Risk Management And Error Reduction In Aviation Maintenance:

Risk Management and Error Reduction in Aviation Maintenance Manoj S. Patankar, James C. Taylor, 2017-03-02 Although several U S and European airlines have started providing human factors training to their maintenance personnel the academic community some 300 academic programs in the United States and several others in Europe and Asia has not yet started offering formal human factors education to maintenance students The highly respected authors strongly believe in incorporating the human factors principles in aviation maintenance This is the first of two volumes providing effective behavioural guidance on risk management in aviation maintenance for both the novice and the experienced maintenance personnel Its practical guidelines assist both student and practising aviation maintenance personnel to develop sustainable safety culture For the maintenance community it provides some theoretical discussion about the Why for risk management and then focus on the How to implement a successful error reduction program To help the maintenance community in making a strong case to their financial managers the authors also discuss the return on investment for risk management programs The issue of risk management is taken at two levels First it provides a basic awareness information to those who have little or no knowledge of maintenance human factors Second it provides a set of practical tools for the more experienced people so that they can be more effective in risk management and error recovery in their jobs This invaluable book serves as a practical guide as well as an academic textbook The book covers fundamental human factors principles from a risk management perspective Upon reading this informative book the audience will be able to apply the basic principles of risk management to aviation maintenance environment and they will be able to use low risk behaviours in their daily work

Applied Human Factors in Aviation Maintenance Manoj S. Patankar, James C. Taylor, 2017-07-05 Considering the global awareness of human performance issues affecting maintenance personnel there is enough evidence in the US ASRS reports to establish that systemic problems such as impractical maintenance procedures inadequate training and the safety versus profit challenge continue to contribute toward latent failures Manoj S Patankar and James C Taylor strongly believe in incorporating the human factors principles in aviation maintenance In this their second of two volumes they place particular emphasis on applying human factors principles in a book intended to serve as a practical guide as well as an academic text Features include A real how to approach that serves as a companion to the previous volume Risk Management and Error Reduction in Aviation Maintenance Self reports of maintenance errors used throughout to illustrate the systemic susceptibility for errors as well as to discuss corresponding solutions Two tools a pre task scorecard and a post task scorecard introduced as means to measure individual as well as organizational safety performance Interpersonal trust and professionalism explored in detail Ethical and procedural issues associated with collection and analysis of both qualitative as well as quantitative safety data discussed The intended readership includes aviation maintenance personnel e g FAA type aircraft mechanics CAA type aircraft maintenance engineers maintenance managers regulators and aviation students

Safety Culture Edward J. Sabin, Thomas G. Bigda-Peyton, Mr Jeffrey P Brown, Professor Manoj S Patankar, 2012-10-01 In *Safety Culture Building and Sustaining a Cultural Change in Aviation and Healthcare* the four authors draw upon their extensive teaching research and field experience from multiple industries to describe the dynamic nature of a culture change process particularly in safety critical domains They use a stories to numbers approach that starts with felt experiences and stories of certain change programs that they have documented then proceed to describe the use of key measurement tools that can be used to analyze the state of a change program The book concludes with a description of empirical models that illustrate the dynamic nature of change programs

Biological Laboratories: Design and Implementation Considerations for Safety Reporting Systems, **Safety Ethics** Manoj S. Patankar, 2020-04-27 Much of the previous literature in the field of safety focuses on either the technical equipment issues or the human performance factors that contribute to the active failures in safety critical systems However this book provides guidance in the moral or ethical aspects of decision making that perpetuate many of the latent failures in safety critical systems The book provides a concise introduction to the ethical foundations and follows up with case studies from aviation healthcare and environmental and occupational health
