gefasst Wagnis wird als Weg der aktiven Selbstvervollkommenung gesehen als Möglichkeit die naturgegebenen Potenziale optimal auszureifen und einer als bedeutsam angesehenen Lebensaufgabe dienstbar zu machen Hierbei muss zwischen Nervenkitzel und Wagnis Sensationsgier und Sinnsuche Thrill und Skill Einstellungen die den Wagemutigen vom Reizfanatiker trennen streng unterschieden werden Die Analysen ergeben prinzipiell vergleichbare Grundmotive und Charakterstrukturen zwischen den Mutproben des nach seiner Identität suchenden Kindes der in die Slums gehenden Ordensfrau oder des nach neuen Lebensräumen und Lebensgeheimnissen strebenden Wagnissportlers Pioniers Forschers Sie begegnen sich auf dem Wege ihrer individuellen existenziellen Sinnsuche Ulrich Beck Mads P. (Germany), 2001 Comprehensive assessment from the leading German environmental scientists of the state of the world's living resources or biosphere. Covers all aspects of the subject biodiversity and genetic diversity landscape and ecosystems its role in the Earth's system and human impacts on it. Reviews global policies and research strategies on the biosphere and advocates urgent policy actions. A major authoritative contribution to environmental science and policy. Biodiversity the planet's natural capital is undergoing a dramatic collapse its Sixth Extinction. The losses which are due to human activities and overexploitation of the biosphere are irreversible. They are undermining the basis of future well being and prosperity including genetic resources and food production climate stability and coastal and soil protection. The scientists of the German Advisory Council on Global Change have produced an authoritative and alarming analysis of the state of the biosphere. They show that the time remaining for remedial action is fast disappearing and they set out a range of initiatives to be undertaken at different levels. Among their main urgent recommendations are protecting 10-20% of the global land area an Intergovernmental Panel on Biodiversity to provide scientific advice conservation of the diversity of cultivated as well as wild plant species greater multilateral cooperation and implementation of the Convention on Biological Diversity. The volume makes a highly significant contribution to the scientific and policy debates on these critical issues. It will be essential reading for those engaged with them.

Strategies for Managing Global Environmental Risks German Advisory Council on Global Change, 2013-03-13 Global risk potentials and their interplay with economic social and ecological processes of change have emerged as a challenge to the international community. By presenting this report the Council hopes to contribute constructively to an effective efficient and objective management of the risks of global change. The approach taken by the Council is first to classify globally relevant risks and then to assign to these classes of risk both established and innovative risk assessment strategies and risk management tools. On this basis management priorities can be set. The Council further recommends a number of cross cutting strategies for international policies. These include worldwide alignment of liability law creation of environmental liability funds establishment of a United Nations Risk Assessment Panel and implementation of strategies aimed at reducing vulnerability to risk.

Ulrich Beck Ulrich Beck, 2014-03-22 This book presents Ulrich Beck one of the world's leading sociologists and social thinkers as a Pioneer in Cosmopolitan Sociology and Risk Society. His world risk society theory has been confirmed by recent disasters events that have shaken modern society to the core signaling the end of an era in which comprehensive insurance could keep us safe. Due to its own successes modern society now faces failure while in the past experiments were conducted in a lab now the whole world is a test bed. Whether nuclear plants genetically modified organisms nanotechnology if any of these experiments went wrong the consequences would have a global impact and would be irreversible. Beck recommends ignoring the mathematical morality of expert opinions which seek to identify the level of a given risk by calculating the probability of its occurrence. Instead man's fear of collapse should offer an opportunity for international cooperation and a cosmopolitan turn in the social sciences.

The Reinvention of Politics Ulrich Beck, 2018-03-12 Those who advocate ideas about postmodernity and post industrialism offer radical critiques of existing social and political institutions But they provide very little in place of those institutions It is all very well to criticize the limitations of social democracy the welfare state trade unionism and social classes as agents of change but once these have been thrown into crisis what other institutions do we have to depend on The Reinvention of Politics suggests we should think again about forging a new model of politics for our times An active devolved civil society Beck argues can sustain the claim that modernity is inherently democratic For many issues now for example those involving technology environment protest the family or gender relations belong to the domain of what the author calls subpolitics The postmodern critique of modernity in Beck s view is based on mistaken generalizations about a transitional phase in the evolution of modern society What is needed he argues is the reinvention of politics corresponding to the new demands of a society which remains modern but which has progressed beyond the earlier form of industrial society This book will be essential reading for second year undergraduates and above in the fields of social and political theory sociology and political science

