Committee on Banking, Housing, and Urban Affairs,2005 Insurance Against Poverty World Institute for Development

Economics Research,2005 Poor people in developing countries are often affected by droughts floods illness crop failure job loss and economic downturns Much of their energy goes into coping with these shocks and into day to day survival While insurance and credit markets combined with widespread social security provide an important cushion against poverty in rich countries the need for immediate survival may lock the poor into persistent poverty in developing countries The poor in developing countries do have informal mechanisms to cope with risk and misfortune These are based on income diversification risk avoidance self insurance by saving together with family and community based mutual assistance Nevertheless the scope of these mechanisms remains limited Repeated individual specific shocks such as illness or pests or covariate risks associated with drought flood or recession undermine the ability of individuals and their families to cope withrisk We now know much more about vulnerability to risk and how poor people cope Even more importantly we have

learned much about the large long term consequences of these risks which condemns many to persistent poverty and excludes them from economic growth But there is much that can be done The micro level studies that underpin this book offer new insights on how effective public action could be more effective in protecting the vulnerable against persistent poverty Policy should focus on providing a comprehensive menu of ex ante and post crisis protection mechanisms including new forms of insurance savings safety nets and the means to strengthen the poor s asset base Local communities have a big role to play public funds should not be used to replace indigenous community based support networks rather they should be used to build on the strengths of these networks to ensure broader and more effective protection With numerous thematic chapters and case studies of both best practice and of failure from a mix of low income and middle income countries across the developing world this book evaluates alternatives in widening insurance and protection provision and makes an important contribution to the topical field of insurance and risk To Amend the Civil Aeronautics Act of 1938--War Risk Insurance