Earth System Analysis Hans-Joachim Schellnhuber, Volker Wenzel, 2012-12-06 As humanity approaches the 3rd millennium the sustainability of our present way of life becomes more and more questionable New paradigms for the long term coevolution of nature and civilization are urgently needed in order to avoid intolerable and irreversible modifications of our planetary environment Earth System Analysis is a new scientific enterprise that tries to perceive the earth as a whole a unique system which is to be analyzed with methods ranging from nonlinear dynamics to macroeconomic modelling This book resulting from an international symposium organized by the Potsdam Institute has 2 aims first to integrate contributions from leading researchers and scholars from around the world to provide a multifaceted perspective of what Earth System Analysis is all about and second to outline the scope of the scientific challenge and elaborate the general formalism for a well defined transdisciplinary discourse on this most fascinating issue

Applied Business Ethics: Foundations For Study And Daily Practice Mathias Schuz, 2019-06-14 What has ethics got to do with my job How can I take on ethical responsibility and help to make my company more successful at the same time Although ethical responsibility has become something of a catchphrase these days most people only have a vague idea what it means and how it can be demonstrated in actual practice Disasters like the Volkswagen s emission scandal the oil spill in the Gulf of Mexico the nuclear meltdown of Fukushima the global financial crisis and countless lesser known cases of damage to human beings and the environment are the result of unethically irresponsible business practices Efforts to maximize

profits frequently lead to reckless behavior as those in charge focus on short term benefits and ignore social and environmental risks Their actions have negative consequences not only for the victims but in many cases for the perpetrators themselves too Aggrieved interest groups or disadvantaged stakeholders may react with strikes public protests or boycotts jeopardizing their reputation and profitability This textbook Applied Business Ethics is the result of many years of research work and lecturing and is an attempt to present the most important principles and the latest approaches in business ethics to students teachers and business practitioners alike and help them to make business decisions that everyone concerned will benefit from rather than just a few fortunate stakeholders The author illustrates his theoretical subject matter with practical examples of real life situations and provides numerous exercises to help the reader grasp complex issues moral dilemmas and business risks better In clear accessible and easily understandable terms he demonstrates how ways of finding satisfactory solutions can be found in a systematic way thanks to interdisciplinary research and philosophical reflection

Cross-Cultural Risk Perception Ortwin Renn, Bernd Rohrmann, 2013-03-14 Cross Cultural Risk Perception demonstrates the richness and wealth of theoretical insights and practical information that risk perception studies can offer to policy makers risk experts and interested parties The book begins with an extended introduction summarizing the state of the art in risk perception research and core issues of cross cultural comparisons The main body of the book consists of four cross cultural studies on public attitudes towards risk in different countries including the United States Australia New Zealand France Germany Sweden Bulgaria Romania Japan and China The last chapter critically discusses the main findings from these studies and proposes a framework for understanding and investigating cross cultural risk perception Finally implications for communication regulation and management are outlined The two editors sociologist Ortwin Renn Center of Technology Assessment Germany and psychologist Bernd Rohrmann University of Melbourne Australia have been engaged in risk research for the last three decades They both have written extensively on this subject and provided new empirical and theoretical insights into the growing body of international risk perception research Risikomanagement in Supply Chains Richard Vahrenkamp, 2007 Persönlichkeitsbezogene Risikoforschung in der Trendsportart Kitesurfen Sandro Knoll, 2007 Magisterarbeit aus dem Jahr 2005 im Fachbereich Gesundheit Sport Sportpsychologie Note 1 5 Universität Leipzig Institut für Sportpsychologie und Sportpädagogik Sportwissenschaftliche Fakultät Sprache Deutsch Abstract Ein Mann hebt am Strand von Warnemünde aus dem Wasser ab Sein Drachen zieht ihn hoch in die Luft Er fabriziert Kapriolen Anerkennendes Kopfnicken am Strand Spaziergänger staunen Urlauber blicken von ihren Badetischen auf Der Kiter hat sein Sportgerät im Griff Surflehrer Achim Keilich 35 in Ummanz auf Rügen meint hingegen Kiten geht gar nicht an Badestrande Da muss das komplett verboten sein Der Grund Es passiert einfach zuviel Stürzt eine Windbeule in die bis zu 16 Quadratmeter großen Drachen sind die Sportgeräte für Anfänger nicht mehr zu steuern Ist der Kite überpowert und der Wind nimmt kurz auf sechs Stufen zu geht es richtig ab Dann hat man keine Chance mehr sagt Keilich Dann wirken hunderte Kilo auf den Schirm In glimpflichen F
